REPORT ON CONCENTRATED MILK PRODUCTION, CANADA,
 JULY, 1931.

Number of Factories.- Statistics of the production of concentrated milk in Canada in July, 1931, are based on the returns of the 31 firms whose factories manufactured during the month any of the various items included under the general head of "concentrated milk".

Production.- The combined production of all items during the month amounted to 10,272,742 pounds, in comparison with 12,962,132 pounds in the preceding month and 13,974,953 pounds in July, 1930. Decreased production in comparison with the preceding month, and also with the month of July, 1930, are shown for most of the principal items. Condensed milk shows a decrease from July, 1930, of 1,062,914 pounds, evaporated milk a decrease of 1,479,835 pounds and skim milk powder, a decrease of 661,859 pounds. Condensed buttermilk and buttermilk powder show increases in output over July, 1930, but decreases compared with June, 1931.

Cumulative Production.- The combined production of all items for the seven months ended July 31, 1931, was 57,953,741 pounds, compared with 70,875,604 pounds for the corresponding period of 1930. Increased output over 1930 is shown for whole milk powder, buttermilk powder and condensed buttermilk, but large decreases in the production of condensed milk, condensed skim milk and evaporated milk. The production of skim milk powder was slightly less than in 1930.

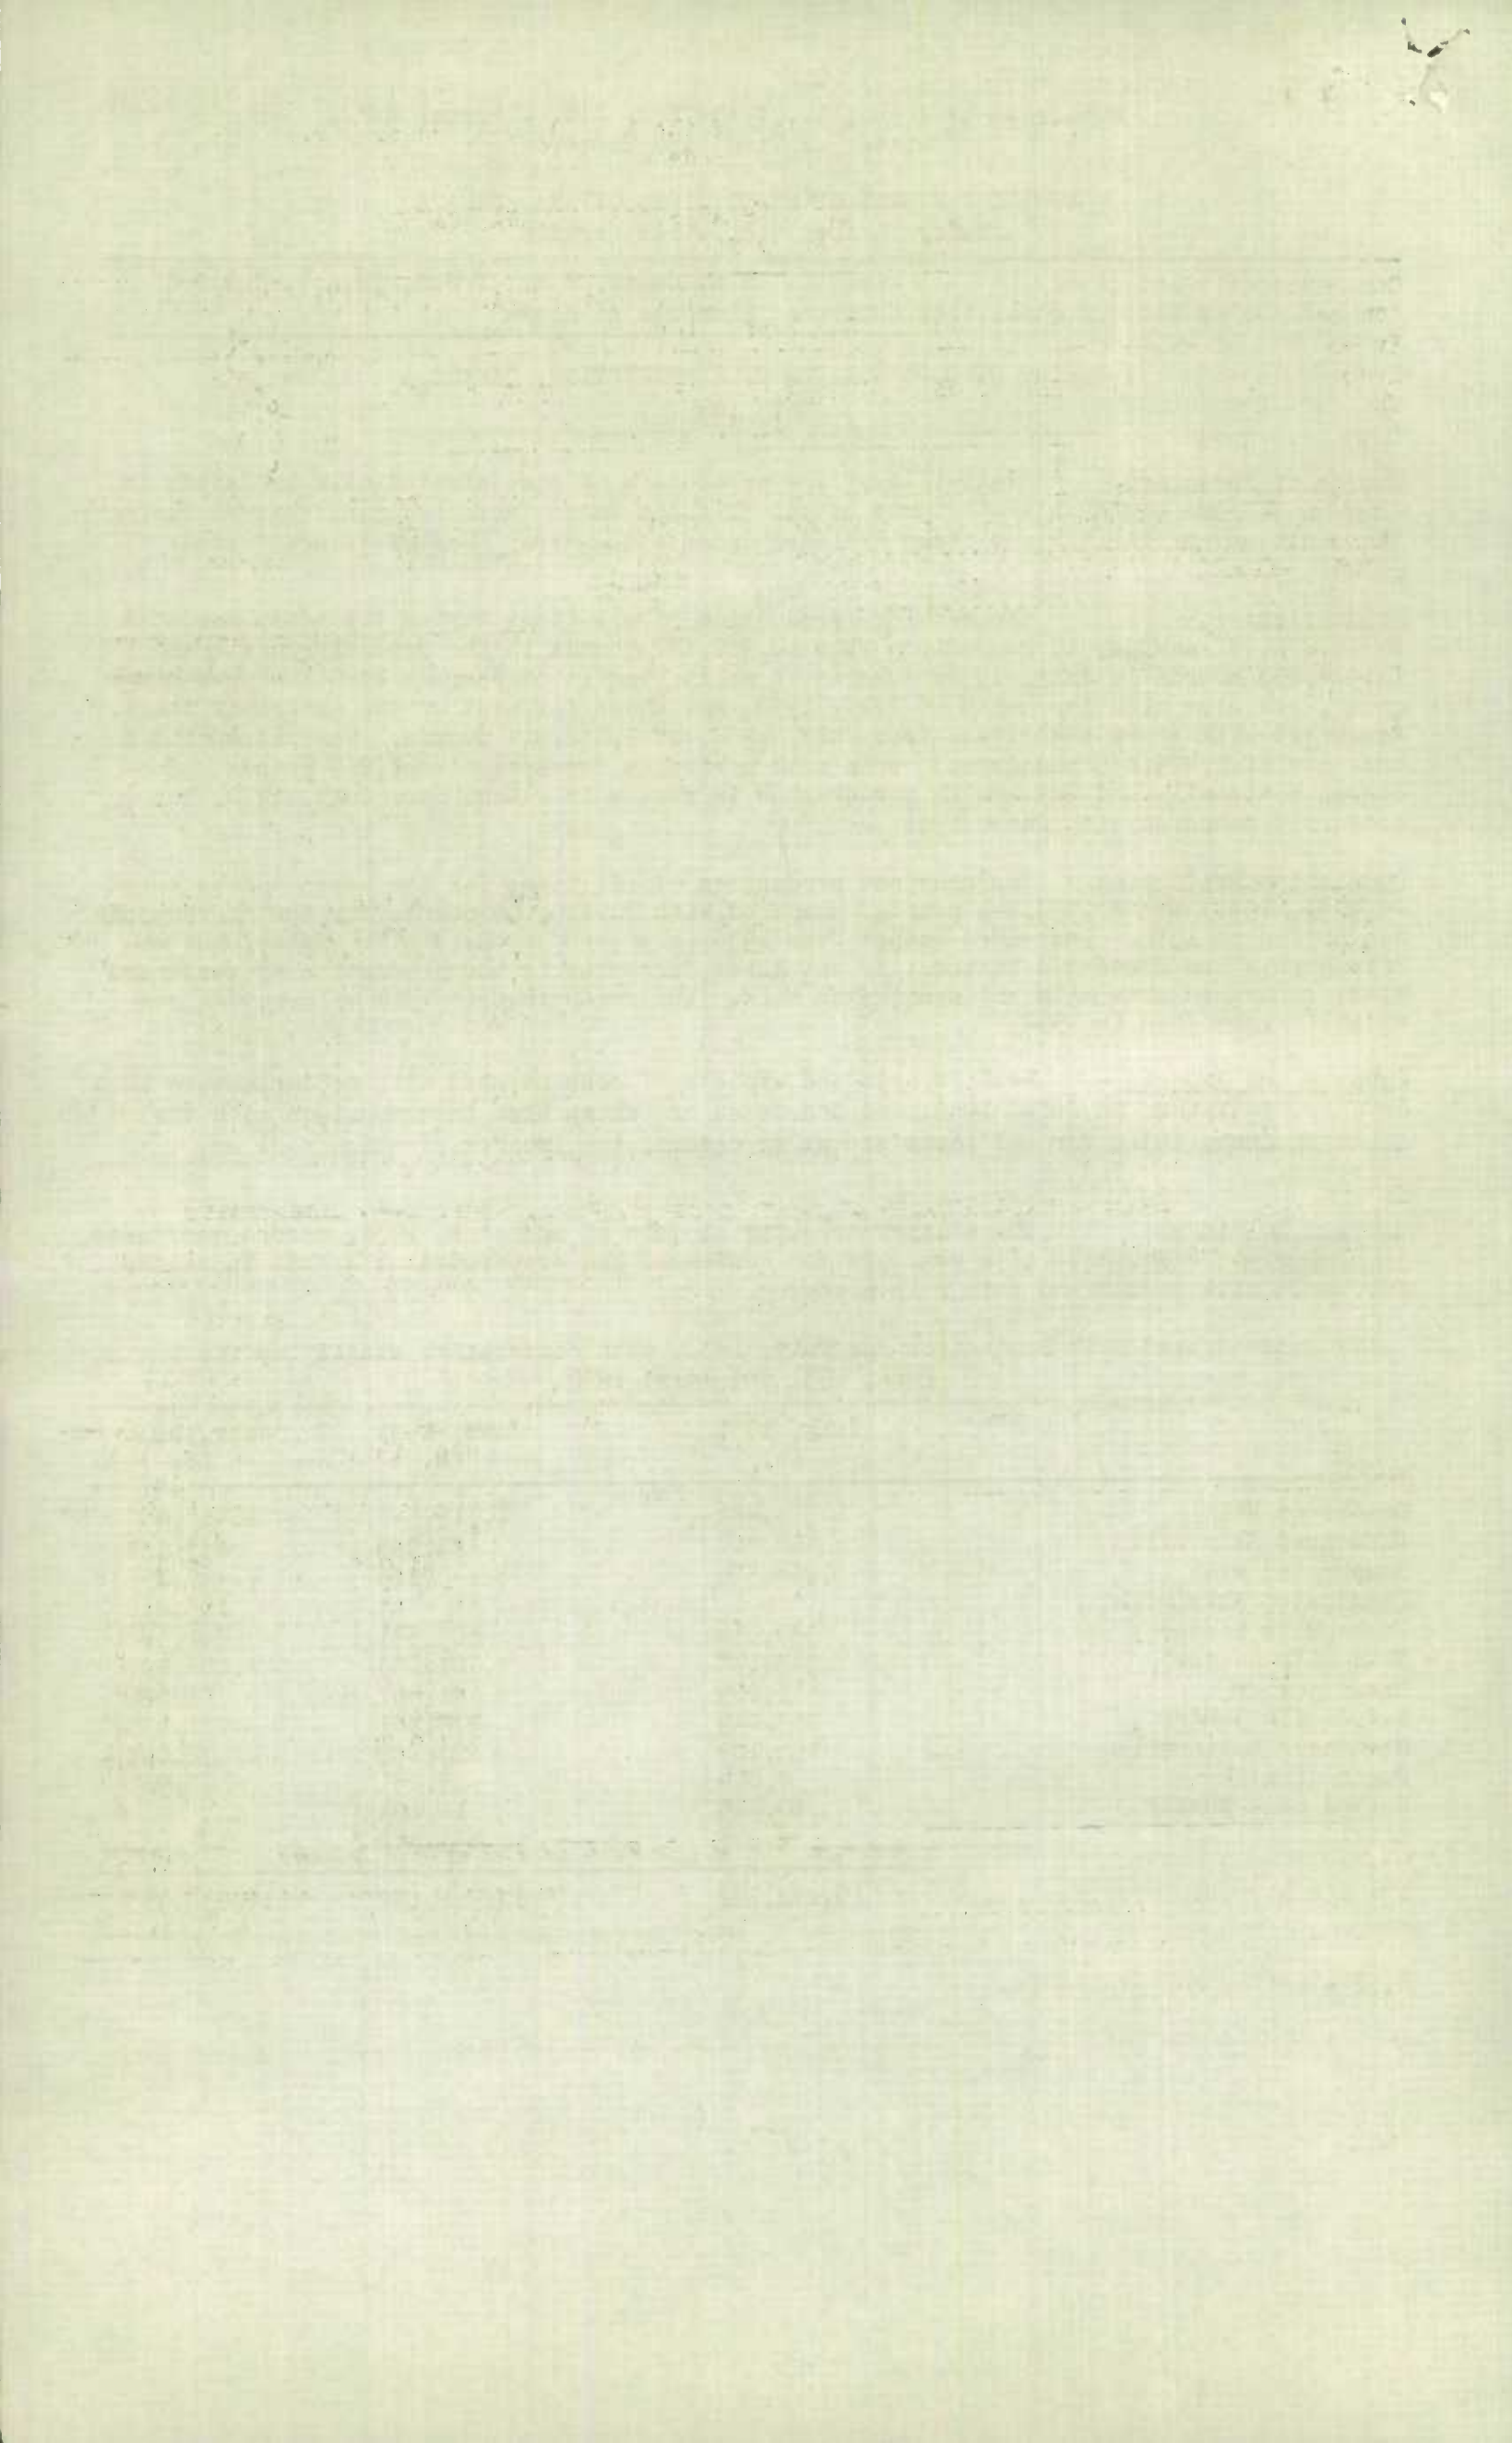

Imports and Exports.- Both imports and exports of concentrated milk products were less in July, 1931, than in July, 1930, and decreases are shown also in comparison with the month of June, 1931, for all items excepting casein, the imports of which show an increase.

Storage Holdings.- The storage holdings at date of August 1, 1931, record decreases in comparison with those of a year ago for condensed and evaporated milk, but increases for whole milk powder and skim milk powder.
