NATURAL GAS PRODUCTION IN CANADA, OCTOBER, 1931.

Canada's output of natural gas during October amounted to 1,901,073 thousand cubic feet, of which 70.9 per cent was obtained from Alberta wells, 26.9 per cent from Ontario wells, and 2.2 per cent from New Brunswick wells, according to a report just issued by the Dominion Bureau of Statistics at Ottawa. In September, 1,557,723 thousand cubic feet were produced and in October, 1930, the output was 2,327,470 thousand cubic feet. Production during the first ten months of the current year totalled 21,189,117 thousand cubic feet or 9.2 per cent below the total for the corresponding period of 1930.

In October, the special natural gas investigating committee appointed by the Alberta provincial government presented the Turner Valley operators, for their consideration and acceptance, with an official form which embodied the proposed restrictive measures for the conservation of natural gas from this field.

Imports of mixed gas (natural and artificial) into Canada from the United States during October totalled 5,265 thousand cubic feet valued at \$3,546 as compared with 7,991 thousand cubic feet worth \$8,598 imported in September.

PRODUCTION OF NATURAL GAS IN CANADA.

October, 1931	1,901,073 M cubic feet
September, 1931	1,557,723 M cubic feet
October, 1930	2,327,470 M cubic feet
Ten months ending October, 1931	21,189,117 M cubic feet
" " " October, 1930,	23,344,223 M cubic feet
" " " October, 1929	22,187,965 M cubic feet
