REPORT ON CONCENTRATED MILK PRODUCTS, CANADA, OCTOBER, 1930

Statistics of the production of concentrated milk in Canada in October, 1930, are based on the result of the compilation of returns from the 28 firms whose factories manufactured during the month any of the various items comprised in the general term "concentrated milk".

The production of concentrated milk in October, 1930, covering all items, amounted to 10,891,323 pounds, an increase over the preceding month of 2,048,951 pounds and an increase over the month of October, 1929, of 3,079,895 pounds. The largest increases are in condensed milk, condensed skim milk, and skim milk powder. Evaporated milk shows a decrease from the preceding month, but an increase over the month of October, 1929. The cumulative production of all items for the ten months ended October 31, 1930, was 101,602,279 pounds.

The exports of concentrated milk show an increase for the item of milk powder, while decreases are recorded for condensed milk and evaporated milk. The imports comprised 19,802 pounds of condensed milk, a decrease from the preceding month of 1,702 pounds, and 18,281 pounds of casein, an increase of 2,982 pounds. Cold storage holdings were greater than in the preceding month for condensed milk and skim milk powder, and less for evaporated milk and whole milk powder.

The following tables give statistics of production, imports and exports and cold storage holdings.

1. Concentrated Milk Production for October, 1930, with Comparative Statistics for September, 1930, and October, 1929.

	October, 1930 lb.	September, 1930 lb.	October, 1929 lb.
