CANADIAN MILLING STATISTICS

February 1949

Ottawa, March 24, 1949 - Wheat flour output from Canadian mills reporting for the month of February was 1,462,175 barrels against 1,793,017 barrels for the same month in 1948. This was the lowest monthly production during the current crop year, due in part to a shorter working period in the month. Flour production for the first seven months of 1948-49 amounted to 12,348,298 barrels, while for the same period in the previous crop year the amount was 14,908,592 barrels.

Mills reporting February operations had a total milling capacity of 98,230 barrels per 24-hour day and over a 24-day working period in the month 62.0 per cent of this was effective. Mills reporting in January operated 60.1 per cent of their combined rated capacity over a 25-day working period.

Wheat milled for flour in February amounted to 6,499,288 bushels compared with 8,132,337 bushels milled for the same month last year. Total wheat processed into flour for seven months of the current crop year ending with February was 55,304,129 bushels, while for a like period in 1947-48 the amount was 67,559,111 bushels.

Stocks of wheat in mill bins at the close of February 1949 amounted to 3,568,579 bushels for flour and 159,508 bushels of feed wheat,

MILL GRINDINGS

The following table shows the amount of wheat, oats, corn, barley, buckwheat and mixed grain milled for the month of February 1949, by merchant and custom mills in Canada according to divisions, with comparative totals for the same month last year and stocks on hand at February 28, 1949.

Winter wheat flour production for February 1949 amounted to 56,137 barrels compared with 61,847 barrels for the same month last year. Total winter wheat flour for the seven months under review to the close of February amounted to 949,718 barrels, while for the same period a year ago the amount was 464,310 barrels.

Wheat flour exports dropped to a low of 644,590 barrels for February. Total flour exported from the commencement of the crop year to the end of February amounted to 7,093,672 barrels compared with 8,571,681 barrels for the same period in 1947-48.

Millfeed production for February 1949 amounted to 48,967 tons, while for the same month last year the amount was 63,223 tons. This was comprised of bran 20,997 (25,976) tons, shorts 18,962 (26,129) tons, and middlings 9,008 (11,118) tons. Total millfeed production to the end of February of this crop year was 425,578 tons compared with 528,390 tons for the same period in 1947-48.

Total ground feeds amounting to 161,318,350 pounds for the month under review showed only a slight drop in volume from the comparative figure of 161,480,605 pounds produced in February 1948. The items in the total were as follows with the comparative figures in brackets and the quantities in pounds: Feed Wheat 7,049,760 (15,974,550); Ground Oats 35,896,585 (37,159,792); Cracked Corn 6,043,259 (3,391,536); Ground Barley 33,348,251 (36,458,079); and Mixed Grain 78,980,495 (68,496,648).
