

FISHERIES, 1921**Preface**

This Report is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the Government branches having jurisdiction with regard to fisheries throughout Canada. These branches comprise: the Dominion Fisheries Branch of the Department of Marine and Fisheries, which exercises jurisdiction over the sea fisheries and over the inland fisheries of Manitoba, Saskatchewan, Alberta and Yukon Territory, and the Fisheries Branches of Ontario and Quebec, which have jurisdiction over the inland fisheries of their respective provinces. The inland fisheries of the Maritime Provinces are, from a commercial standpoint, comparatively unimportant; but their statistics, as in the case of British Columbia, are collected by the officers of the Dominion Fisheries Branch. The province of British Columbia has a Fisheries Branch, but it does not engage in independent statistical work.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared, are collected by the local officers of the Fisheries Branches, checked in the Department of Marine and Fisheries, and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent by the Bureau to the operators of canneries, fish-curing establishments, etc., the fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the provincial Governments who co-operate in these arrangements.

R. H. COATS,

Dominion Statistician.

DOMINION BUREAU OF STATISTICS,

OTTAWA, August 29, 1922.

Note on the Canadian Fisheries

Canada possesses the most extensive fisheries in the world, and the abundance, quality and variety of their product are unexcelled. The fertility of Canadian waters is indicated by the fact that the entire catch of salmon, lobsters, herring, mackerel, and sardines, nearly all the haddock, and many of the cod, hake, and pollock landed are taken within ten or twelve miles from shore.

The coast line of the Atlantic provinces from Grand Manan to Labrador, not including the lesser bays and indentations, measures over 5,000 miles, whilst the sea areas to which this forms the natural basin embrace: the Bay of Fundy, 8,000 square miles in extent; the gulf of St. Lawrence, fully ten times that size; and other ocean waters aggregating not less than 200,000 square miles, or over four-fifths of the fishing grounds of the North Atlantic. In addition there are 15,000 square miles of inshore waters, entirely controlled by the Dominion. Large as are these areas, they represent only a part of the fishing grounds of Canada. Hudson bay, with a shore 6,000 miles in length, is greater than the Mediterranean; the Pacific coast of the Dominion measures over 7,000 miles long, and is exceptionally well sheltered for fishermen; whilst throughout the interior is a series of lakes which together cover 220,000 square miles, or more than half the fresh water of the Globe, Canada's share of the great lakes of the St. Lawrence basin alone amounting to 34,000 square miles.

Of even greater importance are the abundance and general excellence of the product. The cod and the salmon have long disputed the primacy among these, though in recent years the heavy pack and the high price of lobsters have sometimes sent cod to third place.

The fisheries of the Atlantic coast may be divided into two distinct classes; the deep-sea, and the inshore or coastal fisheries. Deep-sea fishing is pursued in vessels of from 40 to 100 tons, carrying crews of from twelve to twenty men, who fish with hook and line, also in steam vessels of approximately 150 feet in length known as steam trawlers. The bait used is chiefly herring, squid and caplin, and the fish taken are principally cod, haddock, hake, pollock and halibut. The inshore or coastal fishery is carried on in small boats, usually motor driven, with crews of from two to three men, and in a class of small vessels with crews of from four to seven men. The means of capture employed by boat fishermen are gill nets and hooks and lines, both hand-lines and trawls; whilst from the shore are operated trapnets, haul seines and weirs. The commercial food fishes taken inshore are the cod, hake, haddock, pollock, halibut, herring, mackerel, alewife, shad, smelt, flounder, and sardine. The most extensive lobster fishery in the world is carried on along the whole of the eastern shore of Canada, whilst excellent oyster beds exist in many parts of the gulf of the St. Lawrence, notably off Prince Edward Island. The salmon fishery is the predominant one on the Pacific coast, but a very extensive halibut fishery is carried on in the northern waters of British Columbia, in large well-equipped steamers and vessels. The method of capture is by trawling, dories being used for setting and hauling the lines, as in the Atlantic deep-sea fishery. Herring are in great abundance on the Pacific coast, and provide a plentiful supply of bait for the halibut fishery. In the inland lake fisheries, the various means of capture in use are gill nets, pound nets, seines, and hooks and lines.

FISHERIES, 1921

The total value of the product of the Canadian Fisheries for the year 1921 was \$34,931,935, compared with \$49,241,339 for 1920 and \$56,508,479 for 1919. These totals represent the value of the product as marketed, whether fresh, domestically prepared or factory-made.

The following table shows the quantity caught and the value marketed of the chief commercial fishes (those valued at \$100,000 or upwards) for the past five years, with a statement in the final column of the increase or decrease for 1921 compared with 1920.

1. Quantity¹ and Value² of Chief Commercial Fishes, 1917-1921

Review of the Fisheries of 1921

The fishing industry was carried on during the year 1921 under the most trying conditions. The marketing of fish and fish products was found to be difficult, and prices fell to a figure which made it unprofitable for fishermen, in some districts of the Atlantic coast especially, to carry on. Production was thus much less than it otherwise would have been. It is not very surprising, therefore, to find that the marketed value of all fish and fish products for the year under review amounted to \$34,931,935. This total, which is the lowest since 1914, is over \$14,000,000 less than for 1920, and \$25,000,000 less than the peak value which was reached in the year 1918.

On the face of it this big decrease is a very serious one, but there are already abundant signs of improved marketing conditions for the product of the 1922 season, and it may be confidently assumed that the annual value of our fisheries has not only touched rock bottom, but will begin to rise steadily if more slowly than under the artificial conditions brought about by the late war. The total value for 1921 and that for 1920 was contributed to by the various provinces as follows:—

	1920	1921
Nova Scotia.....	\$ 12,742,650	\$ 9,778,623
New Brunswick.....	4,423,745	3,600,726
Prince Edward Island.....	1,708,723	924,529
Quebec.....	2,592,382	1,815,284
Ontario.....	3,336,412	3,065,042
Manitoba.....	1,249,607	1,023,187
Saskatchewan.....	206,472	243,018
Alberta.....	529,078	408,868
British Columbia.....	22,329,161	13,953,670
Yukon.....	33,100	28,988
	<hr/> \$49,241,339	<hr/> \$34,931,935

ATLANTIC FISHERIES

Cod, Hake, Haddock and Pollock.—Owing to low prices and poor marketing conditions the aggregate catch of the four kinds named for 1921 was 2,509,928 cwt., against 2,707,059 cwt. for the preceding year. Hake, pollock and haddock, chiefly the last named, were accountable for the decrease. The landings of the Lunenburg Bank fishing fleet were rather less than in the preceding year. This was due to the fact that fewer vessels were engaged in the fishery. The average catch per vessel was actually greater than for many years.

Mackerel, Herring and Sardines.—Mackerel were generally more abundant than in the preceding year. The quantity landed in Nova Scotia, New Brunswick and Prince Edward Island, in the aggregate was approximately 18,000 cwt. greater, but this increase was almost neutralized by a decrease of 15,000 cwt. in the Quebec catch, mainly at the Magdalen Islands.

Low prices and a poor demand for smoked round herring adversely affected the herring fishery. The total catch amounted to 637,414 cwt., against 935,122 cwt. for the preceding year. All the provinces shared in the decrease.

The sardine catch of the Bay of Fundy was the smallest for many years. As a result of the still disorganized state of the canned sardine trade the packers had difficulty in marketing the packs of the three preceding years. Consequently, prices were low and fishermen found it unremunerative to operate their weirs.

Other Sea Fish.—The halibut catch was greater by 7,600 cwt., while the catch of swordfish was more than double that for the preceding year. Albacore, flounders and tomcod were taken in about the average quantities.

Shell-fish.—The lobster fishery suffered considerably from inactivity as a result of the low prices, which caused a number of fishermen to cease operating. While the total catch was 6,360 cwt. less than that for the preceding year, some of the provinces actually produced a greater quantity. There was a decrease

of 19,000 cwt. in Prince Edward Island, and of 8,000 cwt. in Quebec. Nova Scotia on the other hand produced 17,000 cwt. more, while New Brunswick also had an increase of over 4,000 cwt. It should be noted, however, in connection with the Nova Scotia increase that had it not been for the special fishery season allowed at the end of 1921, which produced 33,000 cwt., there would have been a decrease of 16,000 cwt. as compared with the regular fishing season in the preceding year.

There was a gratifying increase in the catch of oysters. All the provinces show greater catches, New Brunswick especially so. The increase amounted to 4,000 barrels.

Clams also were taken in larger numbers in all the provinces except Nova Scotia. The total increase amounted to 2,777 barrels.

The catch of scallops was approximately 1,500 barrels greater than in the preceding year.

River Spawning Fish.—The salmon fishery, which had been showing diminished catches for some years, suddenly produced an increase of 14,000 cwt. over the catch of 1920. That year, however, was much below an average one.

The smelt fishery was successfully prosecuted, and resulted in an increase of 25,000 cwt. as compared with the preceding year's catch.

The fishery for alewives or gaspereaux gave very meagre results. The catch was not more than about one-third of that of the preceding year. In the Harbour of St. John, New Brunswick, where the bulk of the total catch is usually taken, the fishery was almost a failure.

INLAND FISHERIES

The lakes of the Prairie Provinces produced in the aggregate a somewhat greater quantity compared with the production in the preceding year. There was a decrease in value, however, of \$400,084. Notwithstanding a smaller number of men engaged in fishing, the catch in Alberta for commercial purposes showed a slight increase. An establishment for canning, smoking and salting fish was erected on the shore of lake Athabasca in the summer of 1921, and put in operation daily during the last half of September.

Fewer fishermen operated in Saskatchewan owing to the depressed condition of the markets in the first half of the year. The commercial catch, consequently, was slightly less.

There was an increased catch in the lakes of Manitoba.

The St. John River district in New Brunswick produced a slightly greater catch with a considerably greater value.

PACIFIC FISHERIES

Salmon.—The salmon pack of British Columbia amounted to 602,657 cases of all kinds. This is a little more than half the number of cases packed in the preceding year. The greatly decreased pack was due in a large measure to the lack of demand for the cheaper grades, such as pinks and chums, as a result of the over-supply in recent years. Unfortunately, however, the pack of the more valuable sock-eye was a very poor one. Not only was this the case in the Fraser River district, where dwindling runs of this variety are now noted without surprise, but it was equally so in the Naas, Skeena, Rivers Inlet, and outlying districts of the north. Spring salmon were fairly abundant in some of the northern districts, and the pack of this variety was greater. It was much less, however, in the Fraser River and Vancouver Island districts.

Halibut.—This fishery resulted in the landing of 325,868 cwt., against 238,770 cwt. for the year 1920. Nearly two-thirds of the total landings in British Columbia were made by United States vessels, mainly at Prince Rupert,

where catches were disposed of and the vessels outfitted before returning to the fishing grounds.

Herring.—These fish were as abundant as ever on the west and east coasts of Vancouver island. The quantity landed annually varies as a rule with the condition of the markets, and the demand. The catch for 1921 was somewhat less than that for the preceding year owing to the temporary slackness in the demand for dry salted herring from the Orient. The demand for herring cured in the Scotch style was better in the eastern part of the United States. Efforts were made to pack a much larger quantity. A sufficient quantity of fish of the right quality was not secured, however, and the pack, although double that for the preceding year, fell far short of what was prepared for. Several companies operated purse-seines for herring at places within thirty miles of Prince Rupert during the season, and a very considerable quantity was taken. The fish were mainly disposed of for bait.

Pilchards.—These are very abundant on the west coast of Vancouver Island. They are mostly canned. The pack of 1921 was only 16,091 cases, whereas the one for the preceding year amounted to 91,929 cases. The smaller pack was due altogether to poor market conditions. New outlets have been recently found for the canned product, however, and it is anticipated that the pack will increase in volume annually.

Other Sea Fish.—In addition to the foregoing, which constitute the chief kinds landed in British Columbia, such varieties as cod, flatfish, smelts, sturgeon, oysters, clams, etc., were landed in the usual quantities. These taken together contribute a considerable part to the total annual value.

Whales.—The market conditions were not such as to warrant the operation of the British Columbia whaling stations during 1921. Consequently there were no whales reported as having been landed.

Summary of Production, 1921

The following table gives a statement for the whole of Canada of all fish caught and marketed during 1921. For each kind the total caught and the value at the vessel's or boat's side is first given, this being followed by statements showing the form in which each kind was marketed and the value.

Agencies of Production:—Capital Equipment, Employees, Etc.

(1) Primary Operations:—

Capital.—The amount of capital represented in the vessels, boats, nets, traps, piers and wharves, freezers, etc., engaged in the primary operations of catching and landing the fish in 1921 was \$26,257,487, compared with \$29,893,213 in 1920 and \$31,493,152 in 1919. (Table 3).

Employees.—The number of employees engaged in these operations in 1921 was 55,230, compared with 57,197 in 1920 and 67,804 in 1919. (Table 4).

(2) Fish Canning and Curing Establishments.

Capital.—The amount of capital invested in fish canning and curing establishments in 1921 was \$19,411,990, compared with \$20,512,265 in 1920, and \$23,200,874 in 1919. These totals represent value of land and buildings, machinery, fish products, fuel and supplies on hand and cash and operating accounts. (Table 5).

Employees.—The number of persons employed in fish canning and curing establishments in 1921 was 14,104, compared with 18,499 in 1920 and 18,356 in 1919. (Table 6).

Details of Fish Canning and Curing Establishments

Employees and Wages.—The total number of persons employed in fish canning and curing establishments in 1921 was 14,104, and the total amount paid in salaries and wages was \$2,973,386. These totals comprise 487 persons classified as officers, managers and office employees, with salaries of \$551,330; 10,534 factory workers with wages of \$2,023,040; and 3,083 contract and piece workers with wages of \$399,016. In the cannery factories of British Columbia a large part of the work is done under contract, the contractor engaging and paying his own help, and being himself paid by the factory according to the quantity of fish packed. For these contract workers and for the piece-workers no statistics of employment, other than the number so employed and the amounts paid to them, are available. The following table gives number of employees and salaries and wages under the three classifications for 1919, 1920 and 1921.

7. Employees in Fish Canning and Curing Establishments in 1919, 1920 and 1921—Number and Salaries and Wages

Year	Employees on Salaries		Employees on Wages		Contract and Piece-Workers		Total of Employees and of Salaries and Wages	
	No.	\$	No.	\$	No.	\$	No.	\$
1919.....	679	694,315	12,883	2,749,210	4,794	814,286	18,356	4,257,811

Fuel Used.—The total value of fuel used in fish canning and curing establishments in 1921 was \$412,581, comprising \$228,823 the value of coal used; \$62,805 of gasoline; \$54,384 of wood; \$50,814 of fuel oil; \$15,046 of petroleum distillate; and \$709 of other fuel. The following table gives the quantities and values of the different kinds of fuel used for the years 1919, 1920 and 1921. In 1921 all of the petroleum distillate, and 93 per cent of the anthracite coal were used in the establishments of British Columbia.

¹ Included with other fuel.

Power Employed.—The power used in the establishments in 1921 was furnished by engines and motors classified as follows: 157 steam engines with 2,943 total rated h.p.; 529 gasoline and oil engines with 2,413 h.p.; 54 water wheels and turbines with 596 h.p.; and 74 electric motors with 899 h.p.; The engines, motors, water wheels, turbines and unspecified totalled 826 units, the total rated horse power of these being 7,157. The boilers in use numbered 286, with a total of 10,577 rated h.p.; and electric generators, 10, with 470 h.p.

Miscellaneous Expenses.—Included under this heading are rent of offices, works and machinery; rent of power; insurance; taxes; royalties and use of patents; advertising and travelling expenses; ordinary repairs to buildings and machinery; and other sundry expenses. The miscellaneous expenses totalled \$1,667,157 in 1921, compared with \$2,326,073 in 1920.

Value of Materials Used.—The total value of the materials used in 1921 was \$11,708,478, comprising \$8,524,407, the value of the fish used in the preparation of fish products and of fish purchased for resale fresh; \$292,526 of salt; \$2,874,809 of containers; and \$16,736 the value of sundry materials. The following table gives comparative statistics for the past three years.

11. Value of Materials Used in Fish Canning and Curing Establishments, 1919, 1920 and 1921

Materials	1919	1920	1921
Fish.....	\$14,345,461	\$14,347,089	\$8,524,407
Salt.....	436,891	456,013	292,526
Containers.....	4,272,951	4,229,490	2,874,809
Other materials.....	274,063	330,437	16,736
Total.....	\$19,329,966	\$19,363,629	\$11,708,478

Value of Product.—The total value of production of fish canning and curing establishments in 1921 was \$18,894,132, compared with \$30,900,147 in 1920, a decrease of \$12,006,015 or 38 per cent. The decrease is in value of fish prepared, the total value of the fish marketed for consumption fresh showing a slight increase over the previous year. Comparative statistics for 1919, 1920 and 1921 are given in the following table.

12. Value of Product of Fish Canning and Curing Establishments in 1919, 1920 and 1921

Description of establishment	1919		1920		1921	
	Fish marketed for consumption fresh	Fish canned, cured or otherwise prepared	Fish marketed for consumption fresh	Fish canned, cured or otherwise prepared	Fish marketed for consumption fresh	Fish canned, cured or otherwise prepared

Total Expenses and Total Value of Product.—The total cost of operating the establishments in 1921, covering amounts paid for salaries and wages of office and factory employees, fuel, materials used, and miscellaneous expenses, was \$16,761,602, while the total value of production for the year was \$18,894,132. Comparative figures for 1920 were: expenses \$27,126,912; and value of production \$30,900,147.

Other Data.—The returns of establishments for 1921 have been classified according to value of production, number of employees, time in operation, and character of organization, and summaries are given in the following statement: (1) Value of Production: The returns of 410 establishments show value of production of the establishment as under \$5,000; of 165 establishments as \$5,000 to under \$10,000; of 98 establishments as \$10,000 to under \$20,000; of 76 establishments as \$20,000 to under \$50,000; and of 93 establishments as \$50,000 or over. Comprised in the last classification are 52 salmon canneries, 28 fish curing establishments; ten lobster canneries, and three sardine and other fish canneries. In a number of the canneries, fish curing operations were carried on previous to and after the canning seasons. Forty-six of the lobster canneries, eight of the salmon canneries and two classified as "sardine and other fish" canneries, showed a product in 1921 of cured fish in addition to the canned product. (2) The classification of establishments according to average number of employees shows that 550 establishments are in the group of those employing an average of five persons and over, and 204 in the group of those employing less than five. Eighty-eight establishments report that no persons were employed during 1921, the work in these establishments being performed by the operators themselves. (3) Time in Operation: The establishments in operation for periods of less than 60 days during the year numbered 369; of from 60 to 119 days, 256; of from 120 to 179 days, 108; of from 180 to 239 days, 49; and for periods of 240 days or over, 60 establishments. Comprised in the last classification are 44 fish curing establishments; 11 lobster canneries, three salmon canneries, one clam cannery and one "other fish" cannery. (4) Character of Organization: Of the total number of 842 fish canning and curing establishments in operation, 463 were operated by individuals, 168 by partnerships, 203 by joint stock companies, and eight by co-operative associations.

Review by Provinces

The following tables (13-18) show by provinces: the total value of the fisheries; the quantity caught and landed and the value marketed of the chief commercial fishes; the quantity and value of all fish caught and landed and marketed; the total values for counties or districts of sea fish caught and landed and marketed; the quantity of sea fish taken off shore; and the capital equipment.

Summary by Provinces of Capital Equipment—Fish Canning and Curing, 1921

New Brunswick		Quebec		Manitoba and Alberta		British Columbia	
No.	Value	No.	Value	No.	Value	No.	Value
	\$		\$		\$		\$
172	415,800	65	106,245	-	-	-	-
61	477,384	-	-	-	-	-	-
-	-	-	-	-	-	-	-
-	-	33	15,350	-	-	57 ^c	10,636,217
-	-	-	-	-	-	4	138,940
59	342,629	26	268,688	3 ^b	145,342	42	2,831,843
-	1,235,813	-	481,283	-	145,342	-	13,607,000

^aIncludes two sardine and "other fish" canneries.

^bIncludes one "other fish" cannery.

^cIncludes one "other fish" cannery.

^dIncludes one clam cannery.

Fishing Bounty

Under the authority of "An Act to encourage the development of the Sea Fisheries and the building of Fishing Vessels," the sum of \$160,000 is appropriated annually by the Department of Marine and Fisheries and paid to fishermen of the eastern Maritime Provinces. The bounty is distributed under regulations made from time to time by the Governor in Council.

For the year 1921, payment was made on the following basis:—

To owners of vessels entitled to receive bounty, \$1 per registered ton; payment to the owner of any one vessel not to exceed \$80.

To vessel fishermen entitled to receive bounty, \$7 each.

To owners of boats measuring not less than 13 feet keel, \$1 per boat.

To boat fishermen entitled to receive bounty, \$5.30 each.

There were 11,674 bounty claims received and 11,654 paid. In the preceding year, 9,671 were received and 9,664 paid.

The total amount paid was \$159,449.80, allocated as follows:—

To 586 vessels and their crews, \$46,147.30.

To 11,068 boats and their crews, \$113,302.50.

Part III, Table 2, shows in detail the payment of the bounty by counties for the year 1921.

Imports and Exports

The value of fish and fish products imported into Canada during the fiscal year ended 31st March, 1922, was \$3,169,613, and of fish and fish products exported \$29,578,392. This is a decrease in the value of the imports of \$1,122,842 from the previous year, and a decrease in the value of the exports of \$4,036,727. (See Part III Table 3) for imports and exports by kinds of fish and by countries.

Historical Review

The three tables following will afford a review of the fishing industry of Canada for the past several years. In the case of production, returns are given by provinces year by year back to 1870. In the case of the number and value of vessels, boats, etc., the review extends to 1880, and in the case of the number of employees to 1895.

GENERAL TABLES

I. FISH CAUGHT AND MARKETED, 1921—QUANTITIES AND VALUES.

II. AGENCIES OF PRODUCTION, 1921 — CAPITAL EQUIPMENT, EMPLOYEES, Etc.

Part 1. IN PRIMARY OPERATIONS.

Part 2. IN FISH CANNING AND CURING ESTABLISHMENTS.

- (a) General Summary of Statistics.
- (b) Capital Invested.
- (c) Employees, and Salaries and Wages.
- (d) Number of Wage-earners by Months.
- (e) Time in Operation and Hours Worked.
- (f) Classification of Wage-earners according to Daily Wages.
- (g) Quantity and Value of Fuel Used.
- (h) Power Employed.
- (i) Classification of Establishments According to Value of Product.
- (j) Classification of Establishments According to Number of Employees.
- (k) Classification of Establishments According to Character of Organization.

III. SPECIAL TABLES.

- (1) The Salmon Pack of British Columbia, 1911-1921.
- (2) Fishing Bounties, 1921.
- (3) Imports and Exports of Fish and Fish Products, 1921.
- (4) Fish Landed in United States Atlantic Ports by Canadian Vessels, 1919-1921.

FISHERIES STATISTICS

III. (3) Imports and Exports of Fish and Fish Products

STATEMENT showing the Quantities and Values of Fish and Fish Products Imported into Canada for Consumption during the Fiscal Year ended March 31, 1922.

Classification	Fiscal Year, 1922	
	Quantity	Value
Fish and Fish Products—		\$
Fish—		
Anchovies, sardines, sprats, and other fish, packed in oil or otherwise, in tin boxes, weighing Over 20 but not over 36 ounces each.....	box	20,284 6,039
Over 12 but not over 20 ounces each.....	box	50,249 13,038
Over 8 but not over 12 ounces each.....	box	72,673 22,436
8 ounces or less.....	box	4,349,348 429,935
Bait fish, fresh.....	lb.	50 8
Cod, haddock, and pollock—		
Dried.....	lb.	8,111,818 470,713
Fresh.....	lb.	721,763 28,660
Smoked.....	lb.	1,040 105
Wet salted or pickled.....	lb.	251,835 9,937
Halibut, fresh or frozen.....	lb.	2,550,797 105,416
Herrings, canned.....	lb.	46,101 0,357
Herrings, fresh or frozen.....	lb.	81,448 1,662
Herrings, pickled or salted.....	lb.	10,024,124 330,773
Herrings, smoked.....	lb.	71,392 3,290
Live fish or fish eggs for propagating purposes.....	lb.	— 3,543
Lobsters, canned.....	lb.	91,848 34,798
Lobsters, fresh.....	lb.	— 3,524
Mackerel, fresh.....	lb.	121,214 9,235
Mackerel, pickled.....	lb.	1,140 201
Oysters, canned in cans not over one pint.....	can	183,512 30,455
Oysters, canned in cans over one pint but not over one quart.....	can	1,040 503
Oysters, fresh in shells.....	qt.	3,867 2,549
Oysters, shelled in bulk.....	bbl.	2,650 22,374
Oysters, prepared or preserved, n.o.p.....	gal.	132,106 208,653
Salmon, canned, prepared or preserved.....	lb.	23,601 15,402
Salmon, fresh.....	lb.	1,512,691 284,613
Salmon, pickled or salted.....	lb.	2,074,799 165,106
Salmon, smoked.....	lb.	604,809 42,863
Seed and breeding oysters imported for the purposes of being planted in Canadian waters.....	lb.	26,465 8,885
Squid.....	lb.	— 6,920
Other fish—		
Dried.....	lb.	315,784 82,291
Fresh.....	lb.	1,128,574 101,517
Pickled.....	lb.	708,817 55,848
Preserved in oil.....	lb.	— 36,560
Prepared or preserved, n.o.p.....	lb.	— 145,549
Smoked or boneless.....	lb.	17,841 3,520
Fish Products—		
Ambergris.....	lb.	— 134
Fish offal or refuse.....	lb.	— 14,192
Fur skins, undressed, the produce of marine animals.....	lb.	— 2,460
Oils—		
Cod liver oil.....	gal.	91,661 48,917
Seal oil.....	gal.	9,704 6,524
Whale and spermaceti oil.....	gal.	5,899 5,414
Other fish oil.....	gal.	21,226 10,989
Pearl, mother of, unmanufactured.....	lb.	— 15,654
Sponges of marine production.....	lb.	— 71,467
Tortoise and other shells, unmanufactured.....	lb.	— 2,975
Turtles.....	lb.	— 5,314
Whalebone, unmanufactured.....	lb.	100 198
Other fish and fish products.....	lb.	— 71,976
Total Fish and Fish Products		3,169,613

III. (3) Imports and Exports of Fish and Fish Products—*cont.*

Préface

Ce rapport est publié en vertu d'une entente établissant la coopération en matière de statistique, intervenue entre le Bureau Fédéral de la Statistique et les différents services gouvernementaux ayant juridiction sur les pêcheries canadiennes. Ces services comprennent: la Direction des Pêches du ministère de la Marine et des Pêches, qui exerce sa juridiction sur les pêches maritimes, ainsi que sur les pêches fluviales et lacustres du Manitoba, de la Saskatchewan et de l'Alberta; et les Divisions des Pêches des provinces d'Ontario et de Québec, qui régissent les pêches en eau douce de leurs provinces respectives. Les pêches intérieures des provinces maritimes n'ont que fort peu d'importance au point de vue commercial; leurs statistiques sont colligées par le personnel de la Direction des Pêches du Dominion. Il en est de même pour celles de la Colombie Britannique. Cette dernière province possède une Division des Pêches, mais cet organisme ne s'occupe pas de statistique pour son propre compte.

En vertu de l'arrangement dont il est parlé plus haut, les statistiques du poisson pêché et des produits offerts en vente à l'état frais ou après une préparation sommaire, sont recueillies par les fonctionnaires locaux des services des pêches, vérifiées et condensées au ministère de la Marine et des Pêches, puis compilées au Bureau Fédéral de la Statistique. En ce qui concerne le poisson industriellement préparé et ses sous-produits, des formules similaires à celles en usage dans le recensement des autres branches de production sont envoyées directement par ce Bureau aux poissonneries, établissements de salaisons, de conserve de poisson, etc., les fonctionnaires des services des pêches s'assurant que ces formules sont consciencieusement remplies et promptement retournées. Les fonctionnaires des gouvernements provinciaux voudront bien accepter nos remerciements pour le concours qu'ils nous ont prêté.

R. H. COATS,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, 29 août 1922.

Notice sur les pêcheries canadiennes

On peut dire sans exagération que le Canada possède les pêcheries les plus vastes du monde et que l'abondance, l'excellence et la variété de leurs produits ne sont pas surpassées. La richesse des eaux canadiennes est démontrée par le fait que la totalité du saumon, du homard, du hareng, du maquereau et de la sardine, la plus grande partie de l'églefin et une portion considérable de la morue, de la merluche et du merlan que l'on y prend, sont pêchés dans une zone qui ne s'étend pas à plus de dix ou douze milles du rivage.

Les rives des provinces de l'Atlantique, depuis Grand Manan jusqu'au Labrador, mesurent plus de 5,000 milles, à l'exclusion des anses et échancrures qui les dentellent, tandis que les étendues maritimes qu'elles embrassent comprennent: la Baie de Fundy, avec ses 8,000 milles carrés; l'estuaire du St-Laurent, au moins dix fois plus grand, et d'autres caux océaniques représentant ensemble plus de 200,000 milles carrés, c'est-à-dire plus des quatre-cinquièmes des pêcheries du nord de l'Atlantique. De plus l'on compte 15,000 milles carrés d'eaux intérieures, sous le contrôle absolu du Dominion.

Mais ces vastes étendues ne représentent qu'une partie des eaux canadiennes. La Baie d'Hudson, dont les côtes s'étendent sur une longueur de 6,000 milles, est plus grande que la Méditerranée. Sur le Pacifique, le littoral canadien mesure plus de 7,000 milles; ses baies et ses fjords innombrables offrent aux pêcheurs une multitude d'abris très sûrs. Enfin, disséminés sur tout le territoire, s'égrène une série de lacs, couvrant ensemble une superficie de 220,000 milles carrés, soit plus de la moitié des eaux douces du globe; dans cette étendue, la part du Canada dans les grands lacs du bassin du St-Laurent, figure pour 34,000 milles carrés.

L'abondance et l'excellence du poisson sont un facteur de tout premier ordre. Pendant longtemps, la morue et le saumon se sont disputé le premier rang mais, dans les dernières années, le homard tant par son volume, que sa cherté a quelquefois relégué la morue au troisième rang.

On peut considérer la pêche dans l'Atlantique sous deux aspects distincts; la pêche hauturière (ou de haute mer) et la pêche côtière. La pêche hauturière est pratiquée par des navires de 40 à 100 tonneaux, montés par des équipages de douze à vingt hommes, qui pêchent à la ligne, et aussi par des chalutiers à rameur d'environ 150 pieds de longueur. Comme boëtte, on emploie principalement le hareng, l'encornet et le capelan et l'on prend de la morue, de l'églefin, de la merluche, du merlan et du flétan. Quant à la pêche côtière, elle se fait au moyen de petites embarcations généralement automotrices, que montent deux ou trois hommes et dans de petites barques, ayant de quatre à sept hommes d'équipage. Ces pêcheurs en bateau font usage de rets à mailles, de chalut et de lignes à main, tandis que ceux qui pêchent sur le rivage se servent de pièges ou casiers, de seines et de nasses. Les poissons comestibles que l'on prend sur la côte sont: la morue, la merluche, l'églefin, le merlan, le flétan, le hareng, le maquereau, le gasparot, l'aloise, l'éperlan, le carrelet et la sardine.

Les plus importantes pêcheries de homard de l'univers se trouvent tout le long du littoral oriental du Canada, cependant que d'excellents bancs d'huîtres existent en maintes parties de l'estuaire du St-Laurent, notamment à proximité de l'île du Prince-Édouard.

La pêche du saumon prédomine sur le littoral du Pacifique, quoique de grands navires, bien équipés, se livrent à une fructueuse pêche du flétan, dans les eaux septentrionales de la Colombie Britannique, la méthode usitée étant la ligne de fond que l'on tend et que l'on relève au moyen de doris, tout comme cela se pratique dans les pêcheries en eau profonde de l'Atlantique. Le hareng est très abondant sur la côte du Pacifique et fournit une inépuisable provision de boette pour la pêche du flétan. Dans les lacs intérieurs, on pêche à l'aide de rets à mailles, d'éperviers, de seines et de lignes ordinaires.

LES PÊCHERIES EN 1921

La valeur totale du produit des pêcheries canadiennes, en l'année 1921, s'est élevée à \$34,931,935, comparativement à \$49,241,339 en 1920 et \$56,508,479 en 1919. Ces chiffres représentent la valeur du poisson mis sur le marché, soit frais, soit préparé par les pêcheurs ou dans les fabriques.

Le tableau suivant indique la quantité et la valeur des principaux poissons dont on fait commerce (ceux dont la valeur a atteint \$100,000 au moins) pendant les cinq dernières années; la dernière colonne signale l'augmentation ou la diminution en 1921, comparativement à 1920.

¹ Poisson pris et amené à terre. ² Poisson mis en vente. ³ Compris avec morue.

LA SAISON DE PECHE EN 1921

L'industrie de la pêche s'est exercée durant l'année 1921 dans des conditions extrêmement défavorables. Le poisson et ses sous-produits trouvaient difficilement acquéreur et les prix baissèrent à un tel degré que certains pêcheurs, principalement dans certains districts du littoral de l'Atlantique, jugèrent préférable de cesser leurs travaux, ce qui explique que la production ait été grandement inférieure à la normale. Il n'est donc pas surprenant que la valeur de tout le poisson et de ses sous-produits mis sur le marché pendant l'année, n'ait pas dépassé \$34,931,935, somme qui n'avait jamais été aussi basse depuis 1914; elle est inférieure de \$14,000,000 à la production de 1920 et de \$25,000,000 à celle de l'année 1918, laquelle constituait un record.

A première vue, cette décroissance est très sérieuse, mais déjà se manifestent des indices évidents de l'amélioration du marché pour les produits de la saison de 1922 et l'on peut prédire avec confiance, que loin de diminuer encore, la production de nos pêcheries reprendra sa marche ascendante, quoique plus lentement qu'au cours de la guerre. Nous donnons ci-dessous un relevé de la valeur des pêcheries dans chacune des provinces durant les années 1920-21.

	1920	1921
Nouvelle-Ecosse.....	\$12,742,659	\$9,778,623
Nouveau Brunswick.....	4,423,745	3,690,726
Ile du Prince-Edouard.....	1,708,723	924,520
Québec.....	2,592,382	1,815,284

Colombie Britannique.....	22,329,161	13,953,670
Yukon.....	33,100	28,988
	<hr/> \$49,241,339	<hr/> \$34,931,935

Pêcheries de l'Atlantique

Morue, merluche, églefin et merlan.—En raison de la baisse des cours et de la mévente, la prise de ces quatre variétés de poisson, en 1921, se réduisit à 2,509,928 quintaux, au lieu de 2,707,059 quintaux l'année précédente; la diminution porte sur la merluche, le merlan et l'églefin, surtout ce dernier. La flottille de pêche du banc de Lunenbuerg a pris moins de poisson que l'année précédente; ceci étant attribuable au fait qu'elle comptait moins de bateaux de pêche. Il est à remarquer que la prise individuelle de chaque embarcation fut plus considérable que de coutume.

Maquereau, hareng et sardine.—Le maquereau fut, en général, plus abondant qu'en 1920. Les prises faites en Nouvelle-Ecosse, au Nouveau-Brunswick et dans l'île du Prince-Edouard dépassèrent de 18,000 quintaux celles de 1920, mais cette augmentation fut presque neutralisée par une diminution de 15,000 quintaux dans la province de Québec, affectant surtout les îles de la Madeleine. Le hareng fumé ou hareng saur ayant été délaissé par le consommateur, la pêche du hareng s'en est ressentie. Elle tomba à 637,414 quintaux, contre 935,122 quintaux l'année précédente; cette diminution se produisit dans toutes les provinces. Dans la baie de Fundy, la pêche à la sardine ne fut pas fructueuse. D'autre part, l'industrie de la mise en boîte de la sardine n'étant pas encore réorganisée et les industriels ayant éprouvé des difficultés à vendre la prise des trois années précédentes, les cours se maintinrent si bas que les pêcheurs ne jugèrent pas à propos de tendre leurs filets.

Autres poissons de mer.—La pêche du flétan donne 7,600 quintaux de plus que l'année précédente et celle de l'espadon fut doublée. La bonite, la plie et le tacaud (petite morue) ne diffèrent pas de la normale.

Crustacés.—Les homarderies souffrissent considérablement de l'inactivité d'un assez grand nombre de pêcheurs, causée par l'insuffisance des prix. Tandis que la production totale décru de 6,360 quintaux sur la prise de l'an dernier quelques-unes des provinces augmentèrent considérablement la leur. On signale une diminution de 19,000 quintaux dans l'île du Prince-Edouard et de 8,000 quintaux dans Québec; par contre, la Nouvelle-Ecosse bénéficia d'une augmentation de 17,000 quintaux et le Nouveau-Brunswick de plus de 4,000 quintaux. Il est à remarquer, toutefois, en ce qui concerne la Nouvelle-Ecosse, que cette augmentation est attribuable à la prolongation de la saison de pêche autorisée vers la fin de 1921, laquelle produisit 33,000 quintaux; mais si la saison de pêche avait eu la même durée que l'an dernier il y aurait eu une décroissance de 16,000 quintaux.

La production huîtrière a augmenté d'une manière très satisfaisante dans toutes les provinces, tout spécialement au Nouveau-Brunswick où l'accroissement atteignit 4,000 barils.

Les clovisses aussi présentent une augmentation dans toutes les provinces, sauf la Nouvelle-Ecosse, laquelle se traduisit par 2,777 barils.

Les pétoncles ont donné environ 1,500 barils de plus que les années précédentes.

Poissons frayant en rivière.—La pêche du saumon, qui déclinait depuis quelques années, s'est soudainement relevé, donnant une augmentation de 14,000 quintaux sur 1920, laquelle d'ailleurs était fort inférieure à la normale. La pêche à l'éperlan eut beaucoup de succès et donna 25,000 quintaux de plus que l'année précédente. La pêche au gasparot ne donna que de très maigres résultats, les prises atteignant à peine un-tiers de celles de 1920. Dans le havre de St-John, Nouveau-Brunswick, où l'on prend d'habitude la presque totalité de ce poisson, la pêche fut presque infructueuse.

Pêcheries intérieures

La pêche dans les lacs des provinces des prairies, considérée dans l'ensemble, fut un peu plus fructueuse que celle de 1920, quoique la valeur du poisson ait décru de \$400,084. Nonobstant la réduction du nombre des pêcheurs, les pêcheries de l'Alberta présentent une légère augmentation. Un établissement pour la mise en boîtes, le fumage et la salaison du poisson fut construit sur le rivage du lac Athabasca dans l'été de 1921 et fonctionna quotidiennement pendant la seconde moitié de septembre. Le nombre des pêcheurs de la Saskatchewan s'est trouvé diminué par suite de la dépression du marché et, par conséquent, les prises furent légèrement moindres. Les lacs du Manitoba donnèrent plus de poisson que de coutume. Le district de la rivière St-John, dans le Nouveau-Brunswick, augmenta légèrement sa production, en même temps que la valeur des prises s'accroissait considérablement.

Pêcheries du Pacifique

Saumon.—La pêche du saumon dans la Colombie Britannique a produit 602,657 caisses de toutes sortes, soit un peu plus de la moitié du volume des années précédentes. Cette situation est attribuable, dans une large mesure, à l'absence de demandes pour les variétés à meilleur marché, telles que le saumon rose ou bossu et le saumon bécard extrêmement abondants ces dernières années. Mais, malheureusement, le saumon «dos bleu» se montra très rare et cette rareté se manifesta non seulement dans le fleuve Fraser, où l'on est habitué à de grandes fluctuations, sans causes apparentes, des bancs de cette espèce, mais aussi dans les rivières Naas, Skeena, et dans leurs tributaires descendant des régions septentionales. Dans les rivières du nord, le saumon de printemps fut assez abondant et la pêche de cette espèce fut meilleure; au contraire, dans le fleuve Fraser et dans l'île Vancouver, on constata une diminution dans la prise de cette variété.

Flétan.—La pêche au flétan a produit 325,868 quintaux, au lieu de 238,770 quintaux en 1920. Presque les deux-tiers de ce poisson pris en Colombie Britannique, furent pêchés par les navires des Etats-Unis, principalement à Prince Rupert où le poisson était vendu et les navires réapprovisionnés avant de retourner sur les banes de pêche.

Hareng.—Ce poisson fut aussi abondant que de coutume sur le littoral est et ouest de l'île Vancouver. En général, la prise annuelle varie selon la demande et les cours. La prise de 1921 fut quelque peu inférieure à celle de l'année précédente, à cause d'un relâchement temporaire dans la demande du hareng salé pour les pays orientaux. L'est des Etats-Unis acheta une plus grande quantité de hareng préparé à la manière écossaise et des efforts furent faits pour augmenter la production de ce poisson en conserves. Cependant, on ne réussit pas à prendre une quantité suffisante de poisson de la qualité nécessaire et la production, quoique double de celle de l'année précédente, resta néanmoins inférieure aux besoins du commerce. Plusieurs compagnies se livrèrent à la pêche au hareng, au moyen de chaluts, sur des banes éloignées de moins de 30 milles du Prince Rupert et en prirent une quantité très considérable, qui fut principalement vendue comme boëtte.

Sprat.—Ce poisson est très abondant sur le littoral occidental de l'île Vancouver et se vend principalement en boîte. La production de 1921 ne donna que 16,091 caisses, tandis que celle de l'année précédente s'était élevée à 91,929 caisses, cette différence étant due entièrement à l'insuffisance de la demande. Toutefois, on a récemment trouvé de nouveaux débouchés pour le sprat en boîte et il est permis d'espérer que ce commerce augmentera annuellement.

Autres poissons de mer.—Outre les poissons dont il vient d'être parlé et qui constituent les principales espèces pêchées en Colombie Britannique, d'autres poissons, tels que la merluche, la limande, l'éperlan, l'esturgeon et les crustacés, comme l'huître, la clovisse, etc., fournirent leur contingent habituel, lequel constitue une notable contribution au total de la valeur annuelle.

Baleines.—Les baleiniers ne se sont pas livrés à la pêche en 1921, en raison de l'absence de demande pour les produits de ce cétacé.

Résumé de la production, 1921

Le tableau suivant donne un exposé, pour l'ensemble du Canada, de tout le poisson pris et mis sur le marché, pendant l'année 1921. On y trouvera d'abord la totalité de la valeur des prises de chaque espèce aux navires ou vaisseaux; puis, un relevé indiquant sous quelle forme chacune de ces espèces a été mise sur le marché et sa valeur.

Moyens de production :—Capital, outillage, main-d'œuvre, etc.**(1) Pêche proprement dite :—**

Capital.—En 1921, le capital représenté par les navires, barques, filets, pièges, quais, congélateurs, etc., affectés aux opérations de pêche proprement dite, était de \$26,257,487, comparativement à \$29,893,213 en 1920 et \$31,493,152 en 1919 (tableau 3).

Main-d'œuvre.—Le nombre du personnel affecté aux opérations de pêche en 1921 s'élevait à 55,230 personnes, au lieu de 57,197 en 1920 et 67,804 en 1919. (tableau 4).

(2) Etablissements de préparation et de mise en boîtes du poisson :—

Capital.—Les capitaux engagés dans les établissements de préparation et de mise en boîtes du poisson s'élevait à \$19,411,990, comparativement à \$20,512,265 en 1920 et \$23,200,874 en 1919. Dans ces chiffres sont compris la valeur des terrains et bâtiments, de la machinerie, des stocks en main, du combustible et autres approvisionnements, ainsi que les fonds de roulement, (tableau 5).

Main-d'œuvre.—Le nombre des personnes travaillant dans ces mêmes établissements en 1921 atteignit 14,104 au lieu de 18,499 en 1920 et 18,356 en 1919. (tableau 6).

3. Matériel et agrès de pêche. Valeur des vaisseaux et barques de pêche, filets, pièges, quais, etc., employés dans les pêcheries canadiennes en 1919, 1920 et 1921

Autres données concernant les opérations des établissements industriels

Personnel et salaires.—Les employés et ouvriers des établissements industriels, en l'année 1921, étaient au nombre de 14,104, dont les gains ont atteint \$2,973,386. Ces totaux sont constitués par 487 personnes classifiées comme directeurs, gérants et employés de bureau, dont les traitements et appointements représentaient \$551,330; 10,534 ouvriers et journaliers ayant reçu comme salaires \$2,023,040 et enfin, 3,083 ouvriers travaillant à l'entreprise ou aux pièces et ayant reçu une rémunération de \$399,016. En Colombie Britannique, la majorité des ouvriers des fabriques de conserves de poisson sont placés sous un régime spécial, l'entrepreneur engageant et payant directement sa main d'œuvre et étant lui-même payé par le fabricant, selon la quantité de poisson mis en boîtes par son équipe. En ce qui concerne ces dernières et les ouvriers aux pièces, on ne possède d'autres informations que leur nombre et le chiffre total de leur rémunération. On trouvera dans le tableau 7, le nombre et les gains des différentes personnes comprises sous ces trois classifications en 1919, 1920 et 1921.

7. Personnel des établissements de préparation et de mise en boîte du poisson, en 1919, 1920 et 1921—Appointements et salaires

(I) A l'exclusion des ouvriers travaillant à l'entreprise et aux pièces.

Combustible.—On estime à \$412,581 la valeur totale du combustible consommé par les manufactures de conserves de poisson et 1921, soit \$228,823 pour le charbon; \$62,805 pour la gazoline; \$54,384 pour le bois; \$50,814 pour le pétrole; brut; \$15,046 pour le pétrole raffiné et \$709 pour d'autres combustibles. Le tableau suivant indique la quantité et la valeur des différentes espèces de combustible consommées pendant les années 1919, 1920 et 1921. La totalité du pétrole raffiné et 93 pour cent de la houille anthracite sont consommés en Colombie Britannique.

**10. Combustible consommé dans les établissements de préparation et de mise en boîte du poisson,
en 1919, 1920 et 1921**

Force motrice utilisée.—La force motrice ayant servi à l'exploitation des établissements qui nous occupent, en 1921, peut être ainsi énumérée:—157 machines à vapeur, d'une puissance maximum de 2,943 h.p.; 529 moteurs à gazoline et à pétrole, développant 2,413 h.p.; 54 turbines, donnant 596 h.p.; et 74 moteurs électriques, d'une force de 899 h.p. Soit au total, 826 unités de tous genres, d'une force totale de 7,157 h.p. A ces machines viennent s'ajouter 286 chaudières, de la force de 10,577 h.p. et 10 générateurs donnant 470 h.p.

Frais généraux.—Ces dépenses comprennent le loyer de bureaux, d'usines et d'outillage, l'achat de force motrice, l'assurance, les taxes, les droits régaliens et l'usage de brevets, la publicité et les voyages, les réparations ordinaires aux bâtiments et à la machinerie et autres dépenses diverses; en 1921, elles se sont élevées à un total de \$1,667,157, comparativement à \$2,326,073 en 1920.

Valeur des matières premières.—La valeur totale des matières premières utilisées en 1921 était de \$11,708,478, dont \$8,524,407 pour le poisson acheté, soit pour être vendu frais, soit pour être mis en conserves; \$292,526 pour le sel, \$2,874,809 pour les récipients et \$16,736 pour différentes autres matières. Le tableau suivant contient les statistiques comparatives des trois dernières années.

11. Valeur des matières premières utilisées dans les établissements de préparation et de mise en boîte du poisson en 1919, 1920 et 1921

	1919	1920	1921
	\$	\$	\$
Poisson.....	14,345,461	14,347,089	8,524,407

Total.....	19,329,966	19,363,029	11,708,478

Valeur des produits.—On évalue à \$18,894,132 les produits sortis des établissements de préparation et de mise en boîtes du poisson, en 1921, comparativement à \$30,900,147 en 1920, soit une diminution de \$12,006,015 ou 38%, cette diminution se manifestant surtout dans la valeur du poisson préparé, celui vendu pour être consommé frais présentant au contraire une légère augmentation sur l'année précédente. Les statistiques comparatives pour 1919, 1920 et 1921 sont contenues dans le tableau suivant.

12. Valeur des produits sortis des établissements de préparation et de mise en boîte du poisson en 1919, 1920 et 1921

Bilan.—Le coût total de l'exploitation des établissements en 1921, embrassant les traitements, appointements et salaires, le coût du combustible, des matières premières et les frais généraux atteignit \$16,761,602, tandis que la valeur totale de la production de la même année était de \$18,894,132. En 1920, le bilan se présentait sous la forme suivante: dépenses \$27,126,912; valeur de la production \$30,900,147.

Autres données.—Pour les fins de la statistique, en l'année 1921, les établissements de l'industrie poissonnière sont classifiés d'après la valeur de leur production, l'importance de leur personnel, la durée de leurs opérations et le genre de leur organisation. Nous donnons ci-dessous un bref résumé de cette classification. (1) Valeur de la production; les rapports reçus de 410 établissements démontrent que la valeur de leur production est restée inférieure à \$5,000; celle de 165 établissements se plaçait entre \$5,000 et \$10,000; celle de 98 établissements, entre \$10,000 et \$20,000; 76 dépassent \$20,000 mais n'atteignent pas \$50,000 et 93 autres atteignent \$50,000 et plus. Parmi ces derniers se trouvent 52 saumoneries, 28 usines de préparation du poisson, 10 homarderies et 3 sardineries. Dans un certain nombre d'usines, le fumage ou la salaison du poisson se fait tant avant qu'après la saison de mise en boîtes; c'est ainsi que 46 homarderies, 8 saumoneries et 2 sardineries ont procédé en 1921 au fumage et à la salaison du poisson, outre leurs opérations essentielles. (2) En classifiant les usines selon l'importance de leur personnel on découvre que 550 établissements emploient au moins cinq personnes, tandis que 204 en occupent moins de cinq; enfin, dans 88 établissements le travail était fait par leur propriétaire, sans l'aide d'aucun ouvrier. (3) Durée des opérations.—Les établissements qui n'ont fonctionné durant l'année que 60 jours ou moins sont au nombre de 369; entre 60 et 119 jours 256; entre 120 et 179 jours, 108; entre 180 et 239 jours, 49 et, enfin, pendant 240 jours ou plus, 60. Parmi ces derniers figurent 44 usines de fumage et de salaison, 11 homarderies, 3 saumoneries, une fabrique de conserves de crustacés et une autre fabrique dont la spécialité n'est pas indiquée. (4) Genre de l'organisation commerciale: sur les 842 établissements en exploitation, 463 appartenaien à des particuliers, 168 à des sociétés en nom collectif, 243 à des sociétés en commandite par actions et 8 à des sociétés coopératives.

Répartition par provinces

Les tableaux qui suivent (13-18) sont consacrés à la production poissonnière dans les provinces; on y trouve: la valeur totale des pêcheries; la quantité de poisson pris et de poisson vendu, pour les espèces principales; la quantité et la valeur de tout le poisson pris et vendu; la valeur totale, par comtés ou districts de tout le poisson de mer pris et vendu; la quantité du poisson de mer pêché en haute mer et enfin la valeur du matériel de pêche.

¹Comprend deux sardineries et des établissements de mise en boîte "d'autre poisson."

²Comprend un établissement de mise en boîte "d'autre poisson."

³Comprend un établissement de mise en boîte "d'autre poisson."

⁴Comprend un établissement de mise en boîte des mollusques.

Primes

En vertu d'une «Loi pour encourager le développement des pêcheries maritimes et la construction des navires de pêche», une somme de \$160,000 est donnée en primes, chaque année, par le ministère de la Marine et des Pêcheries, aux pêcheurs des provinces maritimes de l'est. Ces primes sont réparties et distribuées sur les bases fixées, de temps à autre, par décrets ministériels.

Pour l'année 1921, ces versements se sont effectués sur les bases suivantes:

Aux propriétaires de navires de pêche, \$1 par tonneau enregistré, avec un maximum de \$80 par navire.

A chaque membre de leur équipage, \$7.

Aux propriétaires de barques mesurant au moins 13 pieds de quille, \$1 par embarcation.

A chaque pêcheur montant ces barques, \$5.30.

Il a été reçu 11,674 demandes de primes, dont 11,654 ont été admises. L'année précédente, le nombre de ces réclamations avait atteint 9,671 dont 9,664 admises.

Au total, il a été versé \$159,449.80, se répartissant ainsi:

A 586 navires et leurs équipages, \$46,147.30.

A 11,068 barques et leurs équipages, \$113,302.50.

Le tableau 2, IIIe partie, donne le détail des primes payées en 1921, par comtés.

Importations et exportations

La valeur du poisson et des produits du poisson importés au Canada, durant l'exercice terminé le 31 mars 1922, est estimée à \$3,169,613 et celle des exportations à \$29,578,392. Ces chiffres révèlent une diminution de \$1,122,842, sur les importations de l'année précédente; nos exportations accusent également une baisse de \$4,036,727, pour la même période. Le tableau 3, IIIe partie, relate les importations et les exportations de toutes les espèces de poissons par pays.

Revue rétrospective

Les trois tableaux suivants présentent une revue rétrospective de l'industrie de la pêche au Canada dans les années passées. En ce qui concerne la production, les données sont établies par provinces et par années et remontent jusqu'à 1870. Quant au nombre et à la valeur des navires, barques, etc., les chiffres partent de l'année 1880. Enfin, le personnel occupé à cette industrie nous est révélé depuis 1895.
