DOMINION BUREAU OF STATISTICS - CANADA
AGRICULTURAL BRANCH

Dominion Statistician: R. H. Coats, M.D., F.R.S.C., F.S.S., (Hon.)
Chief, Agricultural Branch: T. W. Grindley, Ph.D.

Beginning on May 28 for the Prairie Provinces and on June 11 for the whole of Canada, the Dominion Bureau of Statistics will release a series of weekly telegraphic reports on crop conditions. In the following pages are listed the correspondents whose co-operation makes such a project possible. In general, the provincial Departments of Agriculture send a general summary, based in most cases on telegraphic advice received from their own fieldmen scattered over the province. In addition to these reports, wires are received from the officers of the Dominion Experimental Farms and Illustration Stations systems. Entomologists and plant pathologists of the Dominion Department of Agriculture also report in connection with their special fields and officials of western companies covering hail insurance have also kindly consented to report on hail damage.

The reports for the whole of Canada will be released from Ottawa at 4 p.m. E.D.S. time on the following dates: June 11; July 3, 16, and 30; August 13 and 27. Additional reports for the Prairie Provinces will be released at the same hour on following dates: May 28; June 5, 18 and 25; July 9 and 23; August 7 and 20; and September 4.
