Field Crop Reporting Series - No. 13

PRELIMINARY ESTIMATES OF CROP AND  
SUMMERFALLOW ACREAGES, CANADA 1974

The acreage estimates for 1974 are, with some exceptions, based on returns from Statistics Canada's annual June survey of seeded acreages and have been made in consultation with the officials responsible for agricultural statistics in each of the provinces. Estimates for some crops grown in relatively small areas have been made with the assistance of provincial and trade officials. Current estimates are subject to revision in the light of further information received during the season and when marketing and other check data become available after the end of the crop year.

For Canada as a whole the area seeded to the sixteen spring-planted crops covered in this report is estimated at 52.8 million acres compared with 54.3 million acres in 1973. Total acreage of the sixteen spring-planted crops, together with winter wheat, fall rye, tame hay and summerfallow amounts to 93.9 million acres, compared with 94.0 million last year.

Note: Excluding Newfoundland for which data are not available.

Série de rapports sur les grandes cultures - N° 13

ESTIMATIONS PROVISOIRES DES SUPERFICIES MISES  
EN CULTURE ET EN JACHÈRES, CANADA, 1974

Les estimations de la superficie, pour 1974, sont basées, à quelques exceptions près, sur les déclarations envoyées à Statistique Canada dans le cadre de l'enquête annuelle de juin sur les superficies ensemencées et ont été établies en collaboration avec les responsables officiels de la statistique agricole dans chacune des provinces. Les estimations de certaines cultures dans des régions relativement petites ont été établies avec le concours des représentants provinciaux et commerciaux. Les estimations courantes sont sujettes à être rectifiées lorsque de nouvelles données seront obtenues durant la saison et quand les données sur la commercialisation et d'autres éléments de contrôle nous parviendront à la fin de la saison agricole.

A l'échelle nationale, les ensemencements des seize cultures de printemps de ce rapport sont estimées à 52.8 millions d'acres contre 54.3 millions en 1973. La superficie totale des seize cultures de printemps, augmentée de la superficie du blé d'hiver, du seigle d'automne, du foin cultivé et des jachères, totalise 93.9 millions d'acres contre 94.0 millions l'année dernière.

Nota: Sans Terre-Neuve, dont les chiffres ne sont pas connus.

Division de l'agriculture  
Section des cultures

Acreages of crops for which 1974 estimates are currently available (except for sunflower seed which is to be found in Table 2) are shown in Table 1 for Canada as a whole and by provinces, together with the figures for 1972 and 1973 and ten-year averages for the 1963-72 period. It should also be noted that, as a result of rounding, the sum of the provincial ten-year averages does not exactly equal the ten-year Canada average for some crops. Acreages by crop district for the Prairie Provinces for wheat, oats, barley and summerfallow are shown in Table 4. In addition, a metric comparison of the area seeded to principal crops and summerfallow for Canada and the Prairie Provinces can be found in Table 5.

Les superficies pour 1974 des cultures pour lesquelles on a des estimations (sauf les graines de tournesol, qui se trouvent au tableau 2) paraissent au tableau 1 pour l'ensemble du Canada et chaque province de même que les chiffres de 1972 et 1973 et les moyennes décennales de 1963-72. A noter également que les chiffres ayant été arrondis, il se peut que les moyennes provinciales décennales ne correspondent pas exactement aux moyennes décennales canadiennes de ces mêmes cultures. Les superficies par district agricole, pour les provinces des Prairies, pour le blé, l'avoine, l'orge et les jachères sont au tableau 4. La comparaison métrique se trouve au tableau 5 pour la superficie enseignée pour les principales cultures et les jachères pour Canada et les provinces des Prairies.

FOOTNOTES

- (1) In some provinces the area seeded to certain crops is too small to permit reliable annual estimates. Acreages in such crops have not been included in the totals for Canada.
  - (2) Includes relatively small acreages of winter wheat in all provinces other than Ontario.
  - (3) Includes oats and barley for grain and for hay in the Prairie Provinces.
  - (4) Includes small acreages of spring rye in Quebec, Ontario and British Columbia.
  - (5) Excludes Prairie Provinces and British Columbia for which current estimates are not available.
  - (6) Harvested area except for 1974. The estimates for 1974 represent the area currently remaining for harvest.
  - (7) Broken period average.
  - (8) Ontario dry beans include 137,000 acres of white beans plus 13,000 acres of other varieties.
- r Revised figures.

RENOVIS

- (1) Dans certaines provinces, la superficie consacrée à certaines cultures est trop limitée pour permettre de faire des estimations annuelles dignes de foi. La superficie de ces cultures n'a pas été comprise dans le total du Canada.
  - (2) Comprend des superficies relativement faibles en blé d'hiver dans toutes les autres provinces, sauf l'Ontario.
  - (3) Comprend avoine et orge à graine et pour foin dans les provinces des Prairies.
  - (4) Comprend des superficies relativement faibles en seigle de printemps en Québec, en Ontario et en Colombie-Britannique.
  - (5) Sans les provinces des Prairies et la Colombie-Britannique, dont les estimations ne sont pas disponibles.
  - (6) Superficie récoltée, 1974 excepté. Pour 1974, les estimations représentent la superficie actuelle à récolter.
  - (7) Moyenne d'une période incomplète.
  - (8) Les haricots secs de l'Ontario comprennent 137,000 acres de haricots blancs plus 13,000 acres de haricots de toutes variétés.
- r Nombres rectifiés.
