REPORT ON CONCENTRATED MILK PRODUCTS, CANADA,
SEPTEMBER, 1929.

Statistics of concentrated milk products for the month of September, 1929, have been prepared from the returns of the 26 firms which manufactured these products during the month.

Production shows a falling-off from the preceding month for nearly all items, the one exception being cream powder, which shows a considerable increase. The general decrease is probably seasonal, but this cannot be definitely ascertained until statistics for September, 1930, will be made available. The Bureau only commenced the collection of monthly returns of concentrated milk products in July of the present year, and comparison cannot therefore be made with the preceding year.

Stocks in storage on October 1st are less than at date of September 1st. The exports show increases over the preceding month for all items, while the imports were about half as large as those of August.

Statistics of production, imports and exports and amounts held in storage, are given in the following tables for the month of September, with comparative statistics for the preceding month.
