REPORT ON CONCENTRATED MILK PRODUCTS, CANADA,
NOVEMBER, 1929.

Statistics of the production of condensed and evaporated milk, milk powder, etc., for the month of November, 1929, have been prepared from the reports of the 27 firms which manufactured these products during the month.

Production as a whole was of about the same volume as in October. Increases are shown in the production of condensed skim milk, evaporated milk, whole milk powder, cream powder and condensed buttermilk, with decreases for condensed milk, skim milk powder, buttermilk powder and casein. A decrease of over a million pounds is shown in the total exports and a similar decrease in the quantity held in cold storage warehouses.

Statistics of production, imports and exports and storage holdings, by items, for the month of November, with comparative statistics for the preceding month, are given in tables 1, 2 and 3, and cumulative production for the 5 months ended November, 30, 1929, in table 4.
