SUPPLEMENTARY STATEMENT
DAIRYING STATISTICS OF CANADA
1930 To 1933

SEP 29 1939

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
In Charge of Dairying Statistics: P. H. Ferguson, E.S.A., M.Sc.

The Dominion Bureau of Statistics issues to-day revised data on dairy production for the years 1930-33. This "Supplementary Report", together with the "Advance Report" also issued to-day, offer the latest complete figures for the nine-year period 1930-38. Slight revisions in the 1938 figures may be found necessary when the annual reports are all received from the dairy factories. These revisions will be published in "Dairy Factory Statistics" for 1938. The publication of the data shown in these two reports replaces all previous estimates on the milk production which have appeared at different times in special or general publications of the Dominion Bureau of Statistics. These revisions have been made through the co-operation of the Dairy Commissioners and Statisticians of the provincial Departments of Agriculture.

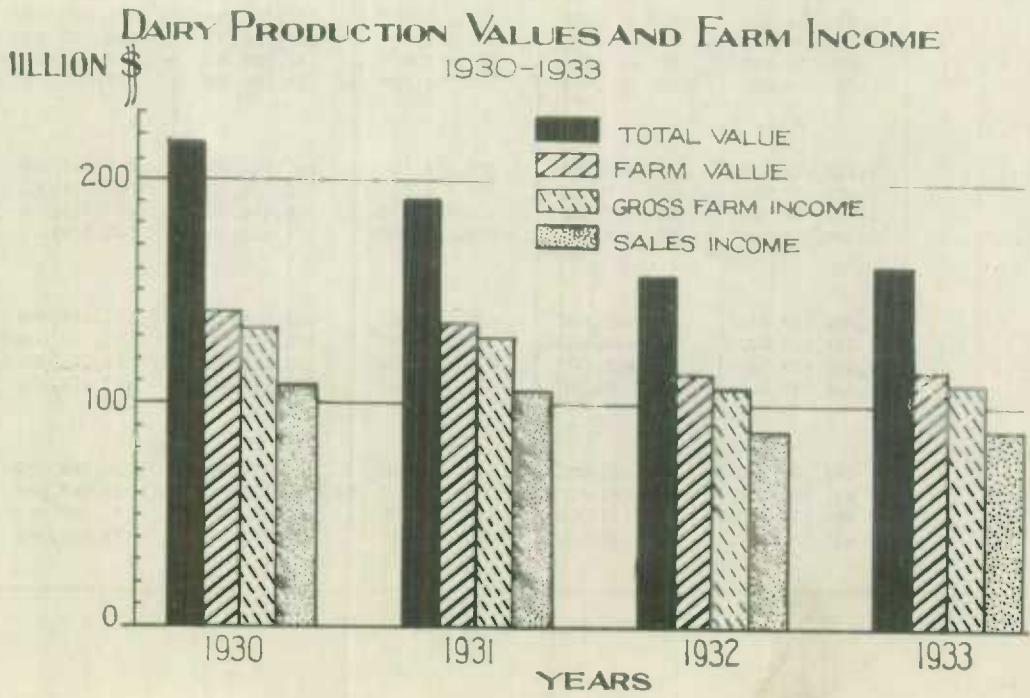

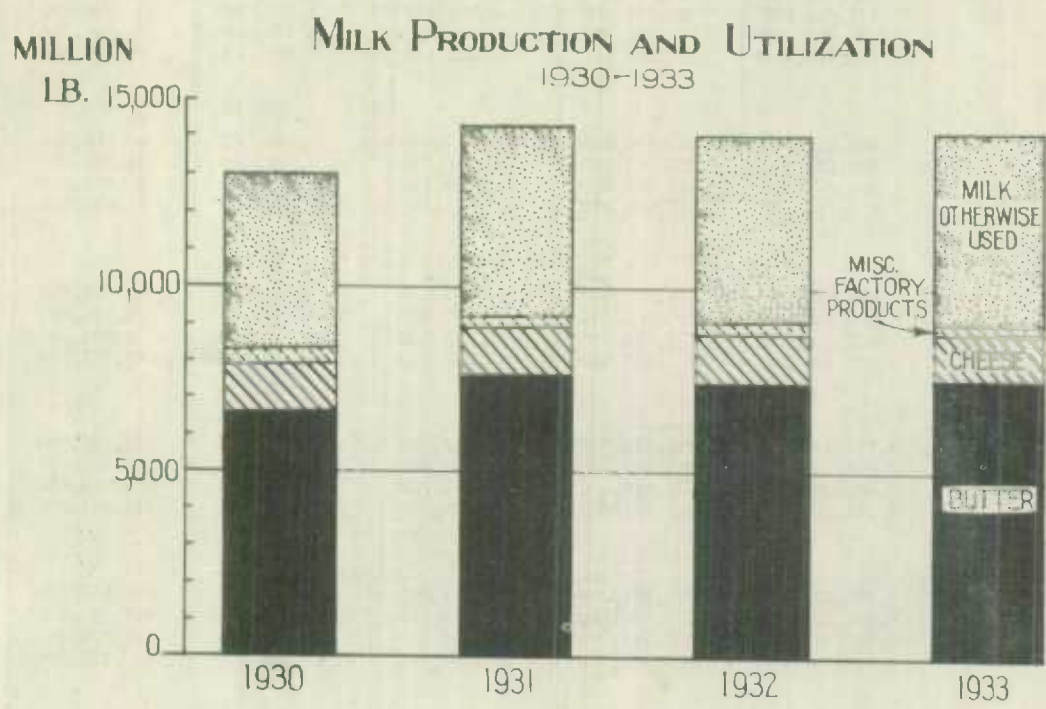

Table I - Total Milk Production of Canada and Disposition Thereof, by Provinces, 1930 to 1933.

Province and Year	Total Milk Production	Manufactured		Milk Otherwise Used		
		On Farms	In Factories	Fluid Sales	Farm Consumed	Fed on Farms
	Lb.	Lb.	Lb.	Lb.	Lb.	Lb.

+ Total ice cream production in 1933 includes the dairy factory output shown in the above table, plus 844,576 gallons valued at \$1,113,028 produced in specialised ice cream plants, and 812,714 gallons valued at \$1,057,107 produced by the confectionery, bread and biscuit industries. Thus, dairy factories accounted for 71.0 per cent of the total production while the other two industries contributed 14.8 per cent and 14.2 per cent, respectively.

Table X - Estimated Consumption of Milk in Canada, by Provinces, 1930 to 1933.

Province and Year	Quantity of milk and cream consumed in pints of milk			Population			Daily Consumption per capita in pints		
	Total	Milk Producer	Non-Producer	Total	Milk Producer	Non-Producer	Total	Milk Producer	Non-Producer

Note - The term "Milk Producers" refers to that part of the population located on farms where cows are kept, while the term "Non-Producers" includes all the urban dwellers, plus the occupants of farms where there are no cows. Otherwise described the former group is composed of those who produce the milk used in their own homes, while the latter represents those who purchase their domestic milk supply.
