THE THIRD ESTIMATES OF FRUIT PRODUCTION, 1951, AND FINAL ESTIMATES FOR 1950

The third estimates of production of fruit in Canada show very little change since last month. Slight upward adjustments have been made in the estimates of the apple and pear crops while production of plums and peaches is now expected to be slightly smaller than the August forecasts. Production by types, with comparable data for 1950 in brackets, is as follows: Apples 14,616,000 bushels (16,166,000 bushels); pears 1,229,000 bushels (864,000 bushels); plums and prunes 691,000 bushels (600,000 bushels); peaches 1,713,000 bushels (1,222,000 bushels); grapes 124,218,000 pounds (109,189,000 pounds).

THIRD ESTIMATES OF FRUIT PRODUCTION IN 1951 WITH FINAL ESTIMATES FOR 1950
