CONCENTRATED MILK PRODUCTION. CANADA, AUGUST, 1933

Statistics of concentrated milk production for the month of August, 1933, are based on the returns of the 27 firms whose factories manufactured any of the various items included under this head, viz., condensed milk, evaporated milk, milk powder, etc.

PRODUCTION.— The total output of concentrated milk, covering all items, in August, 1933, was 8,584,530 pounds, a slight increase over the preceding month, but a decrease from August, 1932, of 317,211 pounds. The decrease from the total of a year ago is due chiefly to the item of condensed milk, which decreased in quantity by about 55 per cent. Evaporated milk increased its production, while the output of skim milk powder was about the same in August of both years.

CUMULATIVE PRODUCTION.— The total output of all items during the eight month ended August 31, 1933, was 58,121,618 pounds, compared with a total of 60,130,729 pounds in the corresponding period of 1932. The total production of condensed milk in the eight months of 1933 is considerably below that of 1932, while the production of evaporated milk is about the same, and an increase is recorded for skim milk powder

FOREIGN TRADE.— The principal item of export among the various kinds of concentrated milk is evaporated milk, which shows for August, 1933, a total of 1,928,100 pounds. Other items include condensed milk, 184,200 pounds, and milk powder, 313,200 pounds. The imports of concentrated milk are relatively small, totalling in August, 1933, only 30,965 pounds.

STORAGE HOLDINGS.— The holdings at date of September 1, 1933, show decreases for most items of concentrated milk, compared with the quantities recorded for September 1, 1932. Evaporated milk decreased by 43 per cent, skim milk powder by 52 per cent, and condensed milk by 30 per cent.
