PREFACE

This release is Part V in the Dominion Bureau of Statistics series "Handbook of Agriculture Statistics". It is intended to supersede "Handbook of Agriculture Statistics, Part V - Acreage and Production of Vegetable, 1940-1957", issued in 1958. In addition this report includes historical production and total farm value statistics for fruits.

Vegetables

Included in the vegetable section of the report are the revised estimates of commercial vegetable acreage, production and total farm value figures for the years 1940-66 and the latest available data for 1967.

Vegetable estimates for British Columbia are prepared by the Provincial Department of Agriculture while, for the province of Ontario the estimates for most crops are prepared by the Ontario Fruit and Vegetable Statistics Committee. Elsewhere, the Agriculture Division sends out two annual surveys; the first during the month of June, to obtain information on the acreage of vegetables and the second, undertaken in the fall, designed to provide information on yields and prices. Thus in the Maritime Provinces, Quebec, Manitoba and Alberta, the results of these surveys form the basis of the estimates, with the final figures being prepared in consultation with representatives of federal and provincial departments. The Quebec Bureau of Statistics and the Manitoba and Alberta Departments of Agriculture prepare the estimates for those provinces.

For the main processing crops - beans, corn, peas and tomatoes - acreages contracted, planted under contract and harvested are obtained from processing firms. The estimates included in the report cover only vegetables grown commercially for fresh sale except in the case of processing crops mentioned above.

Vegetables grown either on farms or elsewhere for home consumption only are not included. The areas shown in the tables are planted acreages except in the case of the processing crops. Yields were calculated on a planted acreage basis, where acreage planted is shown. In certain cases acreage actually harvested would be somewhat less than acreage planted.

Fruits

In this section of the report are the revised estimates of commercial fruit production and total farm value figures for the years 1926-66 and the latest available data for 1967.

Estimates made available in this part of the report, except where otherwise indicated, are based on reports submitted to the Dominion Bureau of Statistics by the Quebec Bureau of Statistics and Federal and Provincial Departments of Agriculture personnel in the various fruit growing areas.

The farm value figures are estimates of returns from fruit crop sales, whether for processing or for the fresh market.

NOTE

The estimates for the provinces have been combined to construct the Canada series of the fruits and vegetables. All provinces did not commence reporting data at the same time, therefore, the Canada series quite often indicates an above normal increase or decrease for some years. The result, in many cases, is that a smooth series has not been recorded for Canada.

The fluctuations of the Canada series may be explained by referring to the provincial estimates. The users of these data should refer to the footnotes to clarify the rapid changes in the Canada series.

For all provinces other than British Columbia the original estimates secured by the Bureau were stated in measures of volume (except loganberries, grapes, blueberries and cranberries). These were converted to tons at the following rates: 1 quart of strawberries and raspberries = 1.25 pounds 1 bushel of apples = 45 pounds; 1 bushel of all other tree fruits = 50 pounds (net weight). In the case of British Columbia, the volumetric estimates were calculated as follows: 1 bushel of apples = 45 pounds; 1 bushel of all other tree fruits = 50 pounds (net weight); 1 quart of berries = 1.5 pounds.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications.

- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.
- Amount too small to be expressed.
- P Preliminary figures.
- r Revised figures.
- * Confidential.

Estimates for 1965, 1966, 1967 are subject to revision.

For fresh and processing commodities see provinces.

TABLE OF CONTENTS

Vegetables

Acreage, Production and Value of Vegetables, 1940-66:	Page
Asparagus	7
Beans (fresh and processing)	9
Beans, fresh	12
Beans, processing	15
Beets	18
Cabbage	21
Carrots	24
Cauliflower	27
Celery	30
Corn (fresh and processing)	32
Corn, fresh	35
Corn, processing	38
Cucumbers	41
Lettuce	44
Onions	47
Parsnips	49
Peas	51
Spinach	54
Tomatoes (fresh and processing)	56
Tomatoes, fresh	59
Tomatoes, processing	62
Turnips	64

Fruits

Production and Value of Fruits, 1926-67:

Apples	67
Apricots	70
Blueberries	71
Cherries, sweet and sour	75
Cherries, sweet	75
Cherries, sour	77
Grapes	77
Loganberries	79
Peaches	79
Pears	81
Plums and prunes	83
Raspberries	85
Strawberries	88
Cranberries	92
