**CENSUS OF INDUSTRY, 1917.****PART III.—FISHERIES.****Preface.**

The statistics of the present Report relating to Fisheries were collected during the opening months of 1918 for the calendar year 1917.

The volume is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the government branches having jurisdiction with regard to fisheries throughout Canada. These branches comprise: the Dominion Fisheries Branch of the Department of the Naval Service, which exercises jurisdiction over the sea fisheries and over the inland fisheries of Manitoba, Saskatchewan, Alberta and Yukon Territory; and the Fisheries Branches of Ontario and Quebec, which have jurisdiction over the inland fisheries of their respective provinces. The inland fisheries of the Maritime Provinces are, from a commercial standpoint, comparatively unimportant, but their statistics, as in the case of British Columbia, are collected by the officers of the Dominion Fisheries Branch. The province of British Columbia has a Fisheries Branch, but it does not engage in independent statistical work.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared are collected by the local officers of the Fisheries Branches, checked in the Department of the Naval Service, and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent direct by the Bureau to the operators of canneries, salteries, fish-houses, etc., the Fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the Dominion and Provincial governments who co-operated in these arrangements.

The statistics are presented in two main series of tables dealing respectively with the product and the agencies of production—together with a general introduction and summary.

The statistics in this report are for the calendar year 1917, whilst previous reports have dealt with the fiscal year ending March 31. The comparisons accordingly as between 1917 and previous years are not exact.

R. H. COATS,  
*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,  
OTTAWA, September, 1918.

### Note on the Canadian Fisheries.

Canada possesses perhaps the most extensive fisheries in the world, those of Norway and of the British Isles alone disputing the supremacy, whether for the excellence or the abundance and variety of their product. The fertility of Canadian waters is indicated by the fact that the entire catch of salmon, lobsters, herring, mackerel, and sardines, nearly all the haddock, and many of the cod, hake, and pollock landed are taken within ten or twelve miles from shore.

The coast line of the Atlantic provinces from Grand Manan to Labrador, not including the lesser bays and indentations, measures over 5,000 miles, whilst the sea areas to which this forms the natural basin embrace: the Bay of Fundy, 8,000 square miles in extent; the gulf of St. Lawrence, fully ten times that size; and other ocean waters aggregating not less than 200,000 square miles, or over four-fifths of the fishing grounds of the North Atlantic. In addition there are 15,000 square miles of inshore waters, entirely controlled by the Dominion. Large as are these areas, they represent only a part of the fishing grounds of Canada. Hudson bay, with a shore 6,000 miles in length, is greater than the Mediterranean; the Pacific coast of the Dominion measures over 7,000 miles long, and is exceptionally well sheltered for fishermen; whilst throughout the interior is a series of lakes which together cover 220,000 square miles, or more than half the fresh water of the globe, Canada's share of the great lakes of the St. Lawrence basin alone amounting to 72,700 square miles.

Of even greater importance is the abundance and general excellence of the product. The cod and the salmon have long disputed the primacy among these, though in recent years the heavy pack and the high price of lobsters has sometimes sent cod to third place.

The fisheries of the Atlantic coast may be divided into two distinct classes; the deep-sea, and the inshore or coastal fisheries. Deep-sea fishing is pursued in vessels of from 40 to 100 tons, carrying crews of from twelve to twenty men. The method is that of "trawling" by hook and line. The bait used is chiefly herring, squid and capelin, and the fish taken are principally cod, haddock, hake, pollock and halibut. The inshore or coastal fishery is carried on in small boats, usually motor driven, with crews of from two to three men, and in a class of small vessels with crews of from four to seven men. The means of capture employed by boat fishermen are gill nets and hooks and lines, both hand-lines and trawls; whilst from the shore are operated trap-nets, haul seines and weirs. The commercial food fishes taken inshore are the cod, hake, haddock, pollock, halibut, herring, mackerel, alewife, shad, smelt, flounder, and sardine. The most extensive lobster fishery in the world is carried on along the whole of the eastern shore of Canada, whilst excellent oyster beds exist in many parts of the gulf of the St. Lawrence, notably off Prince Edward Island. The salmon fishery is the predominant one on the Pacific coast, but a very extensive halibut fishery is carried on in the northern waters of British Columbia, in large well-equipped steamers and vessels. The method of capture is by trawling, dories being used for setting and hauling the lines, as in the Atlantic deep-sea fishery. Herring are in great abundance on the Pacific coast, and provide a plentiful supply of bait for the halibut fishery. In the inland lake fisheries, the various means of capture in use are gill nets, pound nets, seines, and hooks and lines.

## CENSUS OF INDUSTRY 1917—FISHERIES.

## Introduction and Summary.

The total value of the product of the Canadian Fisheries during 1917 was \$52,312,044, compared with \$39,208,378 in 1916, and \$35,860,708 in 1915. These totals represent the values of the product as marketed, whether fresh, domestically prepared, or factory-made.

The following table shows the quantity and value of the chief commercial fishes (those valued at \$100,000 or upward) during the past five years, with a statement in the final column of the increase or decrease during 1917 as compared with 1916:—

## 1. Quantity and Value of Chief Commercial Fishes, 1913-1917.‡

### The Season of 1917.

Fishing operations during 1917 were, on the whole, successful and remunerative.

In the spring months, weather conditions on the Atlantic coast were rather unfavourable, and in consequence the production of certain of the chief kinds of fish, such as herring and lobsters, was less than in the preceding year. The falling-off in quantity, however, has been offset by a greatly increased value. The adverse weather conditions were more in evidence in some parts of the coast than on others, and while the cod catch in northern New Brunswick and Gaspé districts was smaller, the catch of both cod and haddock in Nova Scotia was considerably larger. Along the south shore of Nova Scotia fish were more plentiful, and the higher prices induced fishermen to prosecute the fishery with greater zeal. A more general use of trap nets resulted in a greatly increased production of haddock at Ingonish, N.S.

The total production of salmon in British Columbia during 1917 was greater than in the preceding year, as a result of the increased demand for the cheaper varieties. The run of sockeye salmon on the Fraser river, which should have been the usual big fourth-year one, was disappointing, proving what had hitherto been presumed, that the rock slide which took place at Hell's Gate in 1913 prevented a sufficient number of parent fish from ascending to the spawning beds. The remunerative prices paid for fish in Alberta and Saskatchewan induced more fishermen to prosecute the fishery, and resulted in a greatly increased catch.

To the increase of \$13,103,666 in the value of the production of all kinds of fish in the whole of Canada, British Columbia salmon contributed over \$6,500,000 while the Atlantic cod, haddock, hake, pollock, sardines, and mackerel contributed over \$4,300,000.

Gasoline engines are being utilized more and more by fishermen on all parts of the coast to enable them to get speedily to and from the fishing grounds. During 1917 there were 14,823 boats with such engines in use against 12,828 in the preceding year.

## Summary of Production, 1917.

The table on the next following pages gives a statement for the whole of Canada of all fish caught and marketed during 1917. For each kind the total caught and the value at the vessel's or boat's side is first given, this being followed by statements showing the form in which each kind was marketed and the value, the whole being divided as between the sea and inland fisheries.

## Agencies of Production, Capital Equipment, Employees, etc.

## (1) Primary Operations:

CAPITAL.—The amount of capital represented in the vessels, boats, nets, traps, wharves, freezers, etc., engaged in the primary operations of catching and landing the fish during 1917 was \$26,560,872 (table 4). This compares with a total of \$22,639,001 in the previous year.

EMPLOYEES.—The number of employees engaged in these operations in 1917 was 77,140 (table 5).

## (2) Fish Canning and Preserving Establishments:

CAPITAL.—The capital represented in fish canning and preserving establishments, including canneries, fish and smoke houses, etc., was \$20,366,701, made up of land and buildings to the value of \$6,990,969, machinery and tools, \$3,401,935, stocks in hand \$6,459,664, and working capital, \$3,514,133 (table 6).

To the above total might be added \$215,552, the value of some 9,492 small fish and smoke houses.

EMPLOYEES AND WAGES.—In the case of employees of fish preparing establishments information was collected regarding the number, male and female, 16 years of age and over, and under 16 years of age, the number of employees by months, classification of employees according to weekly wages, total salaries and wages paid during the year, and the total number of different individuals employed during the year. In British Columbia the majority of the labourers in cannery factories are employed under the contract system, the contractor engaging and paying his own help, and being himself paid by the factory according to the quantity of fish packed.

The return for 1917 showed that the employees in fish canning and preserving establishments during 1917 numbered 12,494 wage-earners, 8,247 male and 4,247 female. The total wages bill was \$2,808,277, to which \$668,987 must be added on account of salaries. These figures do not include contract labour, which was employed to the number of 3,431 male, and 1,207 female, receiving wages to the amount of \$732,587 (table 7). There were also 214 persons (155 male and 59 female) employed as outside pieceworkers, who were paid the sum of \$7,179.

There were also 214 outside piece-workers, who received \$7,179.

It may be added to the above that returns were received from 395 establishments as to the total number of different individuals on the pay-roll in the course of the year, the total shown being 10,477. These establishments reported 10,102 as on the pay-roll on the nearest representative day to December 15.

**TIME IN OPERATION AND HOURS WORKED.**—The average number of hours worked per day in fish preparing establishments was nine, and the average number per week fifty-seven. On an average, each of the establishments worked full time 111 days, worked part time ten days, and was idle 183 working days. The statistics are given in detail in the main table: (Table No. II—Part (2) (c)).

**NUMBER OF EMPLOYEES BY MONTHS.**—The number of employees, by months, is shown in the following table:—

8. Employees in Fish Canning and Preserving Establishments.—Number on Pay Roll on the 15th of each month.

Month	Lobster Canneries		Salmon Canneries		Clam, Sardine, and other Canneries		Fish and smoke Houses		Total employees

## SESSIONAL PAPER No. 17b

**HOUSING OF EMPLOYEES.**—Some 325 establishments were reported as providing housing accommodation for their employees, the total number of houses provided in this way being 1,175, containing an average of four rooms, and valued at \$451,455, or an average of \$384 each. (*See table, page 86.*)

**FUEL CONSUMPTION.**—The total value of fuel used in fish preparing establishments was \$379,339, which is an average of \$387 per establishment. Bituminous coal stood first on the list with a value of \$171,254, gasoline second with \$101,924, and wood third with \$67,993. (*See table, pages 86-87.*)

**POWER EMPLOYED.**—Gasoline engines take first place under this heading as regards number, with a total of 669, employing 4,026 horse-power. Steam engines come next with 251, and horse-power of 3,895. There were 48 water wheels, representing 1,159 horse-power; and eight electric motors with 64 horse-power. There were also, under the head of rented power, 33 electric motors with 516 horse-power. (*See table, pages 88-89.*)

**MISCELLANEOUS EXPENSES.**—These comprise rent of offices, works, and machinery; rent of power; insurance; taxes; royalties; advertising; travelling; ordinary repairs to buildings and machinery; and other sundry expenses. The total amount expended under the heading was \$2,214,625.

### Summary of Capital equipment and employees in Fishing Industry as a whole.

The total amount of capital represented in the above statistics for the industry as a whole, including primary operations and manufactures founded thereon, was \$47,143,125. The capital return for the preceding year was \$28,728,962, but this did not include the items of working capital and stocks on hand, which were collected for the first time in 1917 and which amounted to \$3,514,133 and \$6,459,664, respectively. Moreover, the method of collecting a return from each fish-producing establishment, which was adopted for the first time in 1917, was thought to have had the effect of increasing somewhat the total capitalization as previously estimated for land, buildings, and machinery of various kinds. Reckoned on the same basis as employed in the previous year the total capital investment would be about \$33,000,000.

The total number of persons engaged in the fishing industry as a whole in 1917 was 95,122.

### Review by Provinces.

In the table on pages xvii to xviii (table 20) will be found a detailed statement of the fish marketed in each of the provinces during 1917. The table will enable comparison to be made as between the provinces of the production of each kind of fish. In addition to this analysis a series of tables is presented in the following (tables, 10-19) in which the statistics for the more important varieties over the past five years are given for each province. To this is added a table (table 21) showing by provinces the number and value of vessels, tugs, carrying smacks and boats, freezers and ice houses, canneries (working capital included) etc., etc., and the number of men employed in connection therewith.

## Imports and Exports.

In table IV (pages 103-104) will be found a brief statement of the imports and exports of fish and fish products during 1917. It will be seen that the total value of imports was \$2,833,392, and the total value of exports \$28,323,877.

## Fishing Bounty.

Under the authority of "An Act to encourage the development of the Sea Fisheries and the building of Fishing Vessels," the sum of \$160,000 is paid annually to fishermen of the eastern Maritime Provinces. The bounty is distributed under regulations made from time to time by the Governor in Council.

For the year 1917, payment was made on the following basis:—

To owners of vessels entitled to receive bounty, \$1 per registered ton; payment to the owner of any one vessel not to exceed \$80.

To vessel fishermen entitled to receive bounty, \$6.30 each.

## CENSUS OF INDUSTRY

9 GEORGE V, A. 1919

To owners of boats measuring not less than 13 feet keel, \$1 per boat.

To boat fishermen, entitled to receive bounty, \$3.85 each.

There were 14,532 bounty claims received, and 14,516 paid. In the preceding year, 13,604 claims were received, and 13,593 paid.

The total amount paid was \$159,892.25 allocated as follows:—

To 812 vessels and their crews \$52,748.20.

To 13,704 boats and their crews \$107,144.90.

The following table shows in detail the payment of the bounty by counties for the year 1917:—

22. Detailed Statement of Fishing Bounties paid to Vessels and Boats for the year 1917.

### Historical Review.

The three tables beginning on page xxi (tables 23, 24, and 25) will afford a review of the fishing industry of Canada for the past several years. In the case of production, returns are given by provinces year by year back to 1870. In the case of the number and value of vessels, boats, etc., the review extends to 1880, and in the case of the number of employees to 1895.

<sup>1</sup>Includes 744 men fishing, not in boats.

## TABLES.

- I. FISH CAUGHT AND MARKETED—QUANTITIES AND VALUES.
- II. AGENCIES OF PRODUCTION—CAPITAL EQUIPMENT,  
EMPLOYEES, Etc.

  - Part [1.] In PRIMARY OPERATIONS.
  - Part [2.] IN FISH CANNING AND PRESERVING ESTABLISH-  
MENTS.
    - [a] Capital and employees.
    - [b] Employees on wages by months.
    - [c] Time in operation and hours worked.
    - [d] Classification of wage-earners according to weekly wages.
    - [e] Housing of employees.
    - [f] Fuel used.
    - [g] Power employed.
    - [h] Miscellaneous expenses.

- III. SPECIAL TABLES WITH REGARD TO LOBSTER AND SALMON  
FISHERIES.
  - [1] Lobster Fisheries.
  - [2] The Salmon Pack, 1908-1917.
- IV. IMPORTS AND EXPORTS OF FISH AND FISH PRODUCTS.

## I. Fish Caught and Marketed, 1917.

## SESSIONAL PAPER No. 17b

## IV. Imports and Exports of Fish and Fish Products.

STATEMENT showing the Quantities and Values of Fish and Fish Products Imported into Canada for Consumption during the year ended December 31, 1917.

Classification	Calendar Year, 1917	
	Quantity	Value
Fish and Fish Products—		\$
Fish—		
Ambergris.....	—	560
Anchovies, sardines, sprats, and other fish, packed in oil or otherwise, in tin boxes weighing—		
Over 20 but not over 36 ounces each.....	Box 11,742	3,198
Over 12 but not over 20 ounces each.....	" 54,303	8,186
Over 8 but not over 12 ounces each.....	" 170,011	15,380
8 ounces or less.....	" 2,260,420	208,026
Bait, fish, clam or other, fresh or salted.....	—	432
Cod, haddock, ling and pollock—		
Dry salted or smoked.....	Lb. 5,892,517	392,142
Fresh.....	" 1,077,920	40,786
Pickled.....	" 920	48
Halibut, fresh.....	" 694,968	64,796
" pickled.....	" 220	28
Herrings, fresh or frozen.....	" 46,886	843
" pickled or salted.....	" 11,769,605	397,417
" smoked.....	" 336,218	19,600
Live fish or fish eggs for propagating purposes.....	—	3,250
Lobsters, canned—	Lb. 109,078	40,378
" fresh.....	—	2,780
Mackerel, fresh.....	" 9,891	1,104
" pickled.....	" 4,048	813
Oysters, canned in cans not over one pint.....	Can 321,854	30,603
Oysters, canned in cans over one pint but not over one quart.....	" 3,681	661
Oysters, canned in cans exceeding one quart.....	Qt. 1,930	707
Oysters, fresh, in shell.....	Brl. 2,799	15,985
" shelled in bulk.....	Gal. 153,362	242,858
" prepared or preserved, n.o.p.....	Lb. 18,477	6,549
Salmon, canned, prepared or preserved, n.o.p.....	—	134,311
Salmon, fresh—	" 595,169	46,329
" pickled or salted.....	" 1,125,399	82,251
" smoked.....	" 27,975	5,942
Sea fish, other, fresh.....	" 176,089	12,628
" " pickled.....	" 1,267,924	68,357
" " preserved.....	" 27,572	4,154
Seed and breeding oysters imported for the purpose of being planted in Canadian waters.....	—	4,515
Squid.....	—	37,362
Other fish, fresh, not in barrels or half-barrels.....	Lb. 245,143	20,822
Other fish, fresh or dried, in barrels or half-barrels.....	" 871,413	95,396
Other fish, pickled, not in barrels or half-barrels.....	" 99,947	11,059
Other fish, pickled or salted in barrels.....	" 157,475	14,689
Other fish, preserved in oil.....	—	25,999
" prepared or preserved, n.o.p.....	—	117,202
Other fish smoked or boneless.....	Lb. 34,767	6,089
Fish offal or refuse.....	—	36,052
For skins, undressed, the produce of marine animals.....	—	2,928
Oils—		
Cod liver oil.....	Gal. 3,149	7,435
Cod oil, n.o.p.....	" 377,399	334,596
Seal oil.....	" 76,357	71,933
Whale and spermaceeti oil.....	" 11,612	10,267
Other fish oil.....	" 109,884	110,604
Pearl, mother of, unmanufactured.....	—	21,217
Tortoise and other shells, unmanufactured.....	—	18,613
Turtles.....	—	2,859
Whalebone, unmanufactured.....	Lb. 270	230
Other fish and fish products.....	—	32,713
Total fish and fish products.....	—	2,833,392

## RECENSEMENT INDUSTRIEL, 1917

## IIIe PARTIE—PÊCHERIES

## Préface

Les statistiques contenues dans le présent volume et qui concernent les opérations de pêche de l'année 1917, ont été recueillies dans les premiers mois de 1918.

Ce volume est publié en vertu d'une entente établissant la coopération en matière de statistique, intervenue entre le Bureau Fédéral de la Statistique et les différents services gouvernementaux ayant juridiction sur les pêcheries canadiennes. Ces services comprennent: la Direction des Pêcheries du ministère du Service Naval, qui exerce sa juridiction sur les pêcheries maritimes, ainsi que sur les pêcheries fluviales et lacustres du Manitoba, de la Saskatchewan et de l'Alberta; et les Divisions des Pêcheries des provinces d'Ontario et de Québec, qui régissent les pêcheries en eau douce de leurs provinces respectives. Les pêcheries intérieures des provinces maritimes n'ont que fort peu d'importance au point de vue commercial; leurs statistiques sont colligées par le personnel de la Direction des Pêcheries du Dominion. Il en est de même pour celles de la Colombie Britannique. Cette dernière province possède une Division des Pêcheries, mais cet organisme ne s'occupe pas de statistique pour son propre compte.

En vertu de l'arrangement dont il est parlé plus haut, les statistiques du poisson pêché et des produits offerts en vente à l'état frais ou après une préparation sommaire, sont recueillies par les fonctionnaires locaux des services des pêcheries, vérifiées et condensées au ministère du Service Naval, puis compilées au Bureau Fédéral de la Statistique. En ce qui concerne le poisson industriellement préparé et ses sous-produits, des formules similaires à celles en usage dans le recensement des autres branches de production sont envoyées directement par ce Bureau aux poissonneries, établissements de salaison, de conserves de poisson, etc., les fonctionnaires des services des pêcheries s'assurant que ces formules sont consciencieusement remplies et promptement retournées.

Les statistiques sont présentées sous forme de tableaux, répartis en deux séries principales, l'une étant consacrée au produit et l'autre aux moyens de production: elles sont accompagnées d'une introduction et d'un résumé.

Les chiffres de la production, contenus dans ce rapport, s'appliquent à l'année civile 1917, tandis que les précédents rapports couvraient l'exercice financier se terminant le 31 mars. Par conséquent, toute comparaison que l'on tenterait de faire entre 1917 et les années précédentes, serait inexacte.

R. H. COATS,  
*Statisticien du Dominion.*

9 GEORGE V, A. 1919

### Notice sur les Pêcheries Canadiennes.

On peut dire sans exagération que le Canada possède les pêcheries les plus vastes du monde, celles de la Norvège et des Iles Britanniques pouvant, seules, leur disputer la suprématie au point de vue de l'abondance, de la variété et de l'excellence de leurs produits. La richesse des eaux canadiennes est démontrée par le fait que la totalité du saumon, du homard, du hareng, du maquereau et de la sardine, la plus grande partie de l'églefin et une portion considérable de la morue, de la merluche et du merlan que l'on y prend, sont pêchés dans une zone qui ne s'étend pas à plus de dix ou douze milles du rivage.

Les rives des provinces de l'Atlantique, depuis Grand Manan jusqu'au Labrador, mesurent plus de 5,000 milles, à l'exclusion des anses et échancrures qui les dentellent, tandis que les étendues maritimes qu'elles embrassent comprennent: la Baie de Fundy, avec ses 8,000 milles carrés; l'estuaire du St-Laurent, au moins dix fois plus grand, et d'autres eaux océaniques représentant ensemble plus de 200,000 milles carrés, c'est-à-dire plus des quatre cinquièmes des pêcheries du nord de l'Atlantique. De plus, l'on compte 15,000 milles carrés d'eaux intérieures, sous le contrôle absolu du Dominion.

Mais ces vastes étendues ne représentent qu'une partie des eaux canadiennes. La Baie d'Hudson, dont les côtes s'étendent sur une longueur de 6,000 milles, est plus grande que la Méditerranée. Sur le Pacifique, le littoral canadien mesure plus de 7,000 milles; ses baies et ses fjords innombrables offrent aux pêcheurs une multitude d'abris très sûrs. Enfin, disséminés sur tout le territoire, s'égrène une série de lacs, couvrant ensemble une superficie de 220,000 milles carrés, soit plus de la moitié des eaux douces du globe; dans cette étendue, la part du Canada dans les grands lacs du bassin du St-Laurent figure pour 72,700 milles carrés.

L'abondance et l'excellence du poisson sont un facteur de tout premier ordre. Pendant longtemps, la morue et le saumon se sont disputés le premier rang mais, dans les dernières années, le homard tant par son volume que par sa cherté, a quelquefois relégué la morue au troisième rang.

On peut diviser la pêche dans l'Atlantique en deux catégories distinctes: la pêche hauturière (ou de haute mer) et la pêche côtière. La pêche hauturière est pratiquée par des navires de 40 à 100 tonneaux, montés par des équipages de douze à vingt hommes, qui se servent de chaluts. Comme boëtte, on emploie principalement le hareng, l'encornet et le capelan et l'on prend surtout de la morue, de l'églefin, de la merluche, du merlan et du flétan. Quant à la pêche côtière, elle se fait au moyen de petites embarcations, généralement automotrices, que montent deux ou trois hommes et dans de petites barques, ayant de quatre à sept hommes d'équipage. Ces pêcheurs en bateau font usage de rets à mailles, de chaluts et de lignes à main, tandis que ceux qui pêchent sur le rivage se servent de pièges ou casiers, de seines et de nasses. Les poissons comestibles que l'on prend sur la côte sont: la morue, la merluche, l'églefin, le merlan, le flétan, le hareng, le maquereau, le gasparot, l'aloise, l'éperlan, le carrelet et la sardine.

Les plus importantes pêcheries de homard de l'univers se trouvent tout le long du littoral oriental du Canada, cependant que d'excellents bancs d'huîtres existent en maintes parties de l'estuaire du St-Laurent, notamment à proximité de l'île du Prince-Édouard.

La pêche du saumon prédomine sur le littoral du Pacifique, quoique de grands navires, bien équipés, se livrent à une fructueuse pêche du flétan, dans les eaux septentrionales de la Colombie Britannique, la méthode usitée étant la ligne de fond, que l'on tend et que l'on relève au moyen de doris, tout comme cela se pratique dans les pêcheries en eaux profondes de l'Atlantique. Le hareng est très abondant sur la côte du Pacifique et fournit une inépuisable provision de boëtte pour la pêche du flétan. Dans les lacs intérieurs, on pêche à l'aide de rets à mailles, d'éperviers, de seines et de lignes ordinaires.

DOC. PARLEMENTAIRE No 17b

## RECENSEMENT INDUSTRIEL, 1917—PÊCHERIES

## Introduction et Résumé.

La valeur totale des produits des pêcheries canadiennes, au cours de l'année 1917, atteignit \$52,312,044, au lieu de \$39,208,378 en 1916 et \$35,860,708 en 1915. Ces chiffres représentent la valeur de ces produits mis sur le marché soit frais, soit préparés sommairement ou industriellement.

On trouvera dans le tableau suivant les quantités et valeurs concernant les principaux poissons, au point de vue commercial (à partir de \$100,000) durant les cinq dernières années, avec indication dans la dernière colonne de l'augmentation ou de la diminution en 1917, comparativement à 1916.

### La saison de 1917.

Dans l'ensemble, les opérations de pêche, en 1917, ont été fructueuses et rémunératrices.

Au printemps, les conditions atmosphériques sur la côte de l'Atlantique furent plutôt défavorables, ce qui eut pour effet de restreindre la production de certaines des principales espèces de poisson, notamment le hareng et le homard, restée inférieure à celle de l'année précédente. Toutefois, la diminution de la quantité a été compensée par la hausse de leur valeur. Mais le mauvais temps ne s'est pas fait sentir dans toutes les régions côtières; tandis qu'il nuisait considérablement à la pêche à la morue dans le nord du Nouveau-Brunswick et en Gaspésie, on prenait une beaucoup plus grande quantité de morue et d'églefin que de coutume en Nouvelle-Ecosse. Tout le long de la rive sud de la Nouvelle-Ecosse, le poisson fut fort abondant, et son prix élevé induisit les pêcheurs à déployer plus de zèle et d'activité. L'usage de filets fixes s'étant répandu d'une manière plus générale à Antigonish, N.-E., il a été pris une beaucoup plus grande quantité d'églefin.

La production totale du saumon en Colombie Britannique durant 1917 a excédé celle de l'année précédente, augmentation qui correspond à une plus grande demande des variétés les moins chères de ce poisson. A intervalles réguliers, espacés de quatre ans, le saumon à dos bleu (*sockeye*) du fleuve Fraser se montre habituellement en très grand nombre; 1917 aurait dû être une année d'abondance, mais cet espoir fut déçu. Ceci prouve la justesse des craintes déjà exprimées, à savoir: que les glissements de rocs qui se produisirent en 1913 à Hell's Gate constituent un obstacle à la montée du poisson vers les frayères. Les prix élevés du poisson dans l'Alberta et la Saskatchewan ont induit un plus grand nombre de personnes à se livrer à la pêche et augmenté considérablement la quantité de poisson pêché.

L'augmentation de \$13,103,666 constatée dans la valeur de la production de toutes espèces de poisson pour l'ensemble du Canada fut principalement constituée par le saumon de la Colombie Britannique, à concurrence de plus de \$6,500,000; le poisson de l'Atlantique: morue, églefin, merlan, merluche, sardine et maquereau, y a contribué pour plus de \$4,300,000.

## DOC. PARLEMENTAIRE No 17b

Les embarcations à gazoline sont de plus en plus utilisées par les pêcheurs, sur toutes les parties de la côte, pour se transporter plus rapidement sur les lieux de pêche. Durant 1917, 14,823 de ces canots étaient en usage, au lieu de 12,828 l'année précédente.

## Résumé de la production en 1917.

Le tableau que l'on trouvera sur les pages suivantes est un état de la totalité du poisson pêché et mis sur le marché en 1917, dans tout le Canada. Nous donnons, pour chaque espèce de poisson, le volume de la prise et sa valeur au débarquement, en établissant une distinction entre les pêcheries maritimes et les pêcheries intérieures. On y verra aussi sous quelle forme chaque espèce a été offerte à la consommation et la valeur spéciale du poisson soit frais, soit sous chacune de ses diverses préparations.

## Moyens de production: Capital, Agrès, Personnel, etc.

## (1) Pêche proprement dite.

**CAPITAL.**—Le capital représenté par la valeur des navires, barques, filets, pièges, quais, établissements frigorifiques, etc., engagés dans l'industrie de la pêche durant 1917, atteignait \$28,560,872 (tableau 4); l'année précédente, ce chiffre ne s'élevait qu'à \$22,639,001.

**PERSONNEL.**—En 1917, il y avait 77,140 personnes occupées à ces opérations (tableau 5).

## (2) Etablissements de préparation et de mise en boîte du poisson.

**CAPITAL.**—Le capital représenté par la valeur des établissements se livrant à l'industrie poissonnière, c'est-à-dire les poissonneries, les fabriques de conserves de poisson, de salaison, de fumage, etc., s'élève à \$20,366,701, soit \$6,990,969 pour la valeur des terrains et bâtiments, \$3,401,935 pour la machinerie et l'outillage, \$6,459,664 pour les stocks en main et \$3,514,133 de fonds de roulement. (tableau 6).

A ces chiffres, l'on doit ajouter \$215,552, valeur de 9,492 petites poissonneries et établissements de fumage.

**EMPLOYES ET SALAIRES.**—En ce qui concerne le personnel des établissements de préparation du poisson, les statistiques ont porté sur le nombre, le sexe et l'âge des ouvriers (une distinction étant établie entre ceux ayant plus de 16 ans et ceux de 16 ans et au-dessous), le nombre d'ouvriers par mois, leur classification en différentes catégories, selon leur salaire hebdomadaire, les salaires et appoin-tements payés durant l'année, et enfin le nombre total des différentes personnes ayant figuré toute l'année sur les listes de paie.

En Colombie Britannique, la majorité des ouvriers des fabriques de conserves de poisson sont placés sous un régime spécial, l'entrepreneur engageant et payant directement sa main-d'œuvre et étant lui-même payé par le fabricant selon la quantité de poisson mis en boîte.

## RECENSEMENT INDUSTRIEL

9 GEORGE V, A. 1919

Les rapports pour l'année 1917 ont établi qu'au cours de cette année, l'industrie poissonnière a employé 12,494 ouvriers, dont 8,247 hommes et 4,247 femmes. Leurs salaires se sont montés à \$2,808,277, outre \$688,987 d'appointements et traitements. Ces chiffres ne comprennent pas le travail exécuté par contrat, qui a donné de l'ouvrage à 3,431 hommes et 1,207 femmes, dont la rémunération a atteint \$732,587 (tableau 7). Enfin, il y eut aussi 214 personnes (155 hommes et 59 femmes), travaillant au dehors et payées aux pièces qui, toutes ensembles, ont gagné \$7,179.

**4. Matériel et agrès de pêche.** Valeur des vaisseaux et barques de pêche, filets, pièges, quais, etc., employés dans les pêcheries canadiennes en 1917.

Plus 214 ouvriers travaillant au dehors, payés à la tâche, ayant reçu \$7,179.

L'on doit ajouter que 395 établissements ont fourni des indications quant au nombre total de leurs ouvriers et employés ayant figuré toute l'année sur leurs listes de paie, et qui s'élève à 10,477 personnes. Les mêmes établissements nous apprennent qu'au 15 décembre (ou au jour de paie le plus rapproché de cette date) leurs listes de paie portaient 10,102 noms.

DURÉE DES OPÉRATIONS ET HEURES DE TRAVAIL.—Les établissements affectés à la préparation du poisson ont travaillé en moyenne neuf heures par jour et cinquante-sept heures par semaine. En moyenne, chacun de ces établissements a travaillé pendant 111 jours entiers, plus une partie de la journée pendant dix jours, et est resté fermé durant 183 jours ouvrables. On trouvera ces statistiques détaillées dans le tableau principal (tableau n° 11, partie 2).

## NOMBRE D'EMPLOIÉS, POUR CHAQUE MOIS.

CLASSIFICATION DES OUVRIERS, SELON LEUR SALAIRE HEBDOMADAIRE.—Le tableau suivant contient une classification des ouvriers de l'industrie poissonnière, selon leur salaire hebdomadaire. On y verra que le plus grand nombre d'entre eux appartient à la catégorie des salaires entre \$12 et \$15 par semaine, et en second lieu à celle de \$10 à \$12.

## DOC. PARLEMENTAIRE No 17b

**LOGEMENT DU PERSONNEL**—325 établissements pourvoient au logement de leurs employés au moyen de 1,175 maisons, chaque logement comportant une moyenne de quatre pièces. Ces maisons sont évaluées ensemble à \$451,455, soit en moyenne \$384 chacune (voir tableau, page 86).

**CONSOMMATION DE COMBUSTIBLE**—Les usines et fabriques affectées à la manutention du poisson ont consommé pour \$379,339 de combustible, soit une moyenne de \$387 par établissement. La houille bitumineuse tient la tête de la liste avec une valeur de \$171,254; la gazoline arrive en second lieu avec \$101,924 et le bois vient ensuite avec \$67,993 (voir tableau, pages 86-87).

**FORCE MOTRICE EMPLOYÉE**—Les moteurs à gazoline prennent la première place quant au nombre, avec un total de 669, développant 4,026 chevaux-vapeur. Les machines à vapeur occupent le second rang, au nombre de 251 avec une force de 3,895 chevaux-vapeur. On compte 48 turbines, donnant 1,159 chevaux-vapeur et huit moteurs électriques produisant 64 chevaux-vapeur. Sous la rubrique «force motrice louée», on trouve aussi 33 moteurs électriques, représentant 516 chevaux-vapeur (voir tableau, pages 88-89).

**DÉPENSES DIVERSES**.—Elles comprennent le loyer des bureaux; des ateliers de la machinerie; le prix de la force motrice; l'assurance; les taxes; les droits régaliens; la publicité; les voyages; les réparations ordinaires aux bâtiments et machines et autres menues dépenses. Elles se totalisent par \$2,214,625.

### Résumé du capital d'exploitation et du personnel, pour l'ensemble de l'industrie de la pêche.

En additionnant la valeur du matériel d'exploitation affecté aux opérations de pêche proprement dites avec la valeur des usines, fabriques et autres établissements se livrant à la manutention du poisson, on constate que le capital ainsi représenté atteint \$47,143,125. Les rapports de l'an dernier évaluaient ce capital à \$28,728,962, mais ce chiffre ne comprenait ni les fonds de roulement ni les stocks en main, dont on s'est occupé pour la première fois en 1917 et qui s'élèvent à \$3,514,133 et \$6,459,664 respectivement. En outre, le système inauguré en 1917, d'obtenir un rapport distinct pour chaque établissement dépendant de l'industrie poissonnière est supposé avoir eu pour effet d'augmenter quelque peu la valeur totale attribuée précédemment aux terrains, bâtiments et machineries de toutes sortes. En adoptant la même base que l'année précédente, le capital d'exploitation s'éleverait à environ \$33,000,000.

L'industrie de la pêche et ses ramifications diverses occupaient en 1917, 95,122 personnes.

### Répartition par provinces.

Le tableau 20, qui se trouve sur les pages xvii et xviii contient un état détaillé du poisson mis en vente dans chacune des provinces durant 1917. Ce tableau permet d'établir des comparaisons entre les provinces quant à la production de chaque espèce de poisson. Outre cette analyse, les tableaux 10 à 19 fournissent les chiffres concernant les principales espèces, pour les cinq dernières années et par chaque province. Enfin le tableau 21 indique, pour chaque province, le nombre et la valeur des navires, remorqueurs, barques et semaques, congélateurs, glacières, fabriques de conserves de poisson (y compris leur capital d'exploitation), etc., et le nombre de mains employées par l'industrie poissonnière.

<sup>4</sup>Pièges à crabe et à saumon, en Colombie Britannique.

<sup>5</sup>Y compris 451 sonnettes à pilotis et treuils à saumon.

<sup>6</sup>Y compris 4 postes de baleiniers, évalués à \$170,855, 2 établissements de préparation des crabes, évalués à \$1,200, 3 établissements de salaison, évalués à \$12,000 et un pâté à huîtres, évalué à \$15,450.

### Importations et Exportations.

Dans le tableau IV (pages 103-104), on trouvera un état indiquant brièvement les importations et les exportations de poisson et des produits du poisson au cours de 1917. L'on y verra que la valeur totale de ces importations s'élevait à \$2,833,392, tandis que celle des exportations atteignait \$28,323,877.

### Primes de pêche.

En vertu d'une «Loi pour encourager le développement des pêcheries maritimes et la construction de navires de pêche», il est payé annuellement une somme de \$160,000 aux pêcheurs des provinces maritimes de l'est. Ces primes sont distribuées sur les bases fixées de temps à autre par arrêtés du conseil des ministres.

## RECENSEMENT INDUSTRIEL

9 GEORGE V, A. 1919

Pour l'année 1917, la distribution fut faite sur les bases suivantes:

Aux propriétaires de navires ayant droit à la prime, \$1 par tonneau enregistré sans que la prime puisse excéder \$80.

Aux pêcheurs sur navires qualifiés pour la prime, \$6.30 chacun.

Aux propriétaires de barques mesurant au moins 13 pieds de quille, \$1 par barque.

Aux pêcheurs sur ces barques qualifiés pour la prime, \$3.85 chacun.

Il y eut 14,532 demandes de primes, dont 14,516 furent accueillies. L'année précédente, l'on en avait reçu 13,604 et admis 13,593.

Le total des primes versées atteignit \$159,892.25, ainsi réparties:

A 812 navires et leurs équipages, \$52,748.20.

A 13,704 barques et leurs équipages, \$107,144.05. Dans le tableau suivant l'on donne le détail des primes payées, dans chaque comté, pour l'année 1917.

22. Etat détaillé des primes payées aux navires et barques de pêche pour l'année 1917.

Provinces et comtés.	Nombre de navires	Tonnage	Moyenne du tonnage	Nombre d'hommes	Sommes payées	Nombre de barques	Nombre d'hommes	Sommes payées	Total des primes payées aux navires et barques de pêche en 1917.

\*Comprend 744 hommes hors des bateaux.

## GLOSSARY—VOCABULAIRE.

NAMES OF FISH—NOM DES POISSONS.

English	Français
Albacore	Bonite
Alewives	Gaspayot
Bass	Bar ou achigan
Belugas	Beluga
Black cod	Cahillaud
Brill	Barbue
Caplin	Capelan
Carp	Carpe
Catfish	Barbotte
Caviar	Caviar
Clams and quahaugs	Moules et mactres
Cod	Morue
Dulse, crab, cockles, etc.	Algues, crabes, bucardes, etc.
Eels	Anguilles
Fertilizer	Engrais
Fish offal	Étrailles de poisson
Fish oil	Huile de poisson
Flounders	Carrélet
Fur seals	Phoque à fourrure
Gill bone	Os de branchies
Glue	Colle
Goldeyes	Silure
Grey fish	Roussette ou poisson gris
Haddock	Eglefin
Hair seals	Phoque commun
Hake and cusk	Merluche et lingue
Halibut	Filtan
Herring	Hareng
Lobsters	Homard
Mackerel	Maquereau
Maskinongé	Maskinongé
Mixed fish	Poissons divers
Mullots	Mulet
Octopus	Poulpe
Oulachons	Oulachon
Oysters	Hultre
Perch	Percho
Pickeral	Doré
Pike	Brochet
Pilchards	Sprat
Pollock	Merlan
Porpoises	Marsouin
Rock cod	Petite morue
Salmon	Saumon
Salmon roe	(Œufs de saumon)
Sardines	Sardine
Scallops	Pétencle
Seal oil	Huile de phoque
Sea weed	Varech
Shad	Alose
Silver Hake	Merluche argentée
Skate	Raié
Smelts	Eperlan
Soles	Sole
Squid	Encornet
Sturgeon	Esturgeon
Sturgeon bladders	Vessies d'esturgeon
Swordfish	Espadon
Tomalley	Foie de homard
Tom cod	Tacaud
Tongues and sounds	Langues et noues
Trout	Truite
Tullibee	Tullipi
Whales	Baleine
Whale bone and meal	Fanon et engrais de baleine
Whale oil	Huile de baleine
Whitefish	Poisson blanc ou ablette
Whiting	Colin
Witches	Epinoche

## GLOSSARY—VOCABULAIRE.

## GENERAL TERMS—EXPRESSIONS USUELLES

English	Français
Advertising.	Publicité
Agencies of Production—Part 1 In Primary Operations.	Moyens de production—1er partie: pêche proprement dite
Agencies of Production—Part 2: Fish Canning and Preserving.	Moyens de production—2ème partie:—préparation et mise en boîte du poisson
All other (Provincial, municipal, etc.).	Toutes autres (provinciales, municipales, etc.)
All other sundry expenses.	Toutes autres dépenses diverses
Amblergris.	Ambre gris
Anchovies.	Anchois
And over.	Et plus
Anthracite.	Anthracite
Average number employed during year.	Nombre moyen employé durant l'année
Average number of hours worked.	Nombre moyen d'heures de travail
Ibb.	Brl ou baril
Bituminous.	Bitumineux
Boats.	Bateaux ou barques
But under.	Mais au-dessous
Canned.	En boîte
Capital and Employees.	Capital et employés
Carrying Smacks.	Bateaux de transport de pêche ou semaques
Carrying Smacks and scows.	Bateaux de transport de pêche et allèges ou semaques
Cases.	Caisse
Cash accounts and bills receivable.	En caisse, comptes et billets à recevoir
Caught and landed.	Pris et débarqué ou pêché
Clam and other canneries.	Etablissements à moules et mollusques
Classification of Wage-earners according to weekly wages as at date of December 15 or nearest pay-day.	Classification des ouvriers, selon leur salaire hebdomadaire, au 15 décembre, ou au jour de paie le plus rapproché
Clerks, stenographers and salesmen, etc.	Commissaires, sténographes, vendeurs, etc
Coal.	Charbon
Coke.	Coke
Comprises.	Comprend
Contract labour.	Travail à l'entreprise
Counties.	Comtés
Crab establishments.	Etablissements à crabes
Crab traps.	Pièges à crabes
Cwt.	Qtx
Days in operation.	Jours en opération
Dip or roll nets.	Carrelets sur dévidoirs
Districts.	Districts
Dried.	Séché
Dust or slack.	Poussier ou menu
Eel traps.	Pièges à anguille
Electric motors.	Moteurs électriques
Employees on salaries.	Employés recevant un traitement ou des appoinements
Employees on wages.	Ouvriers salariés
Employees on wages by months.	Ouvriers au mois
Establishments.	Etablissements
Establishments reporting.	Etablissement faisant rapport
Female.	Femme
Fertilizer.	Engrais
Fish caught and marketed.	Poisson, pêché et mis en vente
Fish wheels.	Pièges tournants
Fishing gear.	Agrès de pêche
Fishing piers and wharves.	Jetées et quais de pêche
Freezers and ice houses.	Etablissements frigorifiques et glacières
Fresh and frozen.	Frais et congelé
Fresh or salted.	Frais ou salé
Fuel used.	Combustible employé
Gal.	Gallon ou gall.
Gas.	Gaz
Gazoline.	Gazoline
Gazoline boats—Row and sail.	Bateaux à gazoline, à rames et à voiles
Gill nets, seines, trap and smelt nets.	Filets à mailles, seines, filets de pièges et à éperlan
Green-salted.—	Salé vert
Hand lines.	Lignes à main
Homo Consumption.	Consommation domestique
Hoop nets.	Seines à cercle
Houses.	Maisons
Housing of employees.	Logement des employés
H. P. according to manufacturers rating.	C. V. selon le classement du fabricant
H. P. actually employed.	C. V. effectivement employé
Idle.	Oisif—arrêté
Imports and exports of fish and fish products.	Importations et exportations de poisson et des produits du poisson
In addition to quantities given in table the following equipment was used by anglers.	Outre les quantités données dans le tableau, les agrès suivants ont été employés par les pêcheurs à la ligne
In addition to these numbers there were also in British Columbia 4,638 workers under the contract system, with regard to which we have no details of employment.	Outre ces nombres il y avait aussi dans la Colombie Britannique 4,638 ouvriers sous le système de travail à l'entreprise à l'égard desquels nous manquons de détails
Includes 451 Pile drivers and seine reels valued at \$33,350....	Ceci comprend 451 sonnettes à pilotis, et dévidoirs à filets, évalués à \$33,350.
Inland Fisheries.	Pêcheries intérieures

## GLOSSARY—VOCABULAIRE.

GENERAL TERMS—continued—EXPRESSIONS USUELLES—suite.

English	Français
Insurance.....	Assurance
Internal Revenue, War, etc.....	Droits d'accise, taxes de guerre, etc.
