REPORT ON CONCENTRATED MILK PRODUCTION, CANADA,
NOVEMBER, 1931

Number of Operators of Concentrated Milk Plants.- Statistics of the production of concentrated milk in Canada in November, 1931, are based on the returns of the 26 firms whose factories manufactured during the month any of the various items included under the general head of "concentrated milk".

Production.- The month of November records a further decrease in concentrated milk production, the total quantity of all items manufactured during the month amounting to 3,995,818 pounds in comparison with 5,696,349 pounds in the preceding month and 6,269,920 pounds in November, 1930. The November, 1931, quantities of evaporated milk and skim milk powder are the lowest for the year to date, while the production of condensed milk is only slightly above that of February, the low month of the period for this commodity.

Cumulative Production.- Combined production for the 11 months ended November 30, 1931, was 81,634,051, compared with 105,067,005 pounds in the corresponding period of 1930. Condensed milk shows a decrease from the preceding period of 32 per cent, evaporated milk of 21 per cent, and skim milk powder of 15 per cent. Condensed buttermilk and buttermilk powder show increases of 78 and 20 per cent respectively.

Imports and Exports.- The exports of condensed and evaporated milk in November, 1931, record decreases from the preceding month and also from the month of November, 1930, but milk powder shows an increase over both months. No casein was exported, but the imports amounted to 18,273 pounds.

General Tables.- The following tables give statistics of production, imports and exports and storage holdings.

1. Concentrated Milk Production for November, 1931, with comparative statistics for October, 1931 and November, 1930.
