<b>Total number of men - Nombre total d'hommes</b> .....	<b>11,851</b>	<b>12,899</b>

<sup>1</sup> The count of fishermen is based chiefly on a non-duplicating list of persons taking out licences to catch fish and shellfish for sale or for catching whales. Estimates are made for crews of fish packers who are not required to take out licences. Men operating salmon traps are not required to take out licences and no estimate is made of the number of men employed working traps. - Le nombre de pêcheurs se fonde surtout sur la liste (corrigée du double emploi) des personnes auxquelles on a délivré un permis de pêcher, pour fins commerciales, les poissons, mollusques et crustacés, et de chasser la baleine. On établit des estimations quant aux équipages des bateaux collecteurs, lesquels ne sont pas tenus de se munir d'un permis. Ceux qui exploitent des pièges à saumon n'ont pas davantage besoin de permis, mais on n'évalue pas leur nombre.
