REPORT ON CONCENTRATED MILK PRODUCTS, CANADA,
DECEMBER, 1930.

Statistics of the production of concentrated milk in Canada in December, 1930, are based on the returns of the 27 firms whose factories manufactured any of the various items under the general classification of "concentrated milk" during the month.

The combined production of all items in December, 1930, amounted to 5,147,488 pounds, compared with 6,269,920 pounds in the preceding month and 6,871,204 pounds in December, 1929. Cumulative production for the twelve months ended December 31, 1930, shows a total of 110,214,493 pounds, compared with a total of 107,819,841 pounds for the year 1929. The figures for 1929 are taken from the annual census of dairy factories for that year. Exports during the year 1930 were less than in 1929 for all items excepting casein, which showed a slight increase. Imports were less for the two items separately classified in the trade tables, viz., condensed milk and casein. Concentrated milk products in cold storage warehouses at date of January 1, 1931, were less than at date of December 1 for condensed milk, evaporated milk, and whole milk powder, and greater for skim milk powder. The January 1, 1931, holdings were much larger for all items than those recorded at date of January 1, 1930.

Detailed statistics of production, imports and exports and cold storage holdings are given in the following tables.

1. Concentrated Milk Production for December, 1930, with comparative statistics for November, 1930, and December, 1929.
