Chief, Dairy Factory Statistics Branch: Florence A. Brown.

PRODUCTION OF CONCENTRATED MILK, CANADA, OCTOBER, 1936.

Statistics of the production of concentrated milk in Canada in October, 1936, are based on returns from the thirty-six firms whose factories manufactured during the month any of the various items included in the classification "concentrated milk", viz., condensed milk, evaporated milk, milk powder and other.

Production. - The production of all items of concentrated milk combined in the month of October, amounted to 9,544,908 pounds, a decrease from the preceding month of 1,054,599 pounds or 10 per cent, but an increase over October, 1935, of 1,322,281 pounds or 16 per cent. October is the fourth consecutive month to show an increase over the corresponding month of 1935.

Cumulative Production. - The total of all items manufactured during the ten months ended October 31, 1936, was 95,262,708 pounds, compared with a total of 93,774,571 pounds in the corresponding period of 1935. The increase is due to the greater quantity of evaporated milk made--62 million pounds compared with 59 million pounds in the ten months ended October 31, 1935.

Foreign Trade. - The export of evaporated milk was almost twice as large as in October of last year, but the other items--condensed milk and milk powder--show reduced quantities. There was no casein exported in either month. Import figures for the month of October are not available at date of the issue of this report.

Storage Holdings. - Amounts held in storage at date of November 1st were less for all items than at the corresponding date of 1935. Evaporated milk, the principal item, shows a decrease of 14 per cent, and skim milk powder, next in importance, a decrease of 49 per cent.

1. Concentrated Milk Production for October, 1936, with Comparative Statistics for September, 1936, and October, 1935.
