Vol. 8, No. 4

QUARTERLY PRODUCTION OF PROCESSED FOODS

December, 1954

All manufacturers of the main processed food items report their production quarterly. The present release contains data by quarters, for 1952, 1953 and 1954. The information shown for 1952 is final having been revised to agree in total with the annual Census of Industry data for that year. The information for 1953 and 1954 is preliminary and therefore subject to revision. The revision on the 1953 information will be made in time to be published in the next release, but in the past it has proven that such revisions are usually not too great as both the quarterly survey and the annual Census of Industry surveys have been correlated so that the coverage in both series are identical. Of course, it is always necessary to make some revision as the quarterly is collected considerably in advance of the more detailed annual Census of Industry figures so that they may be used as an indicator of production trends.

In order to provide comparisons for some of the major items a production index by quarters is published on pages 15 and 16. The current release shows the indexes of production for the Fourth Quarter with the base period being 1949=100. Indexes are given on the major items for the years 1952 to 1954 inclusive and any revisions made in the past have been made in this series. It is hoped that these tables are helpful and interesting to all subscribers to this publication.

On page 17, will be found an alphabetical index of all of the products contained in the publication.
