# ADVANCE REPORT ON THE FISHERIES OF ONTARIO, THE PRAIRIE PROVINCES, YUKON AND THE NORTHWEST TERRITORIES 1946 

This Enlletin is 2 surd in co-operation with the Dominion Fishsmes Department and the Fisheries Departments of the provinces concemed.

## ONTARIO FISHERIES

Production - The production of the fisheries of Ontario in 1946 was valued at $\$ 6,296,658$, a decrease of $\$ 965,003$, or 14 . $C_{0}$, as compared with 1945 .

Herring was first in order of value, amounting to $\$ 1,603,789$, an increase of 21 D.C. over 1945. Whitefish came second with a marketed value of $\$ 1,388,214$, but a decrease of 8 oc. from the 1945 figure. Trout came third with a marketed value of $\$$ \$06, 759, a decrease from 1945 of 3 oc. Pickerel (dore), perch, blue pickerel streon, pike and catfish all registered values of $\$ 100,000$ or over, as shown in Table do

The quantity of $f 1$ sh landed was 329.971 cwt . a decrease of 4 Doc. from the 1945 landings of $342,748 \mathrm{cwt}$. Eight varieties of fish showed increases in the quantity caught, while five showed decreases from the preceding year. The landings of blue pickerel fell off by 70 O.c. and those of tullibee by 56 oo., as compared with 1945 .

Capital, Equipment and Employment. - The capital invested amounted to $\$ 4,763,778$, an increase of $\$ 524,090$ or 12 .c. over 1945. Vessels and boats were valued at $\$ 2,171,110$, or $46 \mathrm{n} . \mathrm{c}$. of the whole; the remainder $(\$ 2,592,668)$, or $54 \mathrm{p}, \mathrm{c}$ 。 being the value of nets, lines and land equipment.

The number of men engaged in the fisheries in 1946 was 4,244 an increase of 262 over 1945.

## － 5 － <br> THE PRAIRIE PROVINCRS

The statistics of the Prairie Provinces cover the summer fishery of 1946 and the winter fishery of 1946－4\％．

Production－The total marketed value of the flsheries production of the three Prairie Provinces was recorded at $\$ 7.050,006$ in 1946 ，an increase of $\$ 358,473$ or 5.2 p．c．over 1945．By nrovinces，the marketed values were：Manitoba，$\$ 4,871,037$ ；Saskat－ chewan，$\$ 1,148,886$ ；Alberta，$\$ 1,339,083$ ．As compared with 1945，Manitoba registered an inerease of $14.2 \mathrm{D}, \mathrm{C}$ ，while Saskatchewan and Alberta showed decreases of $7,9 \mathrm{D}, \mathrm{C}$ ．and 10.7 o．c．，respectively．

Pickerel，whitefish and saugers still led in value．Saugers are reported from Manitoba only，where they are the third commercial fish in ooint of value，pickerel and Whitefish being in ifist and second places．Whitefish is the leading species in the other two provinces．

The total catch for the three jrovinces was $475,624 \mathrm{cwt}$ ．valued at $\$ 4,633,152$ at the point of landing．This was a decrease of $6.2 \mathrm{p}, \mathrm{c}$ ．in quantity and of $8.1 \mathrm{p}, \mathrm{c}$ ．in velue from 1945．Increased landings of the cheaper types of fish，rather than lower prices，account for the higher percentage of loss in value．By orovinces，the land－ ings and values to fishermen were：Manitoba， $286,958 \mathrm{cwt}$ 。（ $\$ 3,303,711$ ）；Saskatchewan， $77,970 \mathrm{cwt}$ ．$(\$ 729,158)$ ；Alberta， $110,696 \mathrm{cwt}$ ，$(\$ 600,283)$ ．Manitoba recorded a de crease of $7,7 y_{0} c_{0}$ in quantity and 3.3 in value，Saskatchewan one of $22.2 D_{0} c_{0}$ in quantity and $17.3 \mathrm{D}, \mathrm{c}$ 。 in value，while Alberta showed a gad $n$ of $28.9 \mathrm{o} . \mathrm{c}$ 。 in quantity but a decrease of $19.1 p, c$ ．in value，increased landings of tullibee and lower prices for whitefish being the main causes．

Cadital Equinment and Emplovment．－No figures of capital investment in the fish－ erles of Saskatchewan are available for 2946．In the two other provinces，the amount invested in the primary fisheries was reported as $\$ 2,689,265$ ，an increase of 10,3 p．c． over 1945 ．

Employment was recorded as 15,054 in the three provinces as comjared with 13,969 in 1945．These figures mist be accented with caution，as in some instances the number of Ilcences issued，rather than the number of individuals engaged，is reported．

## YUKON

The fishing industry in Yukon is carried on to supply local needs for human con－ sumption and dog feed．The amount landed was 265 cwt 。 valued at $\$ 5,014$ ．Only 18 men found employment and the capital invested was $\$ 6,677$ ．

## NORTHNEST TERRITORTES

The fisheries of the Northwest Territories fall into two categories，fishing for local needs and the commercial fisheries of Great Slave Lake，the production of which is ahloped to Edmonton．These latter figures cover the sumer fishery of 1946 and the winter fishery of 1946－47．In cases where the landings apoear to be high in proportion to the marketings，it may be assumed that part of the catch was not sold but retained for the domestic use of the fisherman or，in some instances，was lost through trans－ portation difficulties．

The total catch was $66,590 \mathrm{cwt}$. the landed value $\$ 288,243$ ，and the marketed value $\$ 558,264$ ．The capital investment was $\$ 173,851$ ，all but $\$ 16,000$ of which was used in connection with the commercial operations on Great Slave Lake．Tmployment was afforded to 659 persons， 128 at Great Slave Lake and 402 throughout the remaining portions of the Territories．
