Quarterly Production of Processed Foods

All manufacturers of the main processed food items report their production quarterly, and the present release contains data, by quarter for the years 1949, 1950 and the first quarter of 1951.

Although exact agreement between the Quarterly, and the Annual Census Industry data is not possible, coverage in both series is now correlated, and the Quarterly may be considered as a useful indicator of production trends, available considerably in advance of the more detailed annual figures. To bring the historical quarterly data into line the 1949 Quarterly series shown in the present report has been revised to agree in total with the Annual. Although 1950 Annual totals are not yet available, it is thought that coverage in both series was approximately the same and that the 1950 quarterly figures, as well as those for 1951, will not be subject to important revisions at a later date.

Due to many requests, we are now showing tables giving production by provinces of some of the main items in each food group.

In the final tables of this release production of major items is shown in terms of volume indexes (1935-1939=100). In addition, the individual index numbers have been weighted to arrive at volume indexes for the following groups of items (a) Biscuits, Cocoa, Confectionery and Chocolate, (b) Other Canned Goods (c) Miscellaneous.

This quarterly series does not include the pack of fresh fruits and vegetables, figures for which are collected at the end of each pack season and released separately.

Production Trimestrielle d'Aliments Conditionnés

Tous les manufacturiers des principales variétés de denrées conditionnées doivent chaque trimestre, faire rapport de leur production, et la présente publication renferme des renseignements, par trimestre, pour les années 1949, 1950 et le premier trimestre 1951.

Bien qu'il ne soit pas possible d'établir la concordance parfaite entre les données trimestrielles et celles du recensement annuel de l'industrie, la matière des deux séries a été mise en corrélation et les données trimestrielles peuvent être considérées comme étant une indication des tendances, paraissant sensiblement plus tôt que les données plus détaillées annuelles. Pour que les données trimestrielles historiques soient conformes, la série de 1949 a été révisée et mise en harmonie avec les totaux annuels. Bien que les totaux annuels de 1950 ne soient pas encore disponibles, on croit que la matière des deux séries est à peu près la même et que les chiffres trimestriels de 1950 et 1951, ne seront pas sujets à des changements considérables.

Pour répondre à de nombreuses demandes nous donnons ici, des tableaux de la production des principaux items de chaque groupe, par province.

Dans les derniers tableaux de ce bulletin, la production des principaux articles est exprimés en indice du volume (1935-1939=100). En outre, les nombres-indices particuliers ont été pondérés, pour en arriver à des indices du volume pour les groupes de produits suivants: (a) Biscuits, cacao, confiserie et chocolat (b) Autres produits en conserve (c) Divers.

Cette série trimestrielle ne renferme pas l'emballage des fruits et légumes frais, dont les renseignements sont recueillis à fin de chaque saison d'emballage et publiés séparément.

QUARTERLY PRODUCTION OF PROCESSED FOODS
PRODUCTION TRIMESTRIELLE D'ALIMENTS CONDITIONNES

Note: All 1950 and 1951 data are preliminary, subject to revision.

Nota: Tous les chiffres de 1950 et 1951 sont provisoires et sujets à révision.
