NATURAL GAS PRODUCTION IN CANADA, JANUARY, 1932.

Natural gas production in Canada during January reached a total of 3,220,087 thousand cubic feet according to a statement issued by the Dominion Bureau of Statistics at Ottawa. The December output amounted to 2,899,290 thousand cubic feet while the January, 1931, total was 3,200,000 thousand cubic feet. Production during the month under review consisted of 74.4 per cent from Alberta wells, 23.0 per cent from Ontario wells, and 2.6 per cent from New Brunswick wells.

Field records show that 146,000 cubic feet of natural gas were required to produce one barrel of naphtha in the Turner Valley field, Alberta, during January. The December gas-oil ratio was 136,000 cubic feet per barrel.

Imports of mixed gas (natural and artificial) into Canada increased 38.6 per cent to a total of 11,787 thousand cubic feet as compared with the December importations of 8,507 thousand cubic feet.

PRODUCTION OF NATURAL GAS IN CANADA

		December, 1931		M cubic	feet
Twelve	11	December, 1930	29,376,919	M cubic	feet
