PRELIMINARY REPORT OF THE FISHERIES OF CANADA, 1930

The following preliminary report on the fisheries of Canada for the year 1930 is issued by the Dominion Bureau of Statistics in co-operation with the Department of Fisheries.

PRODUCTION

The total value of the product of the Canadian fisheries in 1930 was \$47,798,970. This total represents the value of the fish as marketed, whether sold for consumption fresh, or canned, cured or otherwise prepared. The sea fisheries contributed \$41,451,970, or 87 per cent of the total, and the inland fisheries, \$6,346,943 or 13 per cent. The salmon fishery is of chief importance (British Columbia principally) with an output valued at \$17,731,891, or 37 per cent of the total fisheries production of the Dominion. The main product of this fishery is canned salmon with a value of \$13,924,037. The catch of salmon in British Columbia in 1930 was much above the average, and shows an increase in quantity over the preceding year of 52 per cent. The marketed value of the salmon, however, increased by only 18 per cent, the low percentage in comparison with the percentage of increase in the catch being due to the lower average prices in 1930 for both the canned product and the fish marketed for consumption fresh. Lobster and cod rank second and third in importance among the chief commercial fishes, the former with a total marketed value of \$5,214,643, and the latter with \$4,288,813. In the inland fisheries the principal kinds are whitefish, trout and pickerel, the first two with marketed values of over a million dollars each and the third with a value of nearly a million. Almost all of the principal kinds of fish show decreases in marketed value, compared with the preceding year, the exceptions being salmon, mackerel, black cod and swordfish. The marketed value of all fish in 1930 shows a decrease from the preceding year of \$5,719,601, and a decrease from the year 1928 of \$7,252,053. The total catch of fish of all kinds in 1930 amounted to 10,974,334 cwt., compared with 11,508,588 cwt. in 1929, while the value of the fish at the point of landing (the amount received by the fishermen for the catch) was \$29,766,142, compared with \$33,699,543 in 1929.

First among the provinces in order of value of output in 1930 is British Columbia, with a total marketed value for fish and fish products of \$23,103,302. Nova Scotia is second with a total of \$10,411,202. The relation which each province bears to the total value of the fisheries production of the Dominion in 1930 is shown in the following statement of percentages: British Columbia, 48.33; Nova Scotia, 21.78; New Brunswick, 10.16; Ontario, 6.89; Quebec 5.24; Manitoba, 3.78; Prince Edward Island, 2.39; Alberta, 0.88; Saskatchewan, 0.49; and the Yukon Territory, 0.06.

CAPITAL EQUIPMENT AND EMPLOYEES

Capital.— The capital investment of the fishing industry of Canada in 1930 had a total value of \$64,008,622, of which \$33,198,690, represents the value of the vessels, boats, nets, traps, piers and wharves, etc., used in the primary operations of catching and landing the fish and \$30,809,932 the value of the fish canning and curing establishments. The latter sum covers the values of land, buildings and machinery; materials, products and supplies on hand; and cash and accounts and bills receivable. Of the total amount invested in the vessels, boats, etc., \$27,534,258 is credited to the sea fisheries and \$5,664,432 to the inland fisheries. The fish canning and curing establishments are distributed among the provinces bordering on the Atlantic and Pacific — no establishments are recorded for the inland provinces.

Employees.— The number of persons employed during the year 1930 was 79,549, comprising 63,836 fishermen and 15,713 factory workers.

GENERAL TABLES

The following tables give details of the catch of fish and the forms in which marketed, the total value of the fisheries over a period of years, the number and value of the vessels, boats, etc., and the number of persons employed.

1. Quantity and Value of Fish Caught and Marketed, Canada, 1929 and 1930.
