ADVANCE REPORT ON THE FISHERIES OF ONTARIO, THE PRAIRIE PROVINCES AND THE YUKON TERRITORY, 1931.

The present bulletin, containing advance reports on the fisheries of Ontario, the Prairie Provinces and the Yukon Territory, for the year 1931, is issued by the Domir a Bureau of Statistics in co-operation with the Dominion Department of Fish ries and the Fisheries Departments of the provinces concerned.

ONTARIO

Production. The marketed value of Ontario's output of fish in 1931 was \$2,477,131, compared with \$3,294,629 in 1930 and \$3,919,144 in 1929. The decrease is due chiefly to lower average prices in 1931, as the total quantity of the catch shows a decrease from 1930 of only five per cent. Whitefish and trout are of chief importance in Ontario, the former with a marketed value in 1931 of \$645,784, and the latter with \$625,014. Herring is next with \$334,487, and is followed by pickerel with \$184,590, perch with \$183,335, and blue pickerel with \$178,359. Perch and pickerel show increases over the preceding year in the quantity of catch, but decreases are recorded for the other principal kinds.

The total quantity of fish of all kinds caught in Ontario waters in 1931 was 332,044 cwt., with a value to the fishermen of \$2,041,011, compared with a catch of 349,507 cwt., and a value to the fishermen of \$2,692,667 in 1930.

Capital Equipment and Employees. The value of the vessels, traps, etc. used in the fisheries of Ontario in 1931 was \$3,137,842, compared with \$3,423,012 in 1930. The number of fishermen employed was 3,865, compared with 4,074 in the preceding year.

Tables. The following tables give statistics of the fishing industry of Ontario, for 1931 and preceding years.

1. Value of the Fisheries of Ontario, 1922 to 1931.

Year	Value	Year	Value	
The state of the s	\$		\$	Tel (18) adding

THE PRAIRIE PROVINCES AND YUKON TERRITORY

PRODUCTION

The fisheries production of the prairie provinces and Yukon Territory as a whole in 1931 was less than that of the preceding year, the total value amounting to \$1,909,040, compared with \$2,497,231 in 1930. These totals represent the value of the fish as marketed. Nearly the whole of the catch is sold for consumption fresh: the only prepared products are smoked goldeyes and tullibee in Manitoba. The fisheries of Manitoba are of first importance with an output in 1931 valued at \$1,241,575. Saskatchewan is second with \$453,056 and Alberta third with \$184,859. The fisheries production of the Yukon Territory was valued at \$29,550. The only province showing an increase in value over 1930 was Saskatchewan, the increase amounting to \$218,555, or 93 per cent. Whitefish is the principal item for the three provinces and the territory as & whole, the value of output of this fishery in 1931 totalling \$779,698. Pickerel is next in importance, followed by trout and tullibee. Taking each province separately, whitefish is shown to be first in Saskatchewan and Alberta, while pickerel is first in Manitoba. Trout is found chiefly in Saskatchewan and Alberta, the catch in Manitoba being comparatively small.

The total quantity of fish of all kinds caught in the three provinces and the territory in 1931 was 291,147 cwt., with a value to the fishermen of \$1,317,354, compared with a catch of 338,394 cwt. and a value to the fishermen of \$1,790,590 in 1930.

CAPITAL EQUIPMENT AND EMPLOYEES

Capital. The value of the boats, nets, lines, piers and wharves, etc., used in the fisheries of the Prairie Provinces and the Yukon Territory in 1931 amounted to \$1,976,151, distributed by provinces as follows: Manitoba, \$1,041,258; Saskatchewan, \$324,248; Alberta, \$594,740; and the Yukon Territory, \$15,905. Compared with the preceding year, the total capital shows an increase of \$23,710.

Employees. The number of men engaged in catching and landing the fish during the year 1931 was 5,330, of which 3,437 were engaged in fishing operations in Manitoba, 945 in Saskatchewan, 912 in Alberta, and 36 in the Yukon Territory.

TABLES

The following tables are arranged to show for each of the Prairie Provinces and for the Yukon Territory, information regarding the quantity and value of fish caught and landed and marketed in 1930 and 1931; the quantity caught and the value marketed of the chief commercial fishes for the past four years; the number and value of boats, nets, etc., and the number of men employed in the fisheries in 1930 and 1931.

^{*} The 1930 figure was used for Saskatchewan, as information regarding the number of men employed in fishing in that province in 1931 is not yet available.
