PRODUCTION OF CONCENTRATED MILK, CANADA, MARCH, 1937.

Statistics of the production of concentrated milk in Canada in March, 1937, are based on returns from the 39 firms whose factories manufactured during the month any of the various items included in the classification "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, etc.

Production.— The production of all items of concentrated milk, combined, shows a total of 8,590,758 pounds, an increase over the preceding month of 2,417,024 pounds, or 39 per cent, and an increase over March, 1936, of 1,755,088 pounds, or 26 per cent. Increases over March of last year are recorded for all items excepting cream powder, the increase being particularly noticeable in the case of condensed milk, which rose from 660,049 pounds to 1,240,847 pounds.

Cumulative Production.— The combined product of all items in the three months ended March, 31, was 21,501,960 pounds, compared with 16,878,675 pounds in the corresponding period of 1936.

Foreign Trade.— A large increase is noted in the export of condensed milk, but for evaporated milk and milk powder, decreases are recorded. The import figures are not available at date of the preparation of this report.

Storage Holdings.— The combined total of all items of concentrated milk held in storage at date of April 1, 1937, was 7,321,924 pounds, compared with a total of 7,015,608 pounds at the corresponding date of 1936 — a difference of only 4 per cent. Evaporated milk shows an increase of 790,218 pounds, skim milk powder a decrease of 337,153 pounds, while condensed milk shows practically no change.
