GREENHOUSE INDUSTRY

L'INDUSTRIE DES CULTURES DE SERRE

1957

In 1958 statistics were collected on the sales of various greenhouse crops for the calendar year 1957. Data were also obtained on certain other aspects of this industry including square feet of glass operated, area under cloth and area out-of-doors and total number of employees. A total of 1,222 greenhouse establishments reported operating glass commercially in 1957. Only greenhouses used for the production of items for sale were included. Excluded were areas of glass used for the production of plants for setting out on the farm of the owner and conservatories maintained for non-commercial purposes. The value of sales figures shown represent wholesale prices.

During 1956, the greenhouse industry survey was initiated by the Dominion Bureau of Statistics at the request of the Canadian Horticultural Council. Data were obtained at that time for the year 1955. Since then surveys have been conducted annually. The total area under glass operated in 1957 by reporting firms amounted to 15.4 million square feet and the total value of sales (wholesale) stood at 18.4 million dollars. The number of establishments and area of glass operated are shown by provinces in Table I for 1956 and 1957. Although the total number reporting is about the same for each year, some firms were added to the mailing list for the 1957 survey and some reporting for 1956 did not again report for 1957. For these reasons, the statistics for the two years are not entirely comparable.

Except as indicated in the following paragraph, the data shown are the totals reported to the Dominion Bureau of Statistics by firms and individuals returning questionnaires.

In the case of cucumbers and tomatoes in Ontario, the total production for Essex County, the most important producing area, was based on data obtained from the local co-operative marketing agency. The 1957 tomato and cucumber figures for Ontario are therefore largely an exception to the general condition that these totals are those reported by growers submitting questionnaires to the Dominion Bureau of Statistics only.

Des données ont été recueillies en 1958 sur les ventes des divers produits de serre durant l'année civile 1957. On en a aussi obtenu sur divers autres aspects de l'industrie, dont le nombre de pieds carrés de cultures sous verre, la superficie des cultures sous bâche, la superficie des cultures en plein air et le nombre d'employés. Au total, 1,222 établissements de culture de serre ont déclaré pratiquer la culture sous verre en 1957. Seules les serres servant à la production pour la vente ont été incluses. Ont été exclues les superficies de serre servant à la production de plants de repiquage à la ferme même du propriétaire et les serres ne servant pas à des fins commerciales. La valeur des ventes représente les prix de gros.

L'enquête sur l'industrie des cultures de serre a été inaugurée en 1956 par le Bureau fédéral de la statistique à la demande du Conseil canadien d'horticulture et les données alors recueillies portaient sur l'année 1955. Depuis lors, l'enquête se répète chaque année. La superficie totale des cultures sous verre pratiquées en 1957 par les établissements enquêtés s'est élevée à 15,400,000 pieds carrés et la valeur totale des ventes (en gros) s'est établie à \$18,400,000. Le tableau I donne, par province et pour 1956 et 1957, le nombre d'établissements et la superficie des cultures sous verre. Bien que le nombre de répondants soit à peu près le même pour les deux années, certains établissements ont été ajoutés à la liste postale pour l'enquête de 1957 et certains, qui avaient répondu en 1956, ne l'ont pas fait en 1957. Pour ces raisons, la statistique des deux années n'est pas strictement comparable.

Exception faite de ce qui est dit dans le paragraphe qui suit, les chiffres sont ceux qui ont été fournis au Bureau fédéral de la statistique par les établissements et les particuliers qui ont renvoyé leurs questionnaires.

Dans le cas des concombres et des tomates en Ontario, la production totale du comté d'Essex, la région productrice la plus importante, se fonde sur les chiffres obtenus de la coopérative de vente locale. Il s'ensuit que les chiffres de 1957 sur les tomates et les concombres, pour l'Ontario, font en bonne partie exception à la situation générale, à savoir que les totaux sont ceux qui ont été déclarés par les seuls producteurs qui ont soumis des questionnaires au Bureau fédéral de la statistique.

TABLE I. Revised Summary of Greenhouse Operations, 1956 and 1957
TABLEAU I. Sommaire revisé des cultures de serre, 1956 et 1957

| Province | No. of firms reporting | No. of firms reporting glass | Total area of glass | Total area under cloth | Total area of open field | Value of sales (Wholesale) by types of crops | | | | | | Total glass per firm reporting | Sales per sq. ft. of glass based on questionnaire | No. of employees | | | |
