## SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

### Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

### Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

### Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

### Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

### Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

### Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.
