PRODUCTION OF CONCENTRATED MILK, CANADA, OCTOBER, 1935.

Statistics of the production of concentrated milk in Canada in October are based on returns from the 31 companies whose factories manufactured during the month any of the various items classified as "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, etc.

Production. - The combined production of all items of concentrated milk in October was 8,222,627 pounds, compared with 9,657,936 pounds in the preceding month and 8,725,383 pounds in October 1934. Decreases from a year ago are recorded for nearly all items - the exceptions being evaporated skim milk, whole milk powder and condensed buttermilk, which show increased production. This is only the second month in the present year to record a decrease from the corresponding month of 1934, the other month of smaller production being January.

Cumulative Production. - The total production of all items combined, in the 10 months ended October 31, 1935, was 93,774,571 pounds, an increase over the corresponding period of 1934 of 10,493,831 pounds, or 13 per cent.

Foreign Trade. - The principal item of export is evaporated milk, with a total of 885,300 pounds, compared with 2,097,800 pounds in October, 1934. Condensed milk also shows a decrease, but milk powder rose from 436,700 pounds in October, 1934 to 651,400 pounds in October of the present year.
The import figures for September are not available at the present date.

Storage Holdings. - The amounts held in cold storage warehouses at the date of November 1, 1935, were generally less than the holdings at date of October 1. Evaporated milk shows a reduction of 10 per cent, whole milk powder of 4 per cent, skin milk powder of 9 per cent and casein of 43 per cent.
