PRODUCTION OF CONCENTRATED MILK, CANADA, MARCH, 1936.

Statistics of the production of concentrated milk in March, 1936, are based on returns from the 33 firms whose factories manufactured during the month any of the various items included in the classification "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, or other.

Production. - The combined production of all items of concentrated milk in March was 6,835,670 pounds, an increase over the preceding month of 1,819,072 pounds, or 36 per cent, but a decrease from March, 1935, of 736,881 pounds, or 10 per cent. This is the first time since October last that a decrease has been shown in comparison with the corresponding month of the previous year.

Cumulative Production. - The production of all items combined in the three months ended March 31, 1936, totalled 16,878,675 pounds, compared with a total of 17,154,814 pounds in the first three months of 1935.

Foreign Trade. - The quantities of condensed milk and evaporated milk exported were less than in March of last year, but the export of milk powder increased by 82 per cent. The import figures are not available at date of the issue of this report.

Storage Holdings. - Little change from a year ago is shown in the amounts held in storage at the date of April 1. An increase is shown in the quantity of evaporated milk, but this is offset by reductions in condensed milk and skim milk powder. The combined total for all items of concentrated milk in storage was 6,687,145 pounds, compared with 6,785,046 pounds at date of April 1, 1935.
