### SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.

## INTRODUCTION

Statistics concerning the nursery stock industry in Canada for the years 1966 and 1967 are presented in the accompanying tables. This material was compiled from the results of surveys undertaken in 1967 and 1968 in which questionnaires were sent to all nurseries in Canada asking for a report on the sales of nursery stock sold during 1966 and 1967 which the nurseries had propagated themselves, or grown on for twelve months or more.

Although questionnaires were sent to all nurseries it is not possible to get replies from every operator, however, it is believed that with very few exceptions, reports have been received from all major nurseries, and accordingly, the bulk of the industry is thought to be covered in the reports submitted.

A total of 264 nurseries reported sales of nursery stock for 1967 while in 1966, 257 reported. The number of nurseries reporting sales by province in 1967, with 1966 figures in brackets, are as follows: Ontario 134 (122), Quebec 35 (34), British Columbia 55 (56), Manitoba 13 (13), Maritimes 11 (15), Alberta and Saskatchewan 16 (17). Due to the variation in the number reporting from year to year, statistics for 1967 are not entirely comparable with those of 1966.

A summary of the total sales of nursery stock is shown in Table 1 and in Table 2 the total area planted to nursery stock reported by firms submitting reports to the Dominion Bureau of Statistics is indicated. In 1967, with last year's figures in brackets, a total of 225 (218) nurseries reported sales of ornamental nursery stock, but only 174 (149) included a report on the value of products sold. Similarly there were 142 (137) firms with sales of fruit stock items but only 100 (88), of them reported value figures. Table 1 shows the total figures reported in all cases; thus the value data do not cover all sales of nursery stock reported in the different classes in this table.

TABLE 1. Sales of Nursery Stock during Year Ending December 31, 1966 and 1967
