---

All manufacturers of the main processed food items are asked to report their production quarterly, and the present release contains data, by quarters, for the years 1945-1947.

This commodity series has been arranged to closely parallel Annual Census of Industry data, but exact agreement between the quarterly and the annuals is not possible. Nevertheless, in this release, the quarterly figures as collected are retained for back years, unless there is a large discrepancy, since they are the best base for evaluating current quarterly figures. However, the first quarter 1948 release will also contain the latest annual figures available in each case, in order that differences in totals may be noted.

This quarterly series does not include the pack of fresh fruits and vegetables, figures for which are collected at the end of each pack season and released separately.
