PRODUCTION OF BUTTER AND CHEESE

The production of creamery butter in Canada during the month of June, 1936, amounted to 38,938,875 pounds, compared with 36,746,605 pounds in June 1935. or an increase of 6.0 per cent. The cumulative production for the six months ending in June amounted to 105,483,488 pounds, as compared with 97,550,564 pounds or an increase of 8.1 per cent above the output of the January to June period of 1935.

Cheese production in Quebec, Ontario, Alberta and British Columbia in the month of June, 1936. amounted to 20,578,173 pounds, compared with 16,354,507 pounds in June, 1935 or an increase of 25.8 per cent. In comparison with the output of the previous month, there was an increase of approximately $11\frac{1}{2}$ million pounds. Production figures for the other four provinces in which cheese is produced, are given for June, 1936 only, and amount to 330,317 pounds, making a total production of 20,908,490 pounds for the whole of Canada in June, 1936. The cumulative production during the period from January 1 to June 30, 1936, in the four provinces for which data are available, amounted to 34,243,017 pounds as compared with 26,644,113 pounds, or an increase of 28.5 per cent over the corresponding period of last year.

STOCKS OF DAIRY AND POULTRY PRODUCTS

Creamery butter reported in cold storage warehouses and creameries at July 1, 1936 amounted to 27,311,098 pounds. Making an estimate for the holdings of outstanding firms, this figure is increased by 268,114 pounds, making a grand total of 27,579,212 pounds. Of this amount, 16,889,519 pounds represents the holdings in cold storage warehouses and 10,689,693 pounds the holdings in creameries. Estimates made by provinces are included in the provincial totals. Comparing the grand total as shown at July 1, 1936 with stocks reported at the same date of the previous year, an increase of approximately 42 million pounds or 20 per cent is shown, and with the holdings at the first of the previous month an increase of approximately 17 million pounds is recorded. The holdings of new firms added to the list since June 1, 1935 amounted to approximately 476,000 pounds.

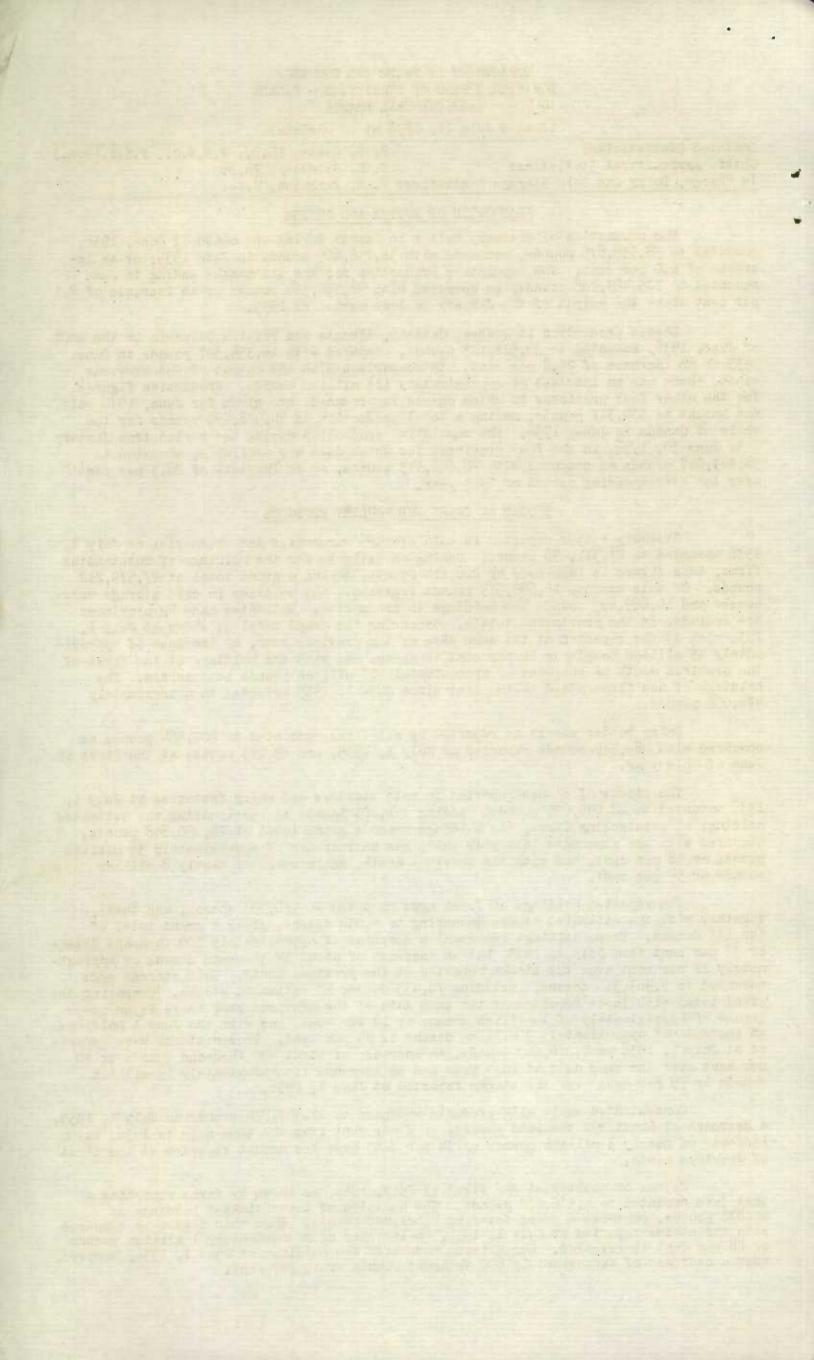

Dairy butter stocks as reported by all firms, amounted to 202,564 pounds as compared with 284,749 pounds reported at July 1, 1935, and 59,113 pounds at the first of June of this year.

The stocks of cheese reported in cold storages and dairy factories at July 1, 1936 amounted to 22,099,625 pounds. Adding 391,223 hounds as representing the estimated holdings of outstanding firms, the holdings reach a grand total of 22,490,848 pounds. Compared with the same date last year there was an increase of approximately $3\frac{1}{2}$ million pounds or 18 per cent, and with the previous month, an increase of nearly 8 million pounds or 54 per cent.

The reported holdings of fresh eggs amounted to 538,097 dozens, and these, together with the estimated stocks amounting to 4,036 dozens, gives a grand total of 542,133 dozens. These holdings represent a decrease of approximately 300 thousand dozens or 35 per cent from July 1, 1935, but an increase of about 59 thousand dozens or approximately 12 per cent over the stocks reported at the previous month. Cold storage eggs amounted to 9,963,314 dozens, including 76,433 dozens of estimated stocks. Comparing the grand total with those reported at the same date of the previous year there is an increase of approximately of 1 million dozens or 12 per cent, and with the June 1 holdings, an increase of approximately 3 million dozens or 44 per cent. Frozen stocks were reported at July 1, 1936 as 4,216,660 pounds, an increase of about 400 thousand pounds or 10 per cent over the same date of last year and an increase of approximately $1\frac{1}{2}$ million pounds or 59 per cent over the stocks reported at June 1, 1936.

Concentrated whole milk products amounted to 11,587,824 pounds on July 1, 1935, a decrease of about 290 thousand pounds, or 2 per cent from the same date in 1936, but an increase of nearly 3 million pounds or 34 per cent over the amount reported at the first of previous month.

Stocks of poultry at the first of July, 1936, as shown by firms reporting at that date amounted to 4,578,970 pounds. The addition of the estimated holdings of 42,838 pounds, produces a grand total of 4,621,808 pounds. When this figure is compared with the stocks reported at July 1, 1936, an increase of approximately 1 million pounds or 28 per cent is revealed. Comparisons made with the holdings at June 1, 1936, however, show a decrease of approximately 800 thousand pounds or 15 per cent.
