REPORT ON CONCENTRATED MILK PRODUCTS, CANADA, JUNE, 1930

Statistics of the production of concentrated milk for the month of June, 1930, are based on the returns of the 31 firms engaged in the manufacture of the various items during the month.

The production of concentrated milk, covering all items, in June, 1930, amounted to 15,605,333 pounds, an increase over the preceding month of 2,261,012 pounds, and an increase over the month of April of 6,077,825 pounds. Increases are shown for all items excepting condensed milk, which dropped from 2,366,942 pounds in May to 1,513,191 pounds in June. Evaporated milk increased from 7,354,375 pounds to 9,352,061 pounds, and skim milk powder from 1,826,943 pounds to 2,315,782 pounds. The cumulative production of all items for the six months ended June 30, 1930, was 56,900,651 pounds. Comparative statistics, by months, for the first six months of 1929 are not available, as the collection of monthly returns commenced only in July of that year. The annual report for the year 1929, covering the 12 months ended December 31, shows a total production of 107,585,192 pounds.

The trade tables for June show increases over the preceding month in both imports and exports of concentrated milk products, while the amounts held in cold storage warehouses at date of July 1 were considerably in excess of those shown at date of June 1.

Statistics of production, imports and exports, cold storage holdings and cumulative production, are shown in the following tables.
