GRAIN MILLING STATISTICS

During the 1963-64 crop year the Canadian flour milling industry experienced the most active season since 1946-47. This increased activity was largely due to the requirements for flour to fill export commitments to the U.S.S.R. Canadian flour mills during 1963-64 ground 111,675,000 bushels of wheat and produced 50,105,000 hundredweight of flour and 813,000 tons of millfeeds. Corresponding figures for 1962-63 were 78,789,000 bushels of wheat ground and 35,505,000 hundredweight of flour and 575,000 tons of millfeeds produced. The percentage of milling capacity utilized for the crop year 1963-64 averaged 94.3 per cent compared with 70.0 per cent for the previous crop year. Exports of wheat flour, based on preliminary customs returns, were placed at 23,647,000 hundredweight almost double the adjusted 1962-63 total of 11,854,000 hundredweight. Details of wheat flour exports for the crop year, by destination, will be published in the August 1964 issue of the Wheat Review.

The output of wheat flour in Canada during July 1964 amounted to 3,902,000 hundred-weight, representing a decrease of 1 per cent from the June output of 3,971,000 hundredweight, but 36 per cent more than the July 1963 total of 2,860,000 hundredweight and 22 per cent greater than the ten-year (1954-63) average production for the month of July of 3,201,000 hundredweight. Ontario winter wheat flour included in the quantity for the month under review amounted to 223,000 hundredweight as against 187,000 hundredweight in July 1963. Mill operations during July 1964 averaged 85.2 per cent of capacity when computed on a 26-day working period in the month and a daily capacity of 176,000 hundredweight. Mills reporting for June operated at 86.2 per cent of their combined rated capacity for the same number of days.

Wheat milled for flour in July 1964 amounted to 8,723,000 bushels, 2 per cent less than the 8,893,000 bushels milled in June, but 37 per cent above the 6,350,000 bushels milled in July a year ago. Ontario winter wheat included in the current month's milled wheat amounted to 552,000 bushels compared with 452,000 bushels of this type in July 1963. Millfeed production for July 1964 amounted to 65,000 tons, 39 per cent more than the 46,000 tons produced in the same month last year. The breakdown was as follows with last year's comparable figures in brackets: bran 27,000 (19,000) tons; shorts, 33,000 (23,000) tons; and middlings 5,000 (5,000) tons.

According to preliminary Customs returns wheat flour exports for the month of July 1964 amounted to 1,974,000 hundredweight 1 per cent higher than the 1,950,000 hundredweight exported during June 1964 and in sharp contrast to the adjusted July 1963 total of 845,000 hundredweight.

WHEAT

The following table shows the amount of wheat milled in Canadian mills for the month of July 1964, according to divisions, with comparative totals for the same month last year and stocks on hand July 31, 1964:

SUMMARY OF MILL PRODUCTION AND WHEAT FLOUR EXPORTS

The following table summarizes the production of wheat flour, oatmeal, rolled oats and millfeeds for the crop year 1963-64, including percentage of operation and wheat flour exports, with comparative figures for 1962-63:

Month	Wheat Flour		Oatmeal	Rolled Oats	Millfeeds	Wheat Flour
	% of Operation	Quantity '000 cwt.	'000 pounds	1000 pounds	'000 tons	Exports 2/
August 1963	66.9	3,004	3,439	7,311	49	1,321
September	86.5	3,459	1,797	9,112	56	715
October	107.9 1/	4,668	2,130	9,105	76	1,037
November	104.6 1/	4,737	2,142	7,796	77	1,688
December	105.0 1/	4,585	2,184	6,264	74	2,345
January 1964	103.9 1/	4,718	1,923	8,783	76	2,873
February	102.8 1/	4,495	1,879	7,330	72	2,917
March	108.1 1/	4,725	2,568	6,811	75	2,295
April	86.7	3,960	2,489	4,698	63	2,766
May	88.1	3,881	3,233	4,716	62	1,768
June	86.2	3,971	2,506	5,740	67	1,950
July	85.2	3,902	2,765	4,739	65	1,974
Totals	94.3	50,105	29,055	82,405	813	23,647
Totals Last Year	70.0	35,505	24,817	77,736	575	11,854

Many mills were operating at more than the standard number of working days in the month.

Data for the current crop year are unadjusted Customs figures as published in the 'Trade of Canada'.

The figures for the comparable period last year have been adjusted to remove the effect of time lag in reporting returns.

WHEAT FLOUR PRODUCTION
