REPORT ON CONCENTRATED MILK PRODUCTS, CANADA, MAY, 1930

Statistics of the production of concentrated milk for the month of May, 1930, have been prepared from returns furnished by the 27 firms engaged in the manufacture of the various items during the month.

The returns show increased production over the preceding month for all of the principal items, and a total increase for all items of 3,713,573 pounds, or 39 per cent. Evaporated milk reached a total of over seven million pounds, condensed milk a production of over two million pounds, and skim milk powder a production of nearly two million pounds. The cumulative total of concentrated milk production for the five months ended May 31, 1930, was 41,116,056 pounds.

The trade tables show a corresponding increase in the export of concentrated milk products, the total for the four items of condensed milk, evaporated milk, milk powder and casein, amounting to 2,507,373 pounds, compared with 1,214,100 pounds in April. The quantities held in cold storage warehouses at date of June 1 were greater than at the corresponding date in May for all items.

Statistics of production, imports and exports, and quantities held in storage warehouses, are given, by items, in the following tables.
