REPORT ON CONCENTRATED MILK PRODUCTS, CANADA, JANUARY, 1931.

Statistics of the production of concentrated milk in Canada in January, 1931, are based on the returns of the 28 firms whose factories manufactured any of the various products under the general classification of "concentrated milk" during the month.

The total production of concentrated milk, covering all items, in January, 1931, amounted to 4,558,177 pounds, compared with 5,147,488 pounds in December and 6,095,156 pounds in January, 1930. The exports in January, 1931, were higher than those of the preceding month, owing to the large quantity of condensed milk exported. The quantity held in cold storage warehouses at date of February 1 was slightly less than the quantity reported for the preceding month, but was much larger than the stock in storage at date of February 1, 1930.

Correction in connection with statement of concentrated  
milk production for October, 1930.

Since the publication of the report on concentrated milk products in Canada for the month of October, 1930, an error has been found in the return of one of the reporting firms.

The necessary correction alters considerably the figure of the production of skim milk powder and also affects the figures for condensed milk, condensed skim milk, and whole milk powder, shown in the report.

The following statement gives the revised figures of production for the month of October, 1930 and of cumulative production for the ten months ended October 31, 1930.

	Production October, 1930.	Cumulative Production 10 Months ended October, 31, 1930.
