DOMINION BUREAU OF STATISTICS - CANADA AGRICULTURAL DIVISION

Dominion Statistician:
Director, Agricultural Division:
Statistician:

Herbert Marshall, O.B.E., B.A., F.S.S. J. B. Rutherford, M.Sc. H. J. Hudek.

Ottawa, September 3, 1946.- The Dominion Bureau of Statistics issues today estimates of cash income from the sale of farm products for the first six months of 1946 together with estimates made previously for comparable periods of 1944 and 1945. The estimates are given for each province by months as well as for the six month period by commodities. Income in the Prairie Provinces, monthly for 1946, is given by commodities in Tables 6 to 9.

CASH INCOME FROM THE SALE OF FARM PRODUCTS

Cash income received by Canadian farmers from the sale of farm products during the first six months of 1946 totalled \$633.8 million as compared with \$724.6 million received during the same period of 1945. This is a continuation of the decline which has occurred since the record year 1944 when the cash income received from January to June was \$765.1 million. The decline from 1945 amounts to \$90.8 million or about 13 per cent and from 1944 \$131.3 million or 17 per cent.

The lower cash income so far this year is almost entirely the result of smaller marketings, particularly in the Prairie Provinces, of wheat, oats, barley and hogs. Reduced marketings of these products caused decreases in income of \$50 million in Saskatchewan, \$33 million in Alberta and \$7 million in Manitoba. A decrease of about \$10 million occurred in Ontario mainly as the result of smaller returns from meat animals. Lower cash incomes were also received in New Brunswick and British Columbia while Quebec, Nova Scotia and Prince Edward Island obtained higher returns.

As the result of more favourable crops in the west this year and a higher initial price for wheat, together with indications for good crops in other provinces, it is probable that income in the last six months of 1946 will be higher than in the same period of 1945. As a result the cash income of Canadian farmers will probably be maintained near the level of 1945.

Cash Income from the Sale of Farm Products, January to June, 1944 to 1946

These estimates are based on reports of marketings and prices received by farmers for the principal farm products and are subject to revision as more complete data become available. The estimates include the amounts paid on account of wheat participation certificates, the oats and barley equalization payments and those Dominion and Provincial Government payments which farmers receive as subsidies to prices. Fayments made under The Wheat Acreage Reduction Act, The Prairie Farm Assistance Act and The Frairie Farm Income Act are not included with cash income from the sale of farm products but are included in Tables 3 to 9 with total farm cash income in the year in which payment is made under the heading supplementary payments.
