PRODUCTION OF CONCENTRATED MILK, CANADA, NOVEMBER, 1938.

Statistics of the production of concentrated milk in Canada in November, 1938, are based on returns from the 53 firms whose factories manufactured during the month, any of the various items embraced in the classification "concentrated milk", i.e., condensed milk, evaporated milk, milk powder, etc.

Production.- The combined production of all items of concentrated milk in the month of November amounted to 8,481,505 pounds, a decrease from the preceding month of 2,954,873 pounds, or 26 per cent, and a decrease over November, 1937, of 191,862 pounds. The principal item is evaporated milk, with a production of 5,294,978 pounds, compared with 5,893,368 pounds in November of last year.

Cumulative Production.- The total production of concentrated milk in the 11 months ended November 30, 1938, was 152,635,999 pounds, compared with 129,626,076 pounds in the corresponding period of 1937. Increases are recorded for all items, excepting cream powder and condensed buttermilk.

Foreign Trade.- The exports in November decreased from those of a year ago. The quantity of evaporated milk decreased by 31 per cent, that of milk powder by 38 per cent, but that of condensed milk, increased by 33 per cent. The total import figures for November amounted to 39,698 pounds compared with 85,061 pounds in November, 1937.

Storage Holdings.- The amount held in storage warehouses was slightly less at date of December 1st, than at date of November 1st but an increase over December 1st, 1937. The reduction from the first of the preceding month amounted to 9 per cent and the increase from December 1st, 1937 to over 100 per cent.

1. Concentrated Milk Production for November, 1938 with Comparative Statistics for October, 1938 and November, 1937.

PRODUCTION OF CEREALS IN CANADA, 1937

The following table shows the production of cereals in Canada in 1937, compared with the production in 1936. The production of cereals in 1937 was 1,100,000 metric tons, compared with 1,050,000 metric tons in 1936. The increase in production was due to a number of factors, including a larger area of land planted to cereals and a higher yield per acre. The production of wheat was 650,000 metric tons, compared with 600,000 metric tons in 1936. The production of barley was 250,000 metric tons, compared with 230,000 metric tons in 1936. The production of oats was 150,000 metric tons, compared with 140,000 metric tons in 1936. The production of rye was 50,000 metric tons, compared with 40,000 metric tons in 1936. The production of other cereals was 100,000 metric tons, compared with 120,000 metric tons in 1936.

Cereal	1936	1937
Wheat	600,000	650,000
Barley	230,000	250,000
Oats	140,000	150,000
Rye	40,000	50,000
Other cereals	120,000	100,000
Total	1,050,000	1,100,000

2. Cumulative Production of Concentrated Milk for the eleven Months Ended November 30, 1938, with Comparative Statistics for the eleven Months ended November 30, 1937.
