CONCENTRATED MILK PRODUCTION, CANADA, AUGUST, 1934.

Statistics of the production of concentrated milk in Canada in August are based on returns from the 31 companies whose factories manufactured during the month any of the various items classified as "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, etc.

Production.- The combined production of all kinds of concentrated milk in August, 1934, was 9,622,441 pounds, compared with 10,545,946 pounds in the preceding month and 8,584,530 pounds in August, 1933. Evaporated milk and skim milk powder continue to show increases over 1933, but a smaller output is recorded for condensed milk.

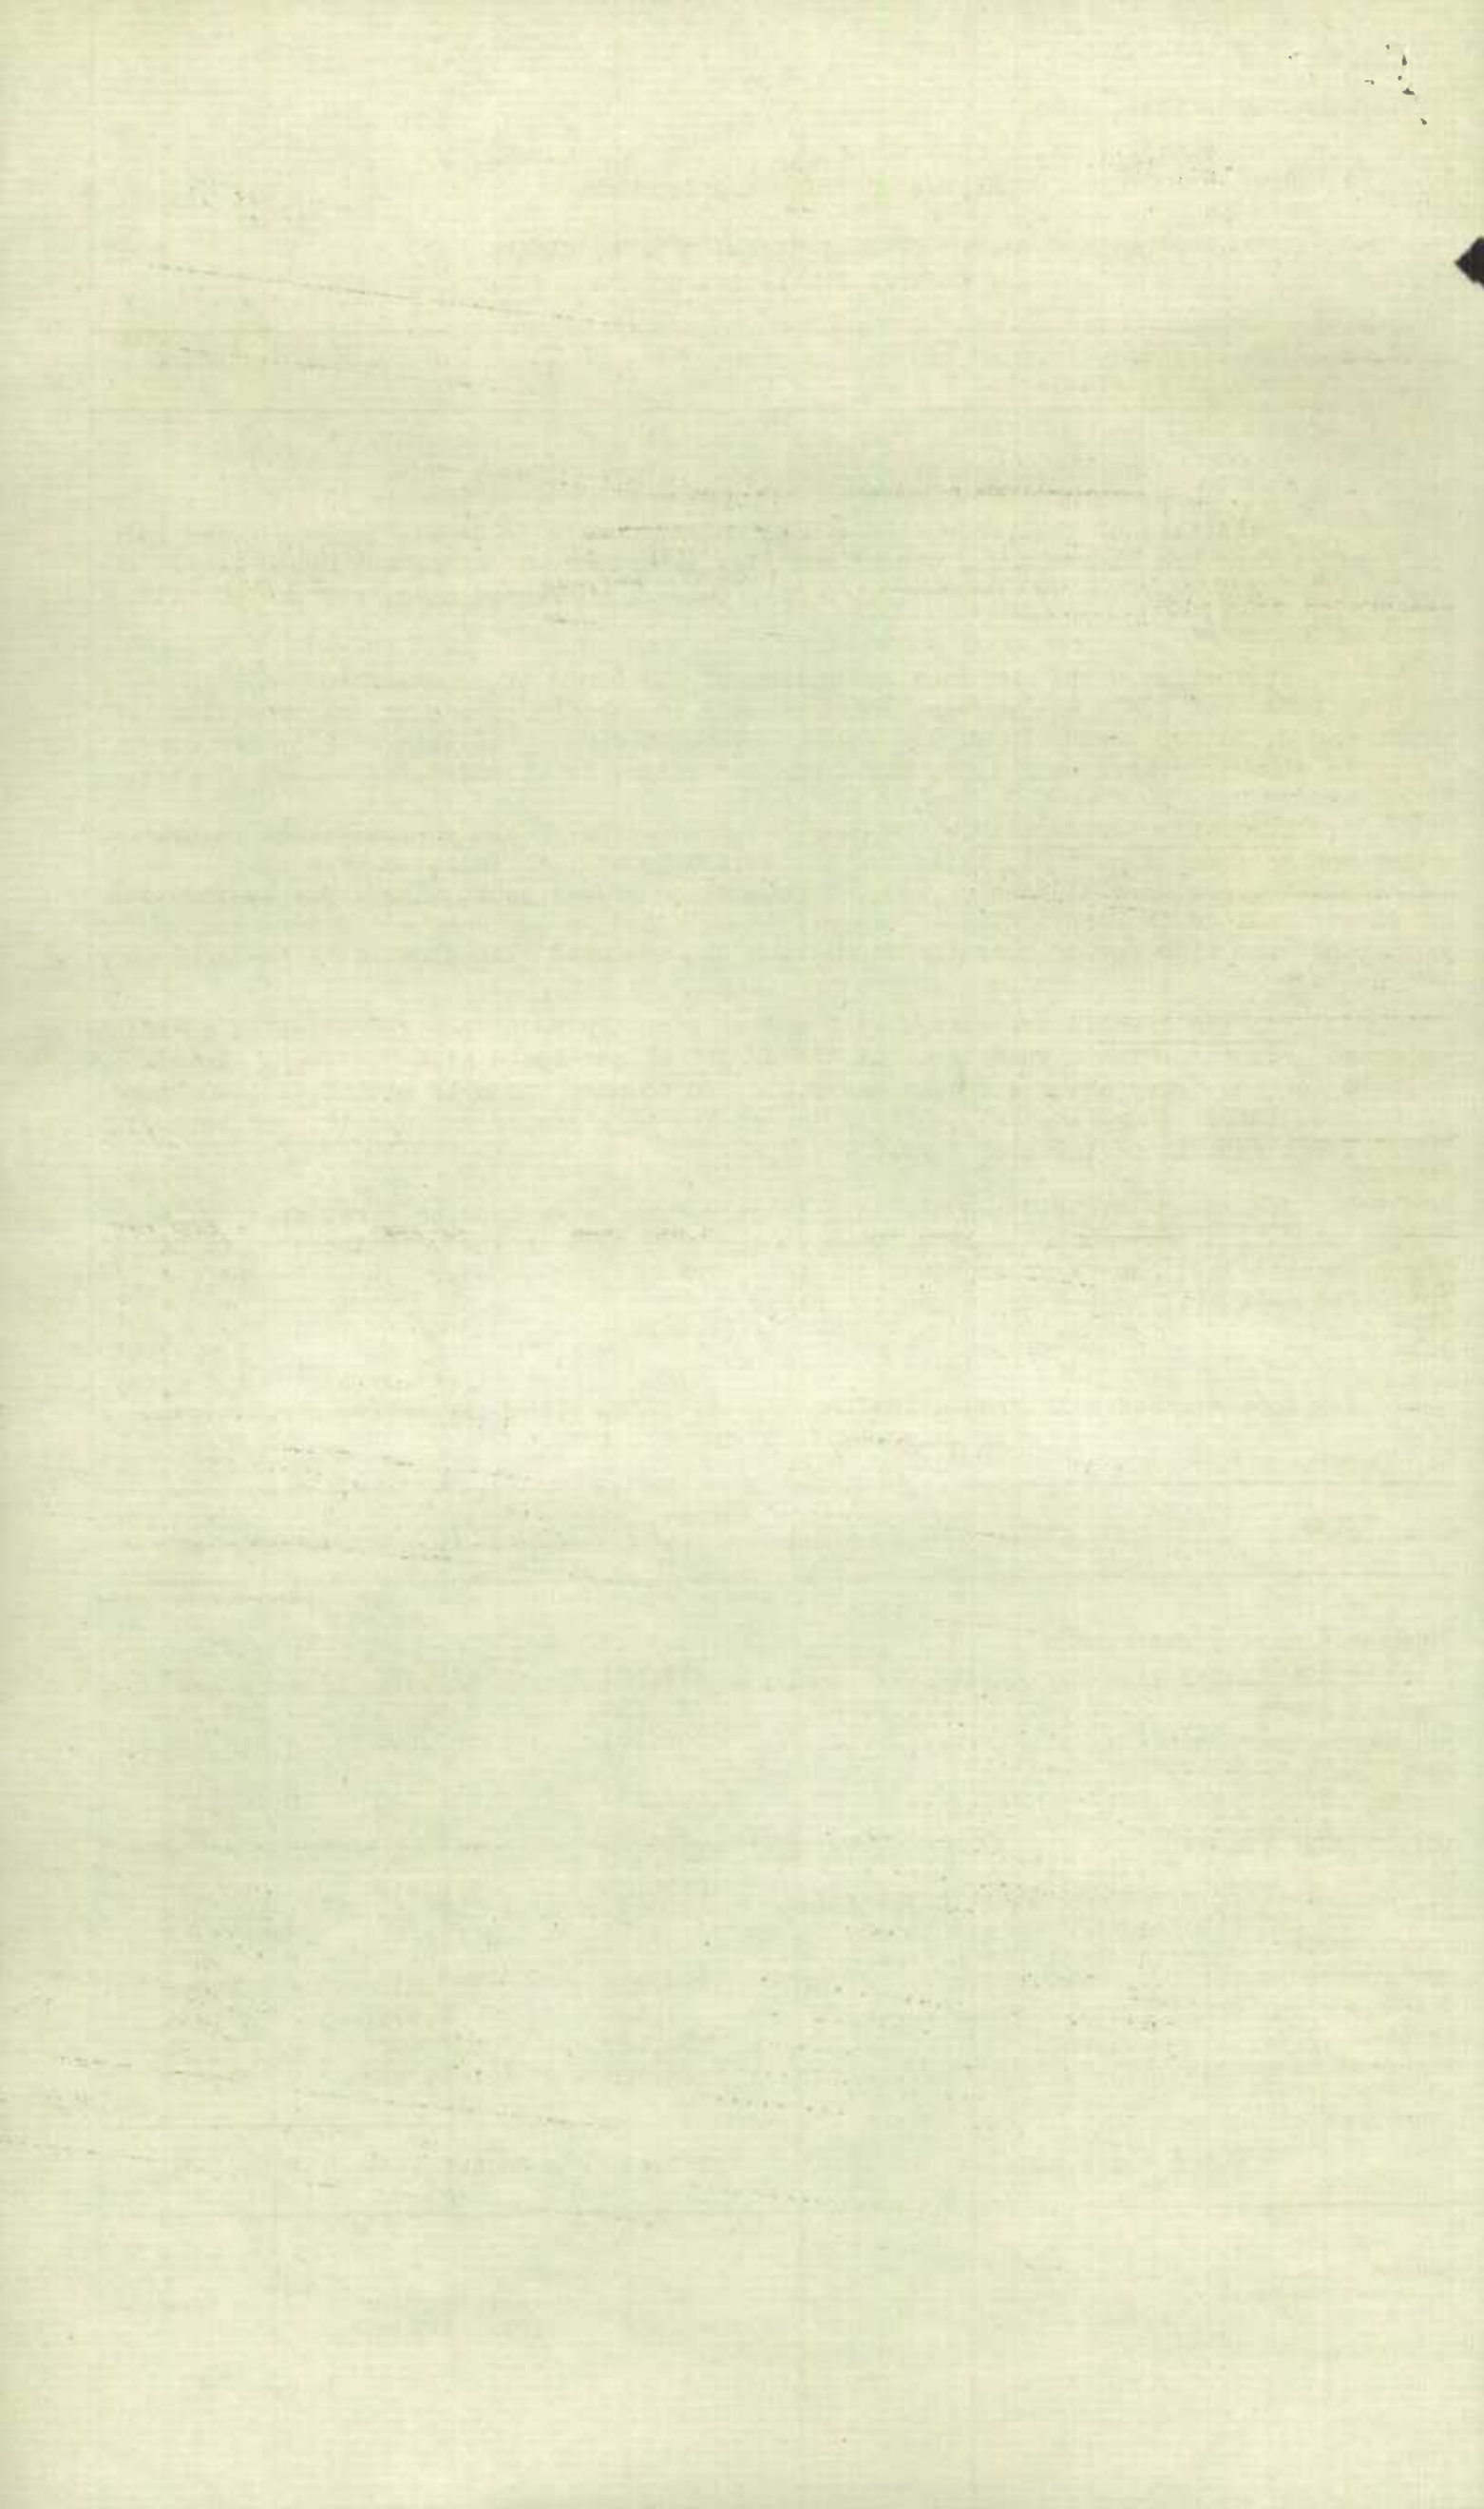

Cumulative Production.- The combined production of the various items in the eight months ended August 31, 1934, was 65,669,698 pounds, an increase over the corresponding period of 1933 of 7,548,080 pounds, or 13 per cent. There was an increase of 12 per cent in the production of evaporated milk and an increase of 26 per cent in the output of skim milk powder, but the production of condensed milk shows a decrease of 13 per cent.

Foreign Trade.- Evaporated milk and milk powder both show increases in quantity exported, compared with a year ago, but the export of condensed milk was less. Total exports for the three items combined was 2,833,500 pounds, compared with 2,425,500 pounds in August, 1933. The principal items of import are milk powder and casein, and both of these items show increases over August, 1933.

Storage Holdings.- Amounts held in cold storage warehouses were, as a whole, larger at date of September 1, 1934, than at the same date in 1933. Evaporated milk, the principal item, shows an increase of over three million pounds, but decreases are noted for skim milk powder and condensed milk.

1. Concentrated Milk Production for August, 1934, with Comparative Statistics for July, 1934 and August, 1933.
