DOMINION BUREAU OF STATISTICS - CANADA  
AGRICULTURAL BRANCH

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S., (Hon.)  
Chief, Agricultural Branch: T. W. Grindley, Ph.D.

The Dominion Bureau of Statistics will release a series of weekly telegraphic reports on crop conditions in the Prairie Provinces beginning on Tuesday, May 26, and extending until Tuesday, September 1. Seven telegraphic reports for the whole of Canada will be issued at fortnightly intervals beginning on Tuesday, June 2 and extending until Tuesday, August 25. The report slated to appear on Tuesday, June 23, according to the Crop-Reporting Program for 1936-37 issued last January, will be issued on the following day, Wednesday, June 24.

In the following pages are listed the correspondents whose co-operation makes such a project possible. In general, the provincial Departments of Agriculture send a general summary, based in most cases on telegraphic advice received from their own fieldmen scattered over the province. In addition to these reports, wires are received from the officers of the Dominion Experimental Farms and Illustration Stations systems. Entomologists and plant pathologists of the Dominion Department of Agriculture also report in connection with their special fields and officials of western companies covering hail insurance have also kindly consented to report on hail damage. Meteorological data for the Prairie Provinces are supplied by the Dominion Meteorological Service, Toronto, Ontario.
