REPORT ON CONCENTRATED MILK PRODUCTION, CANADA,
 JUNE, 1931.

Statistics of concentrated milk production in Canada in June, 1931, are based on the returns of the 30 firms whose factories manufactured during the month any of the various items included under this head, as condensed milk, evaporated milk, milk powder, etc.

Concentrated milk production in June, 1931, amounted to 12,962,132 pounds, an increase over the preceding month of 1,486,442 pounds, but a decrease from the month of June, 1930, of 2,643,201 pounds. The quantity of evaporated milk made was considerably larger than the May production, but decreases are recorded for condensed milk and skim milk powder.

The production of all items for the six months ended June 30, 1931, amounted to 47,680,999 pounds, compared with 56,900,651 pounds in the corresponding period of 1930.

The exports of concentrated milk products were about the same on the whole as those of May, but were considerably less than those of June, 1930. Imports were greater for June, 1931, than for the preceding month, but corresponded fairly well in total with those of June, 1930.

Products in cold storage warehouses at date of June 1, 1931, show increased holdings in comparison with the first of the preceding month for evaporated milk, whole milk powder and skim milk powder, but a decrease for condensed milk. The combined total of all items in storage was about the same at date of July 1st, 1931, as at the same date in 1930.
