Printer to the King's Most Excellent Majesty  
1920

## FRUIT STATISTICS OF CANADA, 1919.

Last year it was decided to undertake the collection annually of statistics of fruit production, and the necessary arrangements were instituted by the Dominion Bureau of Statistics, acting in concert with the Fruit Branch of the Dominion Department of Agriculture. It proved to be impracticable to obtain for all Canada satisfactory statistics of the production in 1919 of all descriptions of fruit; and the effort was therefore limited to commercial apples and the sales of nursery stock. The forthcoming census should provide adequate data for the year 1920, as also a fitting starting point for the collection of more complete annual statistics in future. For the year 1919, a preliminary summary of the results obtained was issued by the Dominion Bureau on July 26, 1920.

### COMMERCIAL PRODUCTION AND VALUE OF APPLES.

According to the information collected jointly by the Dominion Bureau of Statistics and the Fruit Branch of the Dominion Department of Agriculture, the commercial production of apples in Canada for the year 1919 was 3,334,660 barrels of the value of \$24,396,210, distributed by provinces as follows: Nova Scotia, 1,600,000 barrels, value \$9,989,680; New Brunswick, 40,000 barrels, value \$307,400; Quebec, 70,500 barrels, value \$527,950; Ontario, 878,860 barrels, value \$7,030,880; British Columbia, 2,236,000 boxes, equivalent to 745,300 barrels, value \$6,540,300. These figures represent average values per barrel of \$6.24 for Nova Scotia; \$7.68 for New Brunswick; \$7.50 for Quebec; \$8 for Ontario; \$8.78 for British Columbia, and \$7.30 for all Canada. The values represent wholesale prices. In the case of apples exported to the United Kingdom the value includes ocean freight rates which varied from \$2.50 to \$3 per barrel. For the province of Ontario, the total production of 878,860 barrels consists of 24,432 barrels of early apples, 124,201 barrels of fall apples and 730,227 barrels of winter apples.

Table I shows for the year 1919 the production and value of commercial apples in Canada, and Table II shows for the year 1919 the production of apples in Ontario by Fruit Inspection Districts.

### I. Production and Value of Commercial Apples in Canada, 1919.

### NURSERY TREES, BUSHES AND PLANTS.

With a view to ascertaining, as accurately as possible, the quantities and values of the different varieties of nursery fruit trees, bushes and plants sold in Canada during the year 1919, schedules were issued to all fruit nurserymen in Canada, calling for a return of the number and value of the varieties of fruit trees, bushes and plants sold by them during the year ended September 30, 1919, apple trees

being divided into Early, Fall and Winter kinds. The replies received showed that the total value of the nursery fruit stock sold in Canada during the year amounted to \$227,627. Of apple trees 249,632 were sold to the value of \$73,269, comprising 39,139 Early apples, value \$11,108; 40,358 Fall apples, value \$11,534, and 170,135 Winter apples, value \$50,627.

The number and value of other descriptions of fruit trees, bushes and plants were as follows: TREES: pears, 50,662, value \$18,310; plums, 46,880, value \$17,595; peaches, 32,535; value \$6,813; cherries, 55,612, value \$19,756. BUSHES: currants, \$146,121, value \$25,343; grapes, 43,864, value \$5,320; gooseberries, 57,280, value \$13,709. PLANTS: raspberries, 395,336, value \$23,786; strawberries, 1,592,657, value \$23,201; blackberries, 14,000, value \$490, and loganberries, 330, value \$33.

The average wholesale price per tree, bush or plant works out as follows: Apples, from 28 to 30 cents; pears, 36 cents; plums, 38 cents; peaches, 21 cents; cherries, 36 cents; currants, 17 cents; grapes, 13 cents; gooseberries, 24 cents; raspberries, 6 cents; strawberries, \$1.46 per 100; blackberries, 4 cents; and loganberries, 10 cents.

The complete results of the inquiry are consigned to the following tables. Table III is a summary, for Canada and each of the provinces, of the number and value sold of each description of fruit, whilst Table IV gives the same information with the names of the varieties.

The returns as summarized in Table IV show that the varieties of each description are very numerous. Of early apples there were sold 21 varieties, of fall apples 18 and of winter apples 53. The varieties of pears were 11, of plums 34, of peaches 10, of cherries 26, of currants 15, of grapes 13, of gooseberries 10, of raspberries 17, and of strawberries 27. These quantities do not include miscellaneous assortments, or odd varieties, the names of which were not furnished. The varieties of which most numbers were sold were as follows: Early apples: Duchess of Oldenburg, 18,663; Yellow Transparent, 10,793; Fall apples: Wealthy, 23,938; Winter apples: McIntosh Red, 42,832; Northern Spy, 13,599; Delicious, 13,252; King of Tompkins, 10,789; Fameuse, 7,015; Pears: Bartlett, 8,143. Plums: European 9,159; Japanese, 4,269; Peaches: Elberta, 4,330; Early Crawford, 3,852; St. John, 3,145; Cherries: Sours, 8,520; Montmorency, 6,344 Sweets, 5,312. Currants: Champion, 20,372; Naples, 10,680; Grapes: Concord, 15,946; Gooseberries: Downing, 5,483; Raspberries, Cuthbert, 54,530; Red, 21,000; Columbia, 11,160; St. Regis, 12,593; Black, 10,675. Strawberries: Senator Dunlop, 965,980; Williams, 41,000; Everbearing, 183,351.
