CANADIAN MILLING STATISTICS

JULY 1947

Ottawa, August 28, 1947.- Wheat flour production for Canadian mills for the month of July amounted to 2,264,983 barrels compared with 2,164,145 barrels for the same month last year. Monthly production exceeded the 2 1/2 million mark twice during the current crop year, in November and May. Total flour production for this crop year topped all previous records, amounting to 28,518,602 barrels compared with 26,435,341 barrels for 1945-46, an increase of 2,083,261 barrels in the yearly output.

Mills reporting July operations had a total milling capacity of 94,730 barrels per 24-hour day, and over a 26-day working period in the month 92.0 per cent of this was effective. Mills reporting in June operated at 108.4 per cent of their combined rated capacity. The weighted average of working capacity for the current crop year was 100.8 per cent compared with 96.5 per cent for 1945-46.

Wheat used in the manufacture of flour for July amounted to 10,188,983 bushels compared with 9,625,556 bushels for the corresponding month last year. This brought the total wheat milled for flour for the current crop year ending July to 127,484,924 bushels as against 117,609,336 bushels for 1945-46. Ontario winter wheat milled for the year and included in the total amounted to 3,155,560 bushels while for 1945-46 the amount was 4,654,458 bushels.

Stocks of wheat in flour mills at the close of July 1947 amounted to 5,816,973 bushels, together with 565,694 bushels of feed wheat.
