INTRODUCTION

Statistics concerning the nursery stock industry in Canada for the year 1961 are presented in the accompanying tables. This material was compiled from the results of the survey undertaken in 1962 in which questionnaires were sent to all nurseries in Canada asking for a report on the quantities of nursery stock sold during 1961, which the reporting nurseries had propagated themselves, or which they had grown on for 12 months or more. Nursery stock imported for immediate sale, that is for sale without further cultural treatment by the importer was not included in the scope of this survey. Stock purchased from other Canadian nurseries for immediate sale was also excluded to prevent duplication in reporting. In addition to statistics on quantities sold, information was obtained on the total value of sales at wholesale of ornamental and fruit stock, acreages and the proportion of shipments made in the spring and the fall.

A total of 300 nurseries reported sales of nursery stock in the categories described above in 1961. The number of nurseries reporting sales by province were as follows: Ontario 169; Quebec 37; British Columbia 47; Manitoba 14; Maritime Provinces 13; Alberta 11; Saskatchewan 8. In 1960 336 nurseries were reported with 183 in Ontario, 43 in Quebec, 54 in British Columbia, 23 in Manitoba, 13 in the Maritimes, 11 in Alberta and 9 in Saskatchewan. As a result of this variation in the number reporting, statistics for 1961 are not entirely comparable with those of 1960.

A summary of the total sales of nursery stock is shown in Table I and in Table II the total area planted to nursery stock reported by firms submitting reports to the Dominion Bureau of Statistics is indicated. A total of 252 nurseries reported sales of ornamental nursery stock but only 229 included a report on the value of products sold. Similarly, there were 169 firms with sales of fruit stock items but only 139 of them reported value figures. Table I shows the total figures reported in all cases; thus the value data do not cover all sales of nursery stock reported in the different classes in this table.
