REPORT ON THE POULTRY SURVEY OF
JUNE 1, 1968

RAPPORT SUR L'ENQUÊTE DU 1^{er} JUIN 1968
SUR L'AVICULTURE

Estimates of the number of poultry on farms in Canada(1) at June 1, 1968 are based on farmers replies to the semi-annual farm survey and the census count in 1966 together with hatchery data available through the Canada Department of Agriculture. The series of estimates previously published for June and December from 1961 to 1966 have been revised to agree with the 1961 and 1966 censuses (see Table 4). Revised estimates of egg production for 1961 to 1966 will be published in the September report "Production of Eggs" Cat. No. 23-003. Except for Nova Scotia and New Brunswick the 1961 census data has been used for Total Hens and Chickens and Laying Hens and Pullets 6 months and over. Census data for Chicks under 2 months old, Pullets 2 to 6 months old and Others 2 months old and older not intended for laying have been adjusted to show a closer relationship to hatchery placement data. In the case of Nova Scotia and New Brunswick the revision for these three categories necessitated an upward adjustment in the census figures for total hens and chickens.

Les estimations du nombre de volailles dans les fermes du Canada(1) au 1^{er} juin 1968 sont fondées sur les réponses des cultivateurs à l'enquête agricole semestrielle et sur les données du recensement de 1966, de même que sur celles que fournit le ministère fédéral de l'Agriculture au sujet des couvoirs. Les estimations publiées précédemment pour juin et décembre de 1961 à 1966 ont été rendues conformes aux résultats des recensements de 1961 et de 1966 (voir tableau 4). Sauf pour la Nouvelle-Ecosse et le Nouveau-Brunswick, les données du recensement de 1961 ont servi à établir le nombre total de poules et de poulets et le nombre de pondeuses et de poulettes de 6 mois et plus. Les données du recensement sur les poussins de moins de 2 mois, les poulettes de 2 à 6 mois et les autres volailles de 2 mois et plus non destinées à la ponte ont été rectifiées de manière qu'elles marquent un rapport plus étroit avec les données couvoirs. Dans le cas de la Nouvelle-Ecosse et du Nouveau-Brunswick, les rectifications relatives à ces trois catégories ont exigé une majoration des chiffres du recensement pour ce qui est du nombre total de poules et de poulets. Les estimations révisées de la production d'œufs de 1961 à 1966 apparaîtront dans le rapport de septembre intitulé "Production d'œufs" (no de catalogue 23-003).

In 1966 the census figures for "Total Hens and Chickens", "Hens" and "Pullets" have been accepted. However except for the prairie provinces the census figures for "Others" have been adjusted downward with corresponding upward revisions for "Chicks".

En 1966, on a accepté les chiffres du recensement pour le "Total des Poules et des Poulets," le nombre de "Poules" et le nombre de "Poulettes". Toutefois, sauf pour ce qui est des provinces des Prairies, les chiffres du recensement ont été réduits dans le cas des "autres" et ont été majorés d'une valeur correspondante dans le cas des "poussins."

The total number of all poultry on farms in Canada(1) at June 1, 1968 is estimated at 85.8 million birds, 4.3 per cent, less than the 89.6 million at June 1, 1967. The June 1, 1968 estimate includes 76,791,000 hens and chickens; 8,255,600 turkeys; 344,300 geese and 402,800 ducks.

The number total de volailles dans les fermes du Canada(1) au 1^{er} juin 1968 est évalué à 85.8 millions, soit 4.3 p. 100 de moins que les 89.6 millions du 1^{er} juin 1967. L'estimation du 1^{er} juin 1968 comprend 76,791,000 poules et poulets, 8,255,600 dindons; 344,300 oies et 402,800 canards.

(1) Current estimates for Newfoundland are not available. The Census of June 1, 1966 reports 422,524 head of poultry on farms. By class, the numbers reported were: hens and chickens, 417,836; turkeys, 3,264; geese, 966; ducks, 458.

(1) On ne possède pas d'estimations courantes pour Terre-Neuve. Au recensement du 1^{er} juin 1966, on a dénombré 422,524 volailles dans les fermes. Par catégorie, les nombres déclarés étaient: poules et poulets, 417,836; dindons, 3,264; oies, 966; canards, 458.
