REPORT ON CONCENTRATED MILK PRODUCTS, CANADA,

NOVEMBER, 1930.

Statistics of the production of concentrated milk in Canada in November, 1930, are based on the returns of the 28 firms whose factories manufactured during the month any of the various items comprised in the general term of "concentrated milk".

The total production of all items in November, 1930, amounted to 6,269,920 pounds, a decrease from the preceding month of 1,816,209 pounds and a decrease from the month of November 1929 of 1,482,312 pounds. The decrease from the preceding month is distributed pretty generally between the various items, although there are small increases recorded for two items, viz., condensed skim milk and cream powder. The cumulative production of all items for the eleven months ended November, 1930, was 105,067,005 pounds.

The exports of concentrated milk in November, 1930, were less than in the preceding month for all items, and in comparison with the month of November, 1929, decreases are shown for condensed and evaporated milk, but an increase for milk powder. The imports as well show decreases from the preceding month. Cold storage holdings of concentrated milk products at date of December 1, 1930, were less for all items than at date of November 1.

The following tables give statistics of production, imports and exports and cold storage holdings.

1. Concentrated Milk Production for November, 1930, with Comparative Statistics for October, 1930, and November, 1929.
