ADVANCE REPORT ON THE FISHERIES OF QUEBEC, 1943.

The following report on the fisheries of Quebec for the year 1943 is issued by the Dominion Bureau of Statistics in co-operation with the Dominion Department of Fisheries and the Quebec Department of Game and Fisheries.

PRODUCTION

The fisheries production of Quebec was valued at \$5,817,461 in 1943, an increase of nearly 39 p.c. over the 1942 figure. The increase was due more to higher prices than to greater quantities caught, as the latter increased by less than 2 p.c. The sea fisheries contributed \$5,012,159, or 86 p.c., to the total marketed value, the contribution of the inland fisheries being \$805,302, or 14 p.c. Cod is the chief fish in marketed value, at \$3,085,971, or 53 p.c. of the total, followed by herring, at \$576,358, or 10 p.c., and mackerel at \$440,626, or 5 p.c.

The quantity of fish of all kinds, including shell fish, taken by Quebec fishermen during the year totalled, 1,136,781 cwt., with a value at the point of landing of \$4,135,940, compared with a catch of 1,115,848 cwt., and a landed value of \$2,746,954 in 1942.

CAPITAL EQUIPMENT AND EMPLOYEES

Capital. - The capital investment of the fisheries of Quebec in 1943 had a total value of \$3,378,071 of which the value of the vessels, boats, nets, traps, piers and wharves, etc. employed in the primary operations of catching and landing the fish accounted for \$2,019,702 and the amount invested in fish processing establishments, for \$1,358,369.

Employees. - The fisheries industry of the province furnished employment during the year to a total of 11,307 persons, of which 9,638 are classified as fishermen and 1,619 as employees of fish processing establishments. This was a decrease of 878 fishermen and an increase of 175 persons in the processing establishments.
