PRODUCTION OF CONCENTRATED MILK, CANADA, SEPTEMBER, 1936.

Statistics of the production of concentrated milk in Canada in September, 1936, are based on returns from the 36 firms whose factories manufactured during the month any of the various items included in the classification "concentrated milk", viz., condensed milk, evaporated milk, milk powder, and other.

Production.- The various items of concentrated milk combined, give a total production in September of 10,599,507 pounds, a decrease from the preceding month of 447,994 pounds, or 4 per cent, but an increase over September, 1935, of 941,571 pounds, or 10 per cent. The main item of production is evaporated milk, its output of 7,437,699 pounds representing 70 per cent of the total for all items.

Cumulative Production.- The total production of concentrated milk in the 9 months ended September 30, 1936, was 85,717,800 pounds, compared with a total of 85,551,944 pounds in the corresponding period of 1935 - a difference between the two periods of only 165,856 pounds.

Foreign Trade.- Exports of the three items of concentrated milk, separately classified in the trade tables, were less than in September, 1935, condensed milk decreasing by 56 per cent, evaporated milk by 7 per cent, and milk powder by 6 per cent. Import figures for September are not available at date of issue of this report. However, the quantities imported in any month are of little importance in comparison with the exports.

Storage Holdings.- The holdings at date of October 1 were for most items considerably less than at date of September 1, or at October 1, 1935. The only one of the principal items recording an increase over October first of a year ago was condensed milk.
