## PREFACE

This Handbook has been prepared to consolidate previously published monthly and annual dairy statistics. The publication brings these statistics together in a time series covering the period 1920-1973. The provision of a time series on dairy statistics will provide a comprehensive set of information that is often required by the dairy industry, related industries and governments. The mentioned users claim this information for evaluation, decision making and entertaining of future developments of the dairy industry.

The present Handbook comprises all the revised data and therefore represents the most accurate time series available up to 1973.

The accuracy of the data is subject to several considerations related to data collection. Statistics Canada obtained its information through cooperative arrangements with the provincial milk boards, provincial departments of agriculture, the Quebec Bureau of Statistics, and federal departments. In addition, information from intercensal mail questionnaires, sample surveys and census data is utilized in the compilation of the statistical series.

The principal objective of the Dairy and Cold Storage Unit has been the estimation of total milk production and farm cash receipts resulting from the production of milk. In addition, various agencies have requested more detailed information about the dairy industry. Most of this information has been included in this Handbook.

The basic data necessary for estimating total milk production and farm cash receipts from milk production are compiled and edited by the Agriculture Division of Statistics Canada.

Grateful acknowledgement is made to all who have contributed of their talents to the publication of this Handbook.

PETER G. KIRKHAM,  
Chief Statistician of Canada.

## PRÉFACE

La présente publication a été préparée afin d'unifier les statistiques laitières mensuelles et annuelles publiées précédemment. Elle rassemble ces statistiques en une série chronologique portant sur la période 1920-1973. Une série chronologique sur la statistique laitière fournira à l'industrie laitière, aux industries connexes et aux gouvernements un ensemble exhaustif de renseignements dont ils ont souvent besoin, notamment aux fins de l'évaluation, de la prise de décisions et de la poursuite des réalisations de l'industrie laitière.

Ce bulletin renferme toutes les données rectifiées et constitue par conséquent la série chronologique la plus exacte disponible jusqu'à 1973.

L'exactitude des données est fonction de certains facteurs relatifs à la collecte des données. Le Statistique Canada a obtenu ses renseignements grâce à des accords coopératifs conclus avec les commissions provinciales du lait, les ministères provinciaux de l'agriculture, le Bureau de la statistique du Québec et les ministères fédéraux. De plus, des renseignements provenant des questionnaires postaux intercensitaires, des sondages ainsi que des données du recensement ont été utilisés dans la compilation des séries statistiques.

Le principal objectif de la Sous-section de l'industrie laitière et de l'entreposage frigorifique a été d'estimer la production laitière totale et les recettes monétaires agricoles provenant de la production laitière. En outre, divers organismes ont demandé de plus amples renseignements sur l'industrie laitière, lesquels figurent pour la plupart dans cette publication.

Les données de base nécessaires à l'estimation de la production laitière totale et des recettes monétaires agricoles provenant de la production laitière ont été compilées et vérifiées par la Division de l'agriculture du Statistique Canada.

Nous remercions tous ceux qui ont contribué par leurs talents à la publication de ce bulletin.

Le statisticien en chef du Canada,  
PETER G. KIRKHAM.

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Prix de soutien des produits laitiers .....	43

## EXPLANATORY NOTES

## NOTES EXPLICATIVES

Table 1

**Milk cows** - Cows and heifers two years old and over, milked to be milked, including dairy and multi-purpose breeds.

**Census farms** - An agricultural holding of one acre or more with sales of agricultural products of \$50 or more during the 12-month period prior to the census.

Table 3

**Total milk production** - Includes estimates of milk used on farms (milk fed to livestock, consumed in farm homes and used for production of farm butter), and milk sold off farms for manufacture of dairy products and fluid milk and cream sales.

Table 5 to 13

**Milk products** - Butter, cheese, etc., are expressed as milk equivalents, i.e. they are converted to the original amount of milk from which they were made by the application of appropriate conversion rates.

**Creamery butter** - Prepared in the factory or creamery.

**Other whole milk and cream cheese** - Includes domestically made foreign type cheeses.

**Concentrated whole milk products** - Milk and cream from which part or all of the water has been removed, resulting in a variety of end-products.

**Ice cream mix** - Includes a mixture of mainly dairy products used for the manufacture of soft and hard ice cream.

Table 11

**Creamery butter** - These figures do not correspond to figures in Trade of Canada because the latter are not adjusted for December imports that, due to lagged reporting, are included in the following year figures.

Table 20

**Process cheese** - This is a derivative, mainly from cheddar cheese.

**Cheddar cheese as such** - The term "as such" has been used to express the specific item concerned.

**Other cheese as such** - Refers to other factory whole and partly skimmed milk and cream cheese, which includes some 50 varieties of cheeses.

Table 22

**Evaporated whole milk** - Represents the standard product containing not less than 7.8% butterfat.

Table 23

**Casein** - Includes both edible and inedible casein.

Table 28

**Whey butter** - A by-product from cheese manufacture.

Table 29

**Farm cash receipts** - These include the basic plant paying price minus hauling charges, plus quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the price for milk and cream.

Table 33

**Farm value of total milk production** - Includes farm cash receipts, income in kind (value of milk and butter consumed on farms) and value of milk, skim milk and buttermilk for livestock feeding.

Tableau 1

**Vaches laitières** - Vaches et génisses de deux ans et plus, traitées ou à traire, y compris les races laitières et à usages multiples.

**Fermes de recensement** - Exploitation agricole d'une acre ou plus dont les ventes de produits agricoles se sont élevées à \$50 ou plus au cours des douze mois précédant le recensement.

Tableau 3

**Production laitière totale** - Comprend les estimations du lait consommé dans les fermes (alimentation du bétail, consommation dans les maisons de ferme et utilisation dans la production du beurre fermier), et le lait vendu hors des fermes pour la fabrication de produits laitiers et de lait liquide et les ventes de crème.

Tableau 5 à 13

**Produits laitiers** - Beurre, fromage, etc., sont exprimés en lait, c.-à-d. suivant la quantité originale de lait utilisée pour leur fabrication; on fait le calcul en appliquant les taux de conversion appropriés.

**Beurre de crèmerie** - Préparé dans la fabrique ou la beurrerie.

**Autres fromages de lait entier et à la crème** - Comprend des fromages de type étranger fabriqués au Canada.

**Produits de lait entier concentré** - Lait et crème dont une partie ou la totalité du lait a été enlevée pour donner une diversité de produits finis.

**Mélange pour crème glacée** - Comprend un mélange de produits laitiers principalement utilisés pour la fabrication de la crème glacée molle et dure.

Tableau 11

**Beurre de crèmerie** - Ces chiffres ne correspondent pas à ceux de Commerce du Canada, car ces derniers ne sont pas ajustés en fonction des importations de décembre qui, par suite du retard de déclaration, sont prises en compte dans les statistiques pour l'année suivante.

Tableau 20

**Fromage refait** - Il s'agit d'un dérivé, principalement du fromage cheddar.

**Fromage cheddar tel quel** - L'expression "tel quel" est utilisée pour désigner le produit particulier en cause.

**Autres fromages tels quels** - Désigne d'autres fromages de fabrique faits de lait entier et de lait partiellement écrémé et les fromages à la crème, qui comprennent quelques 50 variétés de fromages.

Tableau 22

**Lait entier évaporé** - Représente le produit type contenant pas moins de 7.8 % de matières grasses.

Tableau 23

**Caséine** - Comprend la caséine comestible et non comestible.

Tableau 28

**Beurre de petit lait** - Produit dérivé de la fabrication du fromage.

Tableau 29

**Recettes monétaires agricoles** - Ces recettes représentent le prix coûtant de base à l'usine moins les frais de transport, plus les primes à la qualité, les gratifications, les dividendes de la clientèle, et les subventions de gouvernements versées indirectement par l'entremise des usines comme partie du prix à l'usine du lait et de la crème.

Tableau 33

**Valeur de la production laitière totale** - Comprend les recettes monétaires agricoles, les revenus en nature (valeur du lait et du beurre consommés dans les fermes) et la valeur du lait, du lait écrémé et du lait de beurre donnés au bétail.

1975												
1976												

(1) Excludes Newfoundland. - Ne comprend pas Terre-Neuve.

(2) Beginning 1961, data adjusted to exclude the milk equivalent of creamery butter used in the manufacture of ice cream mix. - À compter de 1961, les données ont été ajustées pour exclure l'équivalent en lait de beurre de crémier utilisé dans la fabrication du mélange pour crème glacée.

(3) Represents milk and cream, in milk equivalent, sold off farms for fluid purposes. - Représente le lait et la crème, exprimés en lait, vendus hors des fermes à l'état liquide.

(4) Beginning 1948, data includes the milk equivalent of creamed cottage cheese. Previously, 1940 to 1947 inclusive, small quantities of milk included for Manitoba cottage cheese only. - À compter de 1948, les données comprennent l'équivalent en lait du fromage cottage à la crème. Précédemment, soit de 1940 à 1947 inclusivement, de petites quantités de lait étaient prises en compte pour le fromage cottage du Manitoba seulement.

TABLE 5. Utilization of Total Milk Production, Prince Edward Island, 1920-1973

TABEAU 5. Utilisation de la production laitière totale, Île-du-Prince-Édouard, 1920-1973

Year — Année	Farm butter — Beurre fermier	Farm cheese — Fromage fermier	Creamery butter — Beurre crémère	Cheddar cheese — Fromage cheddar	Cottage cheese — Fromage cottage	Other whole milk and cream cheese — Autres fromages de lait entier à la crème	Concen- trated whole milk products — Produits du lait entier concentré	Ice cream mix(2) — Mélange pour crème glacée(2)	Fluid sales(3) — Ventes à l'état liquide(3)	Farm-home consumed — Con- sommation dans les maisons de ferme	Fed on farms — Alimenta- tion des animaux	Total milk production(4) — Production laitière totale(4)

1976								

- (1) The population figures used here are the same as those used in subsequent supply and disposition tables. From 1920 to 1962, population figures are based on June 1 census figures, from 1963 figures are based on July 1 census. - Les chiffres de population utilis  s ici correspondent    ceux qui figurent dans les tableaux subs  quents sur les ressources et emplois. Pour la p  riode entre 1920 et 1962 les statistiques de la population   taient recens  es au 1<sup>er</sup> juin; depuis 1963, ces m  mes statistiques sont recens  es au 1<sup>er</sup> juillet.
- (2) Includes rail transit stocks for the first time. For comparative purposes, ending inventories amounting to 32,082,000 pounds were used in calculating domestic disappearance for 1935. - Comprend pour la premi  re fois les stocks en transit ferroviaire. Aux fins de la comparaison, les stocks de fin d'ann  e, se chiffrant    32,082,000 livres, ont   t   utilis  s pour calculer la disparition int  rieure en 1935.
- (3) Includes imported butter for the first time. For comparative purposes, ending inventories amounting to 44,616,000 pounds were used in calculating domestic disappearance for 1938. - Comprend pour la premi  re fois les stocks import  s. Aux fins de la comparaison, les stocks de fin d'ann  e, se chiffrant    44,616,000 livres, ont   t   utilis  s pour calculer la disparition int  rieure en 1938.
- (4) Adjustment in population: excluding military personnel overseas. - Ajustement de la population: personnel militaire outre-mer non compris.
- (5) Includes butter oil as butter equivalent. For comparative purposes, ending inventories amounting to 105,725,000 pounds were used in calculating domestic disappearance for 1959. - Comprend l'huile de beurre exprim  e en beurre. Aux fins de la comparaison, les stocks de fin d'ann  e, se chiffrant    105,725,000 livres, ont   t   utilis  s pour calculer la disparition int  rieure en 1959.
- (6) Excludes imported butter for processing into "materials for food preparations" which were subsequently exported. - Ne comprend pas le beurre import   et transform   en "mat  ri  es pour pr  parations alimentaires", qui ont   t   export  es ult  rieurement.
- (7) Excludes rail transit stocks which are no longer significant. - Ne comprend pas les stocks en transit ferroviaire qui ne sont plus assez importants.
- (8) These figures do not correspond to figures in Trade of Canada because the latter are not adjusted for December imports that, due to lagged reporting, are included in the following year figures. - Ces chiffres ne correspondent pas    ceux de Commerce du Canada, car ces derniers ne sont pas ajust  s en fonction des importations de d  cembre qui, par suite du retard de d  claration, sont prises en compte dans les statistiques pour l'ann  e suivante.

TABLE 16. Cheddar Cheese Production, by Province, 1920-1973  
TABLEAU 16. Production de fromage cheddar, par province, 1920-1973

1976							

(1) Includes quantities used in process cheese. — Comprend les quantités utilisées dans la fabrication du fromage refait.

(2) Prior to January 1, 1939, small quantities of other cheese have been included. For comparative purposes, ending inventories amounting to 31,453,000 pounds were used in calculating domestic disappearance for 1938. — Avant le 1<sup>er</sup> janvier 1939, de petites quantités d'autres fromages ont été incluses. Aux fins de la comparaison, les stocks de fin d'année, se chiffrant à 31,453,000 livres, ont été utilisés pour calculer la disparition intérieure en 1938.

(3) Includes rail transit stocks for the first time. For comparative purposes, ending inventories amounting to 39,133,000 pounds were used in calculating domestic disappearance for 1943. — Comprend pour la première fois les stocks en transit ferroviaire. Aux fins de la comparaison, les stocks de fin d'année, se chiffrant à 39,133,000 livres, ont été utilisés pour calculer la disparition intérieure en 1943.

(4) Excludes rail transit stocks which are no longer significant. — Ne comprend pas les stocks en transit ferroviaire qui ne sont plus assez importants.

1976							

(1) For the years, 1920 to 1925 inclusive, exports of evaporated and condensed milk were classified under the heading "Milk, condensed, canned or preserved, N.O.P.", as a result it was necessary to establish estimates for these years. — Pour les années 1920 à 1925 inclusivement, les exportations de lait évaporé et de lait condensé ont été classées sous la rubrique "Lait, condensé, en boîte ou en conserve, N.P.A."; il a donc fallu établir des estimations pour ces années.

(2) Beginning January 1, 1942, stocks held by wholesalers were included for the first time. For comparative purposes ending inventories amounting to 14,348,000 pounds were used in calculating domestic disappearance for 1941. — À compter du 1<sup>er</sup> janvier 1942, les stocks des grossistes sont pris en compte. Aux fins de la comparaison, les stocks de fin d'année, se chiffrant à 14,348,000 livres, ont été utilisés pour calculer la disparition intérieure en 1941.

(3) Beginning January 1, 1957, stocks represent manufacturers holdings only and the collection of stocks held by wholesalers was discontinued. For comparative purposes ending inventories amounting to 46,847,000 pounds were used in calculating domestic disappearance for 1956. — À compter du 1<sup>er</sup> janvier 1957, les stocks représentent ceux des fabricants seulement et la collecte de données sur les stocks des grossistes a été interrompue. Aux fins de la comparaison, les stocks de fin d'année, se chiffrant à 46,847,000 livres, ont été utilisés pour calculer la disparition intérieure en 1956.

(1) Data for 1937 and 1938 adjusted to exclude exports of whole milk powder. Prior to 1937 the data include small quantities of whole milk powder. Since 1939, exports of skim milk powder were separately available. — Les données en 1937 et 1938 ont été ajustées pour exclure les exportations de lait entier en poudre. Avant 1937, les données comprennent de petites quantités de lait entier en poudre. Depuis 1939, on disposait de données distinctes sur les exportations de lait écrémé en poudre.

(2) Not separately available. — Non disponibles séparément.

(1) Represents the market price less levies collected under provincial authority. Levies on product in excess of quota are subject to rebate. Levies by category of milk are not available, therefore cash receipts are not additive. — Représente le prix du marché, moins les impôts perçus par la province. Les impôts perçus sur le produit en surplus du contingent font l'objet d'une remise. Les chiffres des impôts perçus par catégorie de lait ne sont pas disponibles; de ce fait, les recettes ne s'additionnent pas.

(2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream. - Comprend l'équivalent en lait du fromage cheddar et d'autres fromages de fabrique faits de lait entier et de crème.

(3) Includes columns 2, 3 and 4. - Comprend les colonnes 2, 3 et 4.

(4) Includes columns 1, 2, 3 and 4. - Comprend les colonnes 1, 2, 3 et 4.

(5) B.C. values based on Class III qualifying milk. - Les valeurs pour la Colombie-Britannique sont celles du lait de catégorie III.

(6) B.C. values based on Class I qualifying milk. - Les valeurs pour la Colombie-Britannique sont celles du lait de catégorie I.

APPENDIX

Conversion Rates

To obtain pounds butter-fat or milk equivalent, multiply the gallons or pounds of product by the conversion rates shown under respective headings below.

APPENDIX

Taux de conversion

Pour obtenir l'équivalent en lait ou en gras de beurre multiplier les gallons ou les livres du produit par les taux de conversion indiqués en regard de chaque rubrique ci-dessous.

Product — Produit	Butter-fat — Gras de beurre	Milk(1) — Lait(1)
pounds — livres		
Butter — Beurre .....	.81	23.4
Cheese (cheddar and other factory cheese made from whole milk) — Fromage (cheddar et autres fromages de fabrique faits à partir de lait entier) .....	.34	11.0
Ice cream mix (gallons)(2) — Mélanges pour crème glacée (gallons)(2) .....	1.21	34.0
Cottage cheese (creamed) — Fromage cottage (à la crème) .....	.04	1.14
Cream cheese — Fromage en crème .....	.32	10.3
Condensed milk — Lait condensé .....	.08	2.3
Evaporated milk — Lait évaporé .....	.08	2.3
Partly skimmed evaporated milk — Lait évaporé partiellement écrémé .....	.04	1.14
Evaporated milk of 2% fat — Lait évaporé à 2 % de gras .....	.02	0.57
Whole milk powder — Lait entier en poudre .....	.27	8.0
Cream powder — Crème en poudre .....	.735	21.0
Malted milk — Lait malté .....	.075	2.5
skim milk — lait écrémé		
Condensed skim milk — Lait écrémé condensé .....	—	3.0
Evaporated skim milk — Lait écrémé évaporé .....	—	3.0
Skim milk powder — Lait écrémé en poudre .....	—	11.0
Casein — Caséine .....	—	40.0
Cottage cheese — Fromage cottage .....	—	7.0
buttermilk — lait de beurre		
Condensed buttermilk — Lait de beurre condensé .....	—	3.0
Buttermilk powder — Lait de beurre en poudre .....	—	12.0
whey — petit lait		
Lactose (sugar of milk) — Lactose (sucre de lait) .....	—	22.0
Whey powder — Petit lait en poudre .....	—	20.0

(1) Milk with 3.5% butter-fat. — Lait à 3.5 % de gras de beurre.

(2) Converted on basis of 11 pounds per gallon and 11% milk fat by weight. — Converti en fonction de 11 livres par gallon et 11 % de gras de lait par poids.

Net Weight of Standard Units — Poids net de l'unité standard

Commodity — Produit	Conversion rate to pounds — Taux de conversion en livres		
	Gallons	Quarts — Pintes	Pints — Chopines
Whole milk — Lait entier .....	10.3	2.58	1.29
Skim milk — Lait écrémé .....	10.4	2.59	1.30
Cream — Crème .....	10.0	2.50	1.25
