Statistics of the production of concentrated milk in Canada in May, 1937, are based on returns from the 40 firms whose factories manufactured during the month any of the various items included in the classification "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, etc.

Production. - The combined production of all items of concentrated milk in the month of May was 15,518,593 pounds, an amount greater than that of the preceding month by 2,978,076 pounds, or 24 per cent, and greater than the production of May, 1936, by 3,487,683 pounds, or 29 per cent. Cumulative Production. - The production of all items, combined, for the 5 months ended May 31, was 49,645,322 pounds, compared with a total of 37,786,866 pounds in the corresponding period of 1936. Production was higher for all items, excepting cream powder.

Foreign Trade. - The exports of condensed milk and evaporated milk in May of the present year show increases over the exports of May 1936, the increase in the first item amounting to 409 per cent and in the second to 89 per cent. A decrease of 28 per cent is shown in the export of milk powder. Statistics of imports are not available at date of the preparation of this report.
